VMCE_v12 Exam Overviews - VMCE_v12 Latest Exam Pdf

Veeam certification VMCE_v12 exams has become more and more popular in the fiercely competitive IT industry. Although more and more people sign up to attend this examination of, the official did not reduce its difficulty and it is still difficult to pass the exam. After all, this is an authoritative test to inspect the computer professional knowledge and information technology ability. In order to pass the Veeam Certification VMCE_v12 Exam, generally, many people need to spend a lot of time and effort to review.

Veeam Certified Engineer v12 Sample Questions (Q133-Q138):

NEW QUESTION # 133
There is a company-wide mandate to migrate operations off corporate datacenters and over to AWS, Azure, and GCE. The Veeam engineer has backups of VMware, Hyper-V, and Nutanix VMs stored in on-premises repositories. The performance of a test restore was not satisfactory.
Which solution should the engineer deploy?

- A. Upgraded bandwidth to the Internet
- B. Veeam Wan Accelerators on premises and in the cloud

- C. Helper appliance in the cloud
- D. Caching servers on premises and in the cloud

Answer: B

Explanation:
To improve the performance of test restores from on-premises repositories to cloud environments (AWS, Azure, and GCE), deploying Veeam WAN Accelerators on premises and in the cloud is recommended. WAN Accelerators optimize data transfer over the network, reducing the amount of data that needs to be transferred and thereby improving restore performance.References:Veeam Backup & Replication User Guide, Veeam WAN Accelerator Guide

NEW QUESTION # 134
A domain administrator is working on a PowerShell script. Due to an error, the script drops 40 users out of
100 from the Business Management Organization Unit in Active Directory. Veeam Explorer for Active Directory will be used to restore it back. Choose the option that will restore functionality with the minimum impact on user experience.

- A. Use the "Fine-tune" restore option to roll back the Organizational Unit to the correct state.
- B. Use the "Compare with Production" option to restore only the missing objects back to the Organizational Unit.
- C. Use the "Point in Time" option to specify the point in time you want to restore the Active Directory database to.
- D. Use the "Quick Rollback" option to perform a restore of the changed blocks of the Active Directory database file.

Answer: B

NEW QUESTION # 135
A company has an application on a VMware VM that stores customer photos. Customers may request their photos be removed at any time. The server needs to be restored from last week's backup. What Veeam restore process allows for custom scripting to be run to automatically remove any required photos before the server is returned to production?

- A. Staged Restore
- B. Instant VM Recovery
- C. Instant Disk Recovery
- D. Secure Restore

Answer: A

Explanation:
The Veeam restore process that allows for custom scripting to be run before returning a server to production is Staged Restore. This feature enables administrators to perform necessary operations, like running a script to remove customer photos, during the restore process before the VM is brought back online.

NEW QUESTION # 136
Management asks a backup administrator to deploy the Veeam Agent on a number of Amazon EC2 instances running Windows and Linux operating systems. A Veeam Protection Group is also required by management. The Veeam Distribution Server does not have network access to these instances. What protection group type should be used to select these objects?

- A. Individual computers
- B. Cloud machines
- C. Computers listed in a CSV file
- D. Microsoft Active Directory objects

Answer: B

Explanation:
For deploying the Veeam Agent on Amazon EC2 instances running Windows and Linux operating systems without direct network access from the Veeam Distribution Server, the appropriate type of Protection Group to use is D: Cloud machines. The "Cloud machines" protection group type in Veeam Backup & Replication is specifically designed for protecting cloud-based workloads, including instances in public cloud environments like Amazon EC2. This protection group type allows the Veeam Agent to be deployed and managed remotely, even when the Veeam Distribution Server cannot directly access the instances over the network. It

facilitates centralized management of backup tasks for cloud instances, ensuring that the EC2 instances are adequately protected as per management's request, despite the network accessibility constraints.

NEW QUESTION # 137

For Veeam agent backup jobs, what feature is only available with Veeam Agent for Microsoft Windows?

- A. Backup from storage snapshots
- B. File-level backup
- C. Volume backup
- D. Application-aware processing of

Answer: D

Explanation:
Application-aware processing is a feature exclusive to Veeam Agent for Microsoft Windows. It allows for the creation of consistent backups of Windows-based applications and ensures that databases and applications like Microsoft Active Directory, SQL Server, Exchange, and SharePoint are quiesced and in a consistent state when being backed up.References:
