## Nutanix Certified Professional - Multicloud Infrastructure 6.10 Sample Questions (Q102-Q107):

### NEW QUESTION # 102

A corporate security policy mandates strict protection against boot-level rootkits and requires the isolation of NTLM password hashes from the running operating system to prevent "pass-the-hash" attacks.

During the initial testing phase, the administrator deploys a test VM using the standard AHV creation workflow. While configuring the guest operating system, administrator attempts to enable Windows Defender Credential Guard via Group Policy. However, the feature fails to start, and the system logs indicate that the underlying virtualization platform does not meet the necessary hardware security requirements.

Which specific configuration change must the administrator apply to the VM to satisfy the security policy requirements?

- A. Enable UEFI firmware, configure the disk controller to use the IDE bus, and add a vTPM device.
- B. Enable Legacy BIOS firmware, check the Secure Boot option, and add a vTPM device.
- C. Enable UEFI firmware, check the Secure Boot option, and add a Virtual Trusted Platform Module (vTPM) device.
- D. Enable Generation 2 firmware, check the VBS flag, and add a vTPM device.

**Answer: C**

### NEW QUESTION # 103

An administrator is tasked with moving a workload from one cluster to another cluster utilizing PD-Based DR because the source side is currently having intermittent network issues.

How would the administrator accomplish the unplanned failover?

- A. Activate on the source
- B. Migrate on the source
- C. Migrate on the destination
- D. Activate on the destination

**Answer: D**

### NEW QUESTION # 104

An administrator is deploying a new cluster with dense storage. Each node will have 100TB of storage. How many logical cores will

be assigned to each CVM?

- A. 0
- B. 1
- **C. 2**
- D. 3

**Answer: C**

#### NEW QUESTION # 105

An administrator must configure a VM which would run a write-intensive application on a hybrid NVMe + SSD cluster. When setting VM options, which action would give the best performance?

- A. Configure a dedicated RF3 storage container.
- B. Enable Load Balance Volume Group.
- C. Isolate storage traffic with network segmentation.
- **D. Set Flash Mode at the VM level.**

**Answer: D**

#### NEW QUESTION # 106

An administrator would like to upgrade LCM (Life Cycle Management) to the latest version on an AHV cluster. Which step should the administrator take to guarantee LCM is upgraded to the latest version?

- **A. Perform an inventory**
- B. Run NCC health check
- C. Upgrade AHV
- D. Upgrade AOS

**Answer: A**

#### NEW QUESTION # 107

.....
