- B. One Fulfillment Order per Fulfillment Location, totaling 2

- C. One Fulfillment Order
- D. One Fulfillment Order pet destination, totaling 3

A Fulfillment Order is a record that represents a group of products in an order that are fulfilled together from the same location. A Fulfillment Order has a lookup relationship to the Order Summary object, and it contains information such as the fulfillment location, delivery method, status, etc. The number of Fulfillment Orders created depends on three factors: Fulfillment Location, Delivery Method and Recipient Address.
