

Juniper JN0-105 test cram - Junos, Associate (JNCIA-Junos)

P.S. Free & New JN0-105 dumps are available on Google Drive shared by BootcampPDF: <https://drive.google.com/open?id=1u-jCa8RZdrg8X1sz9JaQJ6vmDDfIsHk>

IT staff want to have an achievement and get a high position, passing exams and obtaining a certification is a shortcut and necessary. JN0-105 valid exam cram review is a shortcut for passing certification. Through obtaining a certification needs a lot of time and money, especially the exam cost is not cheap, and certification function will play a significant role in your career. It only takes a little money on JN0-105 Valid Exam Cram review to help you clear exam surely, it is really worth it.

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.
Topic 2	<ul style="list-style-type: none">Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.
Topic 3	<ul style="list-style-type: none">Junos OS Fundamentals: It covers concepts, benefits, and functionality of the core elements of the Junos OS.
Topic 4	<ul style="list-style-type: none">Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device

The Junos, Associate (JNCIA-Junos) (JN0-105) examination is necessary for career advancement, therefore, doing your best to prepare for the Junos, Associate (JNCIA-Junos) (JN0-105) certification exam is essential. To succeed on the Junos, Associate (JNCIA-Junos) (JN0-105) exam, you require a specific Junos, Associate (JNCIA-Junos) (JN0-105) exam environment to practice. But before settling on any one method, you make sure that it addresses their specific concerns about the JN0-105 Exam, such as whether or not the platform they are joining will aid them in passing the Junos, Associate (JNCIA-Junos) (JN0-105) exam

on the first try, whether or not it will be worthwhile, and will it provide the necessary JN0-105 Questions.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q101-Q106):

NEW QUESTION # 101

You are trying to diagnose packet loss at interface ge-0/0/3.

In this scenario, which command would help you view error statistics in real time?

- A. show interface terse
- **B. monitor interface ge-0/0/3**
- C. monitor interface traffic
- D. show interface ge-0/0/3

Answer: B

Explanation:

The `monitor interface ge-0/0/3` command is used in Junos OS to view real-time statistics for a specific interface. This command helps in diagnosing issues like packet loss by displaying real-time updates of traffic and error statistics for the specified interface.

NEW QUESTION # 102

Exhibit.

Referring to the exhibit, which routing configuration is required for these two users to access the remote server?

- A. Trunk ports must be enabled on the switch.
- **B. Users and the server require a default gateway.**
- C. A routing protocol must be enabled on the router.
- D. Users must connect directly to the router.

Answer: B

Explanation:

For the users in the 10.1.1.0/24 subnet and the server in the 10.1.2.0/24 subnet to communicate with each other, they need to route packets through the router that connects these two subnets. Each user and the server need to have their default gateway set to the IP address of the router interface on their respective subnet (.254). This ensures that packets destined for other subnets are sent to the router, which then routes them to the correct destination subnet.

Reference:

Juniper official documentation: Configuring Basic Routing.

General networking principles.

NEW QUESTION # 103

Click the Exhibit button.

```

user@router> show route

inet.0: 13 destinations, 14 routes (13 active, 0 holddown, 0
hidden)
+ = Active Route, - = Last Active, * = Both

0.0.0.0/0          *[Static/5] 00:05:38
                   > to 172.29.1.1 via ge-0/0/3.0

```

Referring the exhibit, what does the highlighted number indicate?

- A. route preference is 5
- B. hop count is 5
- C. metric is 5
- D. cost is 5

Answer: A

Explanation:

In the exhibit shown, the highlighted number next to the route type (Static) within the square brackets indicates the route preference, also known as the administrative distance. In Junos, the route preference is a value that determines the priority of the route source. Lower numbers indicate a higher priority when the routing table is being calculated. The route preference is used to select the best route when multiple paths to the same destination exist from different routing sources. The number 5 is unusually low for a static route by default, suggesting it has been manually configured to override other route types.

NEW QUESTION # 104

Exhibit

```

term limit-icmp { from {
source-address {
172.25.11.0/24;
}
protocol icmp;
}
then {
count count-icmp; discard;
}
}

```

Referring to the exhibit, which two actions will occur when a packet matches the firewall filter? (Choose two.)

- A. The packet will be forwarded.
- B. A counter will be incremented.
- C. The packet will be discarded.
- D. An ICMP destination unreachable message will be returned.

Answer: B,C

Explanation:

Referring to the firewall filter configuration in the exhibit, when a packet matches the specified term limit- icmp, two actions are defined in the then statement: count count-icmp and discard. The count count-icmp action means that each time a packet matches this term, a counter named count-icmp will be incremented, providing a tally of how many packets have matched the term. The discard action means that the packet will be dropped and not forwarded through the device. This effectively prevents the packet

from reaching its intended destination. There is no action specified that would cause an ICMP destination unreachable message to be returned, nor is there any action that would allow the packet to be forwarded.

NEW QUESTION # 105

Exhibit

```
{hold:node0} [edit]
```

```
root# set system root-authentication ?
```

Possible completions:

+ apply-groups Groups from which to inherit configuration data

+ apply-groups-except Don't inherit configuration data from these groups encrypted-password Encrypted password string load-key-file File (URL) containing one or more ssh keys plain-text-password Prompt for plain text password (autoencrypted)

> ssh-dsa Secure shell (ssh) DSA public key string

> ssh-rsa Secure shell (ssh) RSA public key string

```
{hold:node0} [edit]
```

```
root# set system root-authentication plain-text-password
```

New password:

Retype new password:

```
{hold:node0} [edit]
```

```
root# commit and-quit
```

```
[edit interfaces]
```

```
'ge-0/0/0'
```

HA management port cannot be configured

error: configuration check-out failed

```
{hold:node0} [edit]
```

```
root#
```

You are unable to remotely access your Juniper device using the CLI.

Referring to the exhibit, which command would you add to the existing configuration to enable remote CLI access?

- A. set system login idle-timeout 20
- B. load factory-default
- C. set system root-authentication plain-text-password
- **D. set system services ssh**

Answer: D

Explanation:

In Junos OS, remote access to the device's CLI is commonly facilitated through Secure Shell (SSH), a protocol providing secure command-line access over an insecure network. The given exhibit indicates an attempt to set a root authentication password but does not show configuration for enabling remote access services. To enable SSH, which is not shown in the configuration snippet, you need to configure the device to accept SSH connections. This is done by enabling the SSH service within the system services hierarchy of the configuration. The correct command to add to the existing configuration for enabling remote CLI access via SSH is `set system services ssh`. This command activates the SSH service, allowing secure remote logins to the device.

NEW QUESTION # 106

.....

Do you want to find a good job which brings you high income? Do you want to be an excellent talent? The JN0-105 certification can help you realize your dream which you long for because the JN0-105 test prep can prove that you own obvious advantages when you seek jobs and you can handle the job very well. So our JN0-105 Exam Preparation can be conducive to helping you pass the JN0-105 exam and find a good job. What are you waiting for? Just come and buy our JN0-105 exam questions!
