Microsoft PL-600 Reliable Test Braindumps - PL-600 Trustworthy Exam Torrent

It is a popular belief that only professional experts can be the leading one to do some adept job. And similarly, only high quality and high accuracy PL-600 Exam Questions like ours can give you confidence and reliable backup to get the certificate smoothly because our experts have extracted the most frequent-tested points for your reference. Good practice materials like our Microsoft Power Platform Solution Architect study question can educate exam candidates with the most knowledge. Do not make your decisions now will be a pity for good.

Microsoft Power Platform Solution Architect Sample Questions (Q241-Q246):

NEW QUESTION # 241

A company uses Microsoft Power Platform. The company has a model-driven app that has an embedded canvas app in the Contact table. The embedded canvas app displays information for contacts from an external data source.

The following issues are reported during testing:

- * Users assigned to the Contact Manager security role cannot see the embedded canvas app.
- * Some users assigned to the Basic User security role cannot see the embedded canvas app.

You need to recommend a resolution for each issue.

Which resolutions should you recommend? To answer, select the appropriate options in the answer area.

Answer:

Explanation:

Explanation:

A screenshot of a computer AI-generated content may be incorrect.

NEW QUESTION # 242

You need to recommend a solution to meet user interface requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Create and embed a Power BI radial gauge

A radial gauge chart has a circular arc and shows a single value that measures progress toward a goal or a Key Performance Indicator (KPI). The line (or needle) represents the goal or target value. The shading represents the progress toward that goal. The value inside the arc represents the progress value. Power BI spreads all possible values evenly along the arc, from the minimum (left-most value) to the maximum (right-most value).

In this example, you're a car retailer tracking the sales team's average sales per month. The needle represents a 140 cars sales goal. The minimum possible average sales is 0 and the maximum is 200. The blue shading shows that the team is averaging approximately 120 sales this month.

Box 2: Add an inspection order to the work order form

You can add inspections to work orders in Dynamics 365 Field Service.

Field Service inspections are digital forms that technicians use to quickly and easily answer a list of questions as part of a work order. The list of questions can include safety protocols, pass-and-fail tests for a customer asset, an interview with a customer, or other audits and assessments performed before, during, or after a work order.

Example:

NEW QUESTION # 243

You need to design a Power Platform solution that meets the following requirements:

- * Capture data from a row during deletion to be used in an automated process.

- * Use AI to process forms and automate data entry from paper-based forms.

Which requirements can be met by using out-of-the box Power Platform components?

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Yes

This can be done with Dataverse flows: The When a row is added, modified or deleted trigger runs a flow whenever a row of a selected table and scope changes or is created.

Box 2: Yes

AI Builder is a Microsoft Power Platform capability that provides AI models that are designed to optimize your business processes. AI Builder enables your business to use AI to automate processes and glean insights from your data in Power Apps and Power Automate.
