

# Exam Salesforce Integration-Architect Format & Integration-Architect Practice Exams Free

BONUS!!! Download part of BraindumpsVCE Integration-Architect dumps for free: <https://drive.google.com/open?id=1cdbFJT1LOqhdCpzzM7yS7weLiqWp1Ea>

Three formats of Salesforce Integration-Architect practice material are always getting updated according to the content of real Salesforce Integration-Architect examination. The 24/7 customer service system is always available for our customers which can solve their queries and help them if they face any issues while using the Integration-Architect Exam product. Besides regular updates, BraindumpsVCE also offer up to 1 year of free real Salesforce Certified Integration Architect (Integration-Architect) exam questions updates.

Salesforce Certified Integration Architect is a highly respected certification in the Salesforce ecosystem. Salesforce Certified Integration Architect certification is designed for professionals who have a deep understanding of integration architecture and have experience in designing and implementing complex integration solutions. Salesforce Certified Integration Architect certification validates your knowledge and skills in designing and implementing integration solutions using various tools and technologies, such as APIs, middleware, and ETL tools.

## Integration-Architect Practice Exams Free | Latest Braindumps Integration-Architect Ebook

Our company abides by the industry norm all the time. By virtue of the help from professional experts, who are conversant with the regular exam questions of our latest Integration-Architect exam torrent we are dependable just like our Integration-Architect test prep. They can satisfy your knowledge-thirsty minds. And our Integration-Architect quiz torrent is quality guaranteed. By devoting ourselves to providing high-quality practice materials to our customers all these years we can guarantee all content is of the essential part to practice and remember. To sum up, our latest Integration-Architect Exam Torrent are perfect paragon in this industry full of elucidating content for exam candidates of various degree to use. Our results of latest Integration-Architect exam torrent are startlingly amazing, which is more than 98 percent of exam candidates achieved their goal successfully.

## Salesforce Certified Integration Architect Sample Questions (Q49-Q54):

### NEW QUESTION # 49

A US business-to-consumer (B2C) company is planning to expand to Latin America. They project an initial Latin American customer base of about one million, and a growth rate of around 10% every year for the next 5 years. They anticipate privacy and data protection requirements similar to those in the European Union to come into effect during this time. Their initial analysis indicates that key personal data is stored in the following systems:

1. Legacy mainframe systems that have remained untouched for years and are due to be decommissioned.
2. Salesforce Commerce Cloud Service Cloud, Marketing Cloud, and Community Cloud.
3. The company's CIO tasked the integration architect with ensuring that they can completely delete their Latin American customer's personal data on demand.

Which three requirements should the integration architect consider?

Choose 3 answers

- A. Impact of deleted records on system functionality.
- B. Manual steps and procedures that may be necessary.
- C. Ability to delete personal data in every system.
- D. Feasibility to restore deleted records when needed.
- E. Ability to provide a 360-degree view of the customer.

**Answer: A,C,E**

Explanation:

Explanation

The integration architect should consider the impact of deleted records on system functionality, the ability to delete personal data in every system, and the ability to provide a 360-degree view of the customer. These are important requirements for ensuring that the company can comply with the privacy and data protection regulations, as well as deliver a customer-centric service. Option A is not correct because manual steps and procedures are not desirable for deleting personal data on demand. The integration architect should aim for an automated and reliable solution that minimizes human intervention and errors. Option D is not correct because restoring deleted records when needed may violate the privacy and data protection regulations, as well as the customer's consent. The integration architect should ensure that the deletion of personal data is permanent and irreversible.

### NEW QUESTION # 50

Northern Trail Outfitters (NTO) has hired an Integration Architect to design the integrations between existing systems and a new instance of Salesforce. NTO has the following requirements:

1. Initial load of 2M Accounts, 5.5M Contacts, 4.3M Opportunities, and 45k Products into the new org.
2. Notification of new and updated Accounts and Contacts needs to be sent to 3 external systems.
3. Expose custom business logic to 5 external applications in a highly secure manner.
4. Schedule nightly automated dataflows, recipes and data syncs.

Which set of APIs are recommended in order to meet the requirements?

- A. Bulk API, Chatter REST API, Apex REST API, Analytics REST API
- B. Bulk API, Chatter REST API, Apex SOAP API, Tooling API
- C. Bulk API, Streaming API, Apex REST API, Analytics REST API
- D. Bulk API, Streaming API, Apex SOAP API, Analytics REST API

**Answer: C**

Explanation:

Explanation

The set of APIs recommended to meet the requirements are Bulk API, Streaming API, Apex REST API, and Analytics REST API. Bulk API is a RESTful API that allows you to quickly load large amounts of data into Salesforce. Bulk API is suitable for the initial load of millions of records into the new org. Streaming API is a type of streaming event that notifies subscribers of changes to Salesforce records that match a SOQL query.

Streaming API is suitable for sending notifications of new and updated Accounts and Contacts to external systems. Apex REST API is an API that allows you to expose custom business logic as RESTful web services that can be accessed by external applications.

