Salesforce Certified Platform Development Lifecycle and Deployment Architect Sample Questions (Q193-Q198):

NEW QUESTION # 193

Universal Containers (UC) is developing a custom Force.com application. The following tools are used for development, the Force.com IDE for developing apps, Git as a source control system and a Git repository, and the Force.com Migration Tool for updating sandboxes from source control. UC's current branching strategy calls for two main branches: 1) Master 2) Develop Three supporting branches: 1) Feature 2) Release 3) Hotfix Consider that the branching strategy is in parallel as follows Feature | Develop | Release | Hotfix | Master What is the recommended practice strategy that Developers should adopt for Development?

- A. Developers work off of the Feature branch, which is pulled from the Develop branch, and the Feature branch is then merged with the Hotfix branch.
- **B. Developers work off of the Feature branch, which is pulled from the Develop branch, and the Feature branch is then merged with the Develop branch.**
- C. Developers work off of the Feature branch, which is pulled from the Release branch, and the Feature branch is then merged with the Develop branch.
- D. Developers work off of the Feature branch, which is pulled from the Master branch and the Feature branch is then merged with the Develop branch.

Answer: B

NEW QUESTION # 194

Universal Containers is in the final stages of building a new application to track custom containers. During a review of the application, a business subject Matter Expert mentioned that it would be nice to be able to track additional container types beyond what was originally scoped during the plan and design phase. Which two actions should be performed to mitigate the risk? Choose 2 answers.

- **A. Escalate and communicate to stakeholders the risk and mitigate it by extending the timeline of the project to support the new requirement based on stakeholders input.**
- B. Have a discussion with the business subject Matter Expert and communicate that the Salesforce has limitations in supporting such a feature to mitigate the risk.
- C. Have a discussion with the business subject Matter Expert and communicate that a new developer environment will be needed to mitigate the risk.
- **D. Escalate and communicate to stakeholders the risk and mitigate it by allocating additional resources to support the new requirement based on stakeholders input.**

Answer: A,D

NEW QUESTION # 195

Universal Containers (UC) has gone through a global organization restructuring and process review during the last year, which triggered a review of its Salesforce org strategy. After thorough analysis of its org and global customers, UC decided to start a project to merge its Salesforce orgs, going from a multi-org to a single-org strategy. In this scenario, what are three benefits going to a single-org strategy?

Choose 3 answers

- A. Automatically unify data model among all lines of business.
- **B. Easier to get a 360-view of the customer.**
- **C. Lower administration overhead costs.**
- **D. Improved Chatter collaboration across different business units.**
- E. Consolidating the business processes would be simplified.

Answer: B,C,D

NEW QUESTION # 196

The CTO at Universal Containers decided to implement the Scrum framework for its agile teams, and communicated a set of Scrum principles to the company.

Which describes a Scrum principle?

- A. Embrace change by working on a different scope every day.
- **B. Create transparency by being honest and clear about timing, planning, and obstacles.**
- C. Respect other teams by not doing their work (a developer should not test the software).

- D. Deliver working software, so if a software component is working, avoid changing it.

Answer: B

NEW QUESTION # 197

Universal Containers (UC) has multiple teams with major projects working concurrently in their own developer sandboxes. After deploying to production, a bug is discovered. Due to tight timelines, the development team has suggested correcting the bug in the user acceptance testing (UAT) environment, which is a full copy sandbox.

What should the architect recommend?

- A. Correcting the bug in UAT is ideal. Since UAT is a full copy, it will be the fastest
- B. Since the issue was found in production, it should be treated as a change request and go
- C. UC should spin up a new sandbox to use as a hot fix environment. Once the bug is
- D. The fix should be made in the developer environment where the project work was done.

Answer: B,C

NEW QUESTION # 198

.....
