Exam Details

Cisco 200-201 CBROPS is a 120-minute exam containing about 105 questions that have to be covered within this allocated time. These items can be presented in the multiple-response and multiple-choice formats. The candidates are required to gain the passing score of about 750-850 points to complete the test. This exam can be taken in English only, and the students should be ready to pay the fee of \$300. To register and schedule the test, the applicants need to create an account on Pearson VUE. This platform allows them to take Cisco 200-201 as an online exam or apply for it to have it in one of the testing centers. If you fail the exam at your first attempt, you must wait for 5 days and then try again.

Cisco Understanding Cisco Cybersecurity Operations Fundamentals Sample Questions (Q325-Q330):

NEW QUESTION # 325

A malicious file has been identified in a sandbox analysis tool.

Which piece of information is needed to search for additional downloads of this file by other hosts?

- A. file size
- B. file name
- C. file hash value
- D. file type

Answer: C

NEW QUESTION # 326

Which tool gives the ability to see session data in real time?

- A. trafdump
- B. tcpdstat
- C. tcptrace
- D. trafshow

Answer: D

Explanation:

1: Trafshow is a network monitoring tool that provides real-time monitoring of network traffic. It displays the current connections and the amount of data being transferred over those connections. It is particularly useful in a Security Operations Center (SOC) for identifying unusual traffic patterns or connections that may indicate a security incident.

NEW QUESTION # 327

What is the benefit of processing statistical data for security systems?

- A. provides full visibility based on capture of packet traffic data
- B. uses less CPU and RAM resources than metadata-based monitoring
- C. provides fewer false negative events than full packet capture
- D. detects suspicious behavior based on traffic baselining trends

Answer: D

NEW QUESTION # 328

An engineer received a flood of phishing emails from HR with the source address HRjacobm@companycom. What is the threat actor in this scenario?

- A. receiver

- B. phishing email
- C. sender
- D. HR

Answer: C

Explanation:

In the context of phishing emails, the threat actor is the entity that is responsible for initiating the threat, which in this case is the sender of the phishing emails. The sender is impersonating the HR department to deceive the receiver into believing that the emails are legitimate

NEW QUESTION # 329

An analyst is exploring the functionality of different operating systems.

What is a feature of Windows Management Instrumentation that must be considered when deciding on an operating system?

- A. is an efficient tool for working with Active Directory
- B. queries Linux devices that have Microsoft Services for Linux installed
- C. has a Common Information Model, which describes installed hardware and software
- D. deploys Windows Operating Systems in an automated fashion

Answer: C

NEW QUESTION # 330
