## Realistic Microsoft New DP-900 Exam Camp Pass Guaranteed

Microsoft Certification evolves swiftly, and a practice test may become obsolete within weeks of its publication. We provide free updates for Microsoft DP-900 Exam Questions for three months after the purchase to ensure you are studying the most recent Microsoft solutions. Furthermore, DumpTorrent is a very responsible and trustworthy platform dedicated to certifying you as a specialist.

## Microsoft Azure Data Fundamentals Sample Questions (Q282-Q287):

### NEW QUESTION # 282

Which database transaction property ensures that transactional changes to a database are preserved during unexpected operating system restarts?

- A. atomicity
- B. consistency
- C. isolation
- D. durability

**Answer: D**

### NEW QUESTION # 283

What is a difference between structured data and semi-structured data?

- A. Only Structured data supports entities.
- B. Only Structured data supports attributes.
- C. Structured data has a fixed schema and semi-structured data has a flexible schema.
- D. Structured data has a flexible schema and semi-structured data has a fixed schema.

**Answer: C**

Explanation:

Whereas structured data requires a fixed schema defined in advance, semi-structured data does not require a prior schema definition. For this reason, it can constantly evolve - new attributes can be added at any time.

### NEW QUESTION # 284

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

#### Answer Area

Statements	Yes	No
 When ingesting data from Azure Data Lake Storage across Azure regions, you will incur costs for bandwidth.	<input type="radio"/>	<input type="radio"/>
You can use blob, table, and file storage in the same Azure Storage account.	<input type="radio"/>	<input type="radio"/>
You implement Azure Data Lake Storage by creating an Azure Storage account.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Explanation:

**Answer Area**

**Statements**

**Yes**

**No**

When ingesting data from Azure Data Lake Storage across Azure regions, you will incur costs for bandwidth.

You can use blob, table, and file storage in the same Azure Storage account.

You implement Azure Data Lake Storage by creating an Azure Storage account.

Section: Describe how to work with non-relational data on Azure
