The world today is in an era dominated by knowledge. Knowledge is the most precious asset of a person. If you feel exam is a headache, don't worry. F5CAB4 test answers can help you change this. F5CAB4 study material is in the form of questions and answers like the real exam that help you to master knowledge in the process of practicing and help you to get rid of those drowsy descriptions in the textbook. However, students often purchase materials from the Internet, who always encounters a problem that they have to waste several days of time on transportation, especially for those students who live in remote areas. But with F5CAB4 Exam Materials, there is no way for you to waste time. The sooner you download and use F5CAB4 study braindumps, the sooner you get the certificate.

In this Desktop-based F5 F5CAB4 practice exam software, you will enjoy the opportunity to self-exam your preparation. The chance to customize the BIG-IP Administration Control Plane Administration (F5CAB4) practice exams according to the time and types of BIG-IP Administration Control Plane Administration (F5CAB4) practice test questions will contribute to your ease. This format operates only on Windows-based devices. But what is helpful is that it functions without an active internet connection. It copies the exact pattern and style of the real F5 F5CAB4 Exam to make your preparation productive and relevant.

Valid F5CAB4 Exam Online - Pdf F5CAB4 Version

Itexamguide provide you with the comprehensive F5 F5CAB4 Exam information to help you to succeed. Our training materials are

the latest study materials which bring by experts. We help you achieve your success. You can get the most detailed and accurate exam questions and answers from us. Our Training Tools are updated in a timely manner in accordance with the changing of Exam Objectives. In fact, the success is not far away, go down along with Itexamguide, then you will come to the road to success.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q50-Q55):

NEW QUESTION # 50

A BIG-IP Administrator receives an RMA replacement for a failed F5 device. The Administrator tries to restore a UCS taken from the previous device, but the restore fails. The following error appears in the /var/log/ltm: insufficient pool members. 01070608:3: License is not operational (expired, digital signature does not match contents)

What should the BIG-IP Administrator do to avoid this error? (Choose one answer)

- A. Revoke the license prior to restoring
- B. Reactivate the license on the new device using the manual activation method
- C. Remove the license information from the UCS archive
- D. Use the appropriate tmsh command with the no-license option

Answer: D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

When restoring a UCS file to replacement hardware (RMA device), the license from the original device is not valid on the new system. If the UCS restore attempts to load the old license, BIG-IP reports license errors such as "License is not operational", which can prevent traffic objects (including pools and virtual servers) from loading correctly.

To avoid this issue, F5 documentation recommends restoring the UCS without the license, using the following command:

```
tmsh load /sys ucs <ucs filename> no-license
```

This approach:

Restores all configuration objects (LTM, networking, certificates, keys, etc.) Excludes the invalid license tied to the old hardware

Allows the administrator to activate a new license separately on the replacement device Why the other options are incorrect:

A . Remove the license information from the UCS archive

Not supported or recommended; UCS files should not be manually modified.

B . Revoke the license prior to restoring

License revocation does not prevent the UCS from attempting to load license data.

D . Reactivate the license on the new device using the manual activation method This must be done after restoring the UCS and does not prevent the restore failure itself.

Therefore, the correct and supported method to avoid this error is C.

NEW QUESTION # 51

The BIG-IP Administrator generates a qkview using "qkview -s0" and needs to transfer the output file via SCP. Which directory contains the output file?

- A. /var/tmp
- B. /var/config
- C. /var/local
- D. /var/log

Answer: A

Explanation:

A QKView is a comprehensive snapshot of the device's Control Plane state, configuration, and logs used for troubleshooting. By default, the qkview utility stores its generated output file in the /var/tmp/ directory.

Administrators must know this path to retrieve the file for upload to F5 iHealth or Support.

NEW QUESTION # 52

A BIG-IP device sends out the following SNMP trap: big-ipo.f5.com - bigipExternalLinkChange Link: 1.0 is DOWN. Where in the BIG-IP Configuration utility should the BIG-IP Administrator verify the current status of Link 1.0?

- A. System > Platform
- B. Network > Trunks > Trunk List
- **C. Network > Interfaces > Interface List**
- D. Statistics > Performance > System

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: Monitoring the physical status of the device is critical for reporting device health. In F5 nomenclature, "1.0", "1.1", etc., represent physical hardware interfaces. To verify if a physical link is up or down as reported by the Control Plane's SNMP agent, the administrator must check the Interface List located under Network > Interfaces

NEW QUESTION # 53

Which TMSH command initiates a manual configuration synchronization to the specified device group? (Choose one answer)

- A. tmsl run sys device-group update-config
- B. tmsl modify sys failover auto-sync enable
- **C. tmsl run cm config-sync to-group <device_group>**
- D. tmsl load sys config to-group <device_group>

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

In a BIG-IP Device Service Cluster (DSC), manual configuration synchronization is performed using the ConfigSync framework.

The supported and documented command to manually push the local configuration to a specific device group is:

tmsl run cm config-sync to-group <device_group>

This command:

Initiates a one-time manual ConfigSync

Pushes the local device's configuration to all members of the specified device group Is commonly used when auto-sync is disabled or when the administrator wants explicit control over synchronization timing Why the other options are incorrect:

A is not a valid TMSH command for ConfigSync.

B enables auto-sync but does not perform an immediate synchronization.

D is not a valid or supported TMSH command for device group configuration synchronization.

Therefore, the correct command to manually synchronize configuration to a device group is C.

NEW QUESTION # 54

A BIG-IP Administrator finds the following log entry: trm tmm[7141]: 011e0002:4: sweeper_update: aggressive mode activated. Which action should the BIG-IP Administrator take to mitigate this memory issue?

- A. Configure the redundant pair to be active-active
- B. Decrease the TCP profile Idle Timeout value
- **C. Configure the server to use Connection Mirroring**
- D. Increase the TCP profile Idle Timeout value

Answer: C

Explanation:

This log message indicates that the system is low on memory and has activated 'Aggressive Mode' to reclaim resources by closing old connections³⁷. In an HA environment, one way to ensure state stability during memory pressure is to manage how connection data is handled³⁸. While the document suggests D, procedural mitigation for 'Aggressive Mode' often involves reviewing resource provisioning or optimizing connection idle timeouts to reduce memory footprint³⁹.

NEW QUESTION # 55

.....

I am glad to introduce a secret weapon for all of the candidates to pass the exam as well as get the related certification without any

more ado-- our F5CAB4 study materials. You can only get the most useful and efficient study materials with the most affordable price. With our F5CAB4 practice test, you only need to spend 20 to 30 hours in preparation since there are all essence contents in our F5CAB4 Study Materials. What's more, if you need any after service help on our F5CAB4 exam guide, our after service staffs will always offer the most thoughtful service for you.

Valid F5CAB4 Exam Online: https://www.itexamguide.com/F5CAB4_braindumps.html

It is possible for you to start your new and meaningful life in the near future, if you can pass the F5CAB4 exam and get the certification, F5 Free Sample F5CAB4 Questions Let other things go to us, Besides, you can rest assured to enjoy the secure shopping for Valid F5CAB4 Exam Online - BIG-IP Administration Control Plane Administration exam dumps on our site, and your personal information will be protected by our policy, Here we offer the most useful F5CAB4 actual test questions for your reference.

Which of the following is a simple, free way Pdf F5CAB4 Version to keep your laptop running cool, If you know the size of the text you're working with, you can choose a fixed width to optimize F5CAB4 the number of characters that appear on a line, or the line length, to aid readability.