Apex REST API is suitable for exposing custom business logic in a highly secure manner. Analytics REST API is an API that allows you to access analytics features, such as dashboards, lenses, datasets, and dataflows. Analytics REST API is suitable for scheduling nightly automated dataflows, recipes and data syncs. The other sets of APIs are not suitable for meeting all the requirements.

Chatter REST API is an API that allows you to access Chatter feeds and social data such as users, groups, followers, and files.

Chatter REST API is not relevant for this scenario. Apex SOAP API is an API that allows you to expose custom business logic as SOAP web services that can be accessed by external applications.

Apex SOAP API is less preferable than Apex REST API because it requires more bandwidth and processing time due to the XML format. Tooling API is an API that allows you to build custom development tools or apps for Salesforce applications. Tooling API is not relevant for this scenario.

### NEW QUESTION # 51

Which two requirements should the Salesforce Community Cloud support for self-registration and SSO?

Choose 2 answers

- A. SAML SSO and just-in-time provisioning
- B. OpenId Connect Authentication Provider and Registration Handler
- C. SAML SSO and Registration Handler

- D. OpenID Connect Authentication Provider and just-in-time provisioning

**Answer: A,B**

Explanation:

OpenID Connect Authentication Provider and Registration Handler, and SAML SSO and just-in-time provisioning are two requirements that the Salesforce Community Cloud can support for self-registration and SSO. OpenID Connect is a protocol that allows users to authenticate with an external identity provider and access Salesforce resources. A registration handler is a class that implements the Auth.RegistrationHandler interface and defines the logic for creating or updating a user in Salesforce after authentication. SAML SSO is a protocol that allows users to log in to Salesforce with a single click, using an assertion from an identity provider that confirms the user's identity. Just-in-time provisioning is a feature that allows Salesforce to create or update a user account based on the information in the SAML assertion. References: Certification - Integration Architect - Trailhead, [OpenID Connect Authentication Providers], [SAML Single Sign-On (SSO) Service for Salesforce]

### NEW QUESTION # 52

Northern Trail Outfitters (NTO) has a requirement to encrypt a few widely-used standard fields. NTO also wants to be able to use these fields in record-triggered flows.

Which security solution should an integration architect recommend to fulfill the business use case?

- A. Shield Platform Encryption
- B. Data Masking
- C. Classic Encryption

**Answer: A**

Explanation:

To satisfy the requirement of encrypting standard fields while maintaining their functionality within record-triggered flows, Shield Platform Encryption is the recommended architectural solution. 1 Shield Platform Encryption is a modern security layer that allows for encryption at rest while 2preserving critical platform features. Unlike Classic Encryption (Option B)-which is limited to a specific "Encrypted Text" custom field type and often breaks platform features like search and automation-Shield is designed to work with standard fields such as Name, Email, and Phone.

Key architectural considerations for Shield include:

\* **Compatibility with Automation:** Shield fields can be used in Flows, Apex triggers, and validation rules. This allows NTO to implement the required record-triggered business logic without needing to decrypt the data manually in code.

\* **Search and Filtering:** By using Deterministic Encryption, Shield allows users to filter and search for records based on encrypted fields, which is often a requirement for "widely-used" standard fields.

\* **Compliance and Governance:** Shield provides advanced key management (Bring Your Own Key - BYOK) and auditing, ensuring that NTO meets corporate security guidelines while data is being processed by the platform.

Data Masking (Option C) is primarily used for sandboxes to obfuscate PII during testing and is not a production encryption-at-rest solution. By recommending Shield, the architect provides a transparent security model that protects sensitive data without sacrificing the declarative power of Flow Builder.

### NEW QUESTION # 53

Universal Containers (UC) is a leading provider of management training globally, UC embarked on a Salesforce transformation journey to allow students to register for courses in the Salesforce community. UC has a learning system that masters all courses and student registration.

UC requested a near real-time feed of student registration from Salesforce to the learning system. The integration architect recommends using Salesforce event.

Which API should be used for the Salesforce platform event solution?

- A. SOAP API
- B. Tooling API
- C. O REST AP
- D. Streaming API

**Answer: D**

Explanation:

Explanation

The API that should be used for the Salesforce platform event solution is Tooling API. Tooling API is a specialized API that exposes metadata used in developer tooling that you can access through REST or SOAP. You can use Tooling API to create, update, or delete platform event definitions and fields<sup>4</sup> Streaming API is used to subscribe to platform events and receive notifications when they are published<sup>5</sup> References: Platform Events Developer Guide | Salesforce Developers, Define and Publish Platform Events Unit | Salesforce Trailhead QUESTIONNO: 241 Northern Trail Outfitters is in the final stages of merging two Salesforce orgs but needs to keep the retiring org available for a short period of time for lead management as it is connected to multiple public web site forms.

The sales department has requested that new leads are available in the new Salesforce instance within 30 minutes.

## NEW QUESTION # 54

.....

Our Integration-Architect exam questions will be the easiest access to success without accident for you. Besides, we are punctually meeting commitments to offer help on Integration-Architect study materials. So there is no doubt any information you provide will be treated as strictly serious and spare you from any loss of personal loss. There are so many success examples by choosing our Integration-Architect Guide quiz, so we believe you can be one of them.
