

100% Pass CDFOM - Certified Data Center Facilities Operations Manager Valid Test Cost

To stay updated and competitive in the market you have to upgrade your skills and knowledge level. Fortunately, with the Certified Data Center Facilities Operations Manager (CDFOM) certification exam you can do this job easily and quickly. To do this you just need to pass the CDFOM certification exam. The Certified Data Center Facilities Operations Manager (CDFOM) certification exam is the top-rated and career advancement EXIN CDFOM Certification in the market. This EXIN certification is a valuable credential that is designed to validate your expertise all over the world. After successfully competition of CDFOM exam you can gain several personal and professional benefits.

EXIN CDFOM Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">Project Management: Covers project execution including management principles, organizational structures, and project phases. |
| Topic 2 | <ul style="list-style-type: none">Data Centre Operations: Focuses on daily operational activities and procedures supporting continuous facility functioning. |
| Topic 3 | <ul style="list-style-type: none">The Data Centre Organization: Addresses organizational structure, roles and responsibilities, shift management, performance management, training, career development, and succession planning. |
| Topic 4 | <ul style="list-style-type: none">Facilities Management: Covers infrastructure maintenance including maintenance programs, outsourcing, contracts, scheduling, spare parts, and contamination control. |
| Topic 5 | <ul style="list-style-type: none">Managing Physical Security: Deals with facility protection through security policies, staff management, incident handling, and security audits. |
| Topic 6 | <ul style="list-style-type: none">Service Level Management: Covers creating and managing service agreements, including SLAs with measurable metrics, service reporting, customer satisfaction measurement, and continuous improvement processes. |
| Topic 7 | <ul style="list-style-type: none">Environmental Sustainability: Focuses on minimizing environmental impact through power efficiency, waste management, and renewable energy integration. |

CDFOM Latest Exam Testking & Reliable CDFOM Test Camp

The experts in our company are always keeping a close eye on even the slightest change on the CDFOM exam questions in the field. Therefore, we can assure that you will miss nothing needed for the CDFOM exam. What's more, the latest version of our CDFOM Study Materials will be a good way for you to broaden your horizons as well as improve your skills. You will certainly obtain a great chance to get a promotion in your company.

EXIN Certified Data Center Facilities Operations Manager Sample Questions (Q51-Q56):

NEW QUESTION # 51

Maintenance needs to be outsourced; management demands a contract option with the lowest risk possible. Which is the best option to choose?

- A. Basic/standard/non-comprehensive
- B. Time and Material
- C. Comprehensive
- D. Exclusive

Answer: C

Explanation:

Among maintenance contract models, the Lowest-Risk option is the:

Comprehensive Contract

A comprehensive maintenance contract includes:

- * Preventive maintenance
- * Corrective maintenance
- * Replacement parts
- * Labor costs
- * Priority response times
- * Faster repair and recovery
- * Predictable costs
- * Strong service guarantees
- * Higher reliability and lower operational risk

Why other options are incorrect:

- * A - Basic: Limited coverage; higher risk of delays.
- * B - Time & Material: Highest financial and operational risk.
- * D - Exclusive: Typically an enhanced premium model but not the primary "lowest risk" category in EPI's standard contract structure.

Thus, C is correct.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * A comprehensive contract provides the lowest operational risk for critical infrastructure.
- * Offers full-service coverage and fastest response times.

NEW QUESTION # 52

Key Performance Objectives (KPOs) need to be defined.

What is a suitable time period for KPOs?

- A. Weekly, monthly and yearly
- B. Only monthly
- C. Only weekly
- D. Only yearly

Answer: A

NEW QUESTION # 53

What is defined by the Recovery Time Objective (RTO)?

- A. The time within which the impacts of not resuming activities would become unacceptable to the organization
- **B. The prioritized timeframes for resuming disrupted activities at a specified minimum acceptable capacity**
- C. The maximum age of the data to be restored in case of a disaster
- D. The minimum level of service required to be operational again

Answer: B

Explanation:

In organizational resilience and business continuity planning, the Recovery Time Objective (RTO) is a core metric used to determine the acceptable downtime for each business function.

EPI defines RTO as the:

"Targeted duration within which disrupted services or processes must be restored to a minimum acceptable operational level after a disaster." Key points:

* **Timeframe for Recovery** The RTO identifies how quickly a facility, system, or service must be restored before the outage causes unacceptable consequences.

* **Minimum Service Capacity** The RTO refers to restoring operations at a minimum acceptable level, not full normal operations.

* **Business Impact Analysis (BIA) Output** RTO is derived during BIA where criticality and dependencies of business processes are assessed and prioritized.

* **Prioritization of Resources** RTO informs disaster recovery planning, resource allocation, and restoration sequencing.

Therefore, the correct definition matches:

D - "The prioritized timeframes for resuming disrupted activities at a specified minimum acceptable capacity." Why the other options are incorrect:

* A describes the MTPD (Maximum Tolerable Period of Disruption).

* B describes elements of the Minimum Business Continuity Objective (MBCO).

* C describes the Recovery Point Objective (RPO).

EPI DCFOM-Aligned Reference Concepts

* RTO defines the permitted downtime for a service.

* RTO is linked to minimum acceptable capability after recovery.

* RTO is determined through BIA.

NEW QUESTION # 54

The organization is implementing an information security management system (ISMS).

What is the common process model to follow?

- A. PCI-DSS
- **B. PDCA**
- C. SMART
- D. ROI

Answer: B

Explanation:

The ISMS framework (aligned with ISO 27001) follows the PDCA cycle:

P - Plan

D - Do

C - Check

A - Act

This model ensures:

* Continuous improvement

* Systematic risk management

* Documented policies and controls

* Regular audits and corrective actions

Why other options are incorrect:

* A - SMART: For objective setting, not ISMS.

* B - PCI-DSS: A security compliance standard, not a process model.

* C - ROI: A financial metric, unrelated.

Thus, D is correct.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * ISMS implementation is based on PDCA methodology.
- * Ensures continuous improvement of security controls.

NEW QUESTION # 55

The data center is conducting a needs analysis.

Which of the below is an activity of the needs analysis?

- A. Identifying the current usage for power and cooling
- B. Identifying the required headcount to operate the service
- C. Identifying monitoring requirements
- **D. Identifying the operating hours for the service**

Answer: D

Explanation:

Needs Analysis determines what the customer or business requires from a service.

This includes:

- * Required service hours / operating hours
- * Availability expectations
- * Business functional requirements
- * Legal and compliance requirements
- * Physical infrastructure needs (power, cooling, space)
- * Performance and capacity needs

Identifying operating hours is a core part of defining service requirements.

Why other options are incorrect:

- * B: Current resource usage is part of infrastructure assessment, not needs analysis.
- * C: Staffing is part of capability assessment.
- * D: Monitoring requirements come after service definition and design.

Thus, A is correct.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * Needs analysis determines service operation hours, business needs, and requirements.
- * It precedes capability assessment and service design.

NEW QUESTION # 56

.....

We attach importance to candidates' needs and develop the CDFOM useful test files from the perspective of candidates, and we sincerely hope that you can succeed with the help of our practice materials. Our aim is to let customers spend less time to get the maximum return. By choosing our CDFOM Study Guide, you only need to spend a total of 20-30 hours to deal with CDFOM exam, because our CDFOM study guide is highly targeted and compiled according to the syllabus to meet the requirements of the exam.
