Adobe Experience Manager DevOps Engineer Expert Sample Questions (Q20-Q25):

NEW QUESTION # 20

A developer creates a new multi-module Maven project and needs to create a Maven module for storing run-mode configurations.

Which packageType should the DevOps engineer instruct the developer to use?

- A. application
- **B. container**
- C. content
- D. Use the "core" package type for run-mode configurations.

Answer: B

NEW QUESTION # 21

An html page is published and is accessible through the dispatcher. A client is trying to access the updated page but is not getting the updated content.

A rule /type "allow"/glob "*.html" is present in the dispatcher /cache /rules configuration The HTTP header "Cache-Control: max-age=3600" is set for all requests with the html extension The /invalidate section is not set in the dispatcher configuration A flush agent is configured on the publish instance A CDN is serving all static content including html files and was flushed manually Why does the content fail to update on the client side?

- A. The content is still cached in the dispatcher after the CDN flush.
- B. The flush occurred before the content was replicated because there are a lot of items in the queue.
- C. There is no /invalidate section present in the dispatcher configuration to invalidate the updated content.
- **D. The file was cached on the client side in the browser cache.**

Answer: D
