

# Real Cisco 300-710 Exam Dumps - 300-710 Valid Exam Answers

P.S. Free 2026 Cisco 300-710 dumps are available on Google Drive shared by PDFBraindumps: <https://drive.google.com/open?id=19GoR7WnAPUQpnqfnMYiMYIKRN6pKzYsj>

There are many merits of our exam products on many aspects and we can guarantee the quality of our 300-710 practice engine. You can just look at the feedbacks on our websites, our 300-710 exam questions are praised a lot for their high-quality. Our experienced expert team compile them elaborately based on the real exam and our 300-710 Study Materials can reflect the popular trend in the industry and the latest change in the theory and the practice.

To prepare for the Cisco 300-710 exam, candidates can take advantage of various resources, such as Cisco's official study materials, online training courses, and practice exams. They can also gain hands-on experience with Firepower by setting up a lab environment and testing different configurations and scenarios. Passing the Cisco 300-710 exam not only validates the candidate's knowledge and expertise in network security, but also opens up new career opportunities and improves their credibility in the industry.

Earning the Cisco 300-710 Certification can demonstrate a candidate's expertise in securing enterprise networks with Cisco Firepower, which is a valuable skillset in today's cybersecurity landscape. Securing Networks with Cisco Firepower certification can also lead to career advancement opportunities and increased earning potential in the field of network security.

## 300-710 Valid Exam Answers - Exam 300-710 Labs

Now, you should do need to get the exam question sets from year to year and reference materials that is related to Cisco 300-710 certification exam. Busying at work, you must not have enough time to prepare for your exam. So, it is very necessary for you to choose a high efficient reference material. What's more important, you should select a tool that suits you, which is a problem that is related to whether you can pass your exam successfully. Therefore, try PDFBraindumps Cisco 300-710 Practice Test dumps.

Cisco Firepower NGFW is one of the most widely used security solutions in the market, offering advanced threat protection and network visibility across physical, virtual, and cloud environments. As cyber threats continue to evolve and become more sophisticated, organizations need skilled professionals who can implement, manage, and optimize Firepower NGFW solutions to protect their networks and assets. The 300-710 Exam validates the knowledge and skills required for this critical role, including configuring and troubleshooting Firepower NGFW devices, implementing access control policies, and using advanced security features to detect and prevent cyber attacks.

## Cisco Securing Networks with Cisco Firepower Sample Questions (Q87-Q92):

NEW QUESTION # 87

An engineer is configuring a custom intrusion rule on Cisco FMC. The engineer needs the rule to search the payload or stream for the string "|45 5\* 26 27 4 0A|". Which Keyword must the engineer use with this string to create an argument for packed inspection?

- A. Protected \_ content
- B. data
- C. Content
- D. metadata

**Answer: C**

Explanation:

The content keyword is used to specify a string or pattern to search for in the payload or stream of a packet.

The string must be enclosed in quotation marks and can use modifiers such as nocase, depth, offset, and so on.

The string can also use hexadecimal notation by using a pipe symbol (|) before and after the hexadecimal characters. For example, content:"|45 5\* 26 27 4 0A|" will match any payload or stream that contains the hexadecimal bytes 45 5 26 27 4 0A followed by any number of bytes

### NEW QUESTION # 88

An engineer is troubleshooting a device that cannot connect to a web server. The connection is initiated from the Cisco FTD inside interface and attempting to reach 10.0.1.100 over the non-standard port of 9443. The host the engineer is attempting the connection from is at the IP address of 10.20.10.20. In order to determine what is happening to the packets on the network, the engineer decides to use the FTD packet capture tool. Which capture configuration should be used to gather the information needed to troubleshoot this issue?

A)

The screenshot shows the 'Add Capture' configuration window in Cisco FTD. The configuration is as follows:

- Name: Server1\_Capture
- Interface: Inside
- Match Criteria:
  - Protocol: IP
  - Source Host: 10.0.1.100
  - Destination Host: 10.20.10.20
- Buffer:
  - Packet Size: 1518 (range 14-1522 bytes)
  - Buffer Size: 524288 (range 65536-33554432 bytes)
  - Continuous Capture (selected)
  - Stop when full (unselected)
  - Trace (selected)
  - Trace Count: 50

B)

C)

**Add Capture** ? x

Name\*:  Interface\*:

Match Criteria:

Protocol\*:

Source Host\*:  Source Network\*:

Destination Host\*:  Destination Network\*:

SGT number:  (0-65533)

Buffer:

Packet Size:  14-1522 bytes  Continuous Capture  Trace

Buffer Size:  1534-33554432 bytes  Stop when full Trace Count:

**CISCO**

D)

- A. Option B
- B. Option A
- C. Option D
- D. Option C

**Answer: A**

#### NEW QUESTION # 89

A network administrator is setting up a Cisco Secure Firewall Threat Defense to peer via BGP with two ISPs. The administrator wants traffic to certain IP ranges to prefer to come in one ISP instead of the other. What must be configured on the BGP connection to the peer to help facilitate the requirement?

- A. prefix list
- B. route map
- C. access list
- D. address map

**Answer: B**

Explanation:

A route map is the appropriate mechanism to control BGP routing preferences. It allows the administrator to define policies that can influence route selection by modifying attributes such as weight, local preference, or AS path. To ensure traffic to specific IP ranges prefers one ISP over another, the administrator can configure a route map to manipulate BGP attributes for those routes, such as increasing the local preference for the desired ISP.

#### NEW QUESTION # 90

An engineer is reviewing an existing custom server fingerprint on a Cisco Secure Firewall because the current information is inaccurate. Which action must the engineer take to improve the accuracy of the network discovery rules?

- A. Exclude the IP address that is used to communicate with the monitored host.
- B. Set one common rule to override the reports in the multidomain environment.
- C. Exclude the ports that must be skipped.
- D. Add NetFlow monitoring for the network segment.

**Answer: A**

### NEW QUESTION # 91

A network administrator registered a new FTD to an existing FMC. The administrator cannot place the FTD in transparent mode. Which action enables transparent mode?

- **A. Deregister the FTD device from FMC and configure transparent mode via the CLI.**
- B. Add a Bridge Group Interface to the FTD before transparent mode is configured.
- C. Obtain an FTD model that supports transparent mode.
- D. Assign an IP address to two physical interfaces.

**Answer: A**
