Latest FCP_FMG_AD-7.4 Test Testking, FCP_FMG_AD-7.4 Latest Study Guide

Web-based FCP - FortiManager 7.4 Administrator (FCP_FMG_AD-7.4) practice exam is a convenient format to evaluate and improve preparation for the exam. It is a FCP_FMG_AD-7.4 browser-based application, which means you can access it from any operating system with an internet connection and a web browser. Unlike the desktop-based exam simulation software, the FCP - FortiManager 7.4 Administrator (FCP_FMG_AD-7.4) browser-based practice test requires no plugins and software installation.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q44-Q49):

NEW QUESTION # 44

Refer to the exhibit. Given the configuration shown in the exhibit, which two conclusions can you draw from the installation targets in the Install On column? (Choose two.)

Managed FortiGate devices

FortiManager policy package

FortiManager policy package

⊟ 🖳 Shared_Package	☐	1	Ping_Access	🖵 ISFW (Student)	🖵 port3	🖵 port1
Firewall Header Policy	☐	2	Web	🖵 Local-FortiGate (root) 🖵 ISFW (Student)	🖵 port3	🖵 port1
Firewall Policy						
Installation Targets	☐	3	Source_Device	◉ Installation Targets	🖵 port3	🖵 port1
➕ 🖳 default	☐	⊟ Implicit (4/4 Total:1)				
	☐	4	Implicit Deny	◉ Installation Targets	any	any

- A. Policy seq.S will be installed on all managed devices and VDOMs that are listed under Installation Targets
- B. Policy seq.# 3 will be skipped because no installation targets are specified.
- C. Policy seq.# 1 will be installed on the ISFW device root[NAT] and Student[NAT] VDOMs only.
- D. Policy seq.# 2 will not be installed on the Local-FortiGate root VDOM because there is no root VDOM in the Installation Target

Answer: A,C

NEW QUESTION # 45
Refer to the exhibit.

FortiManager log

```
--------Executing time:                    -----------

Starting log (Run on device)

Local-FortiGate $ config user local
Local-FortiGate (local) $ edit student
Local-FortiGate (student) $ set type ldap
Local-FortiGate (student) $ set status enable
Local-FortiGate (student) $ next
Attribute 'ldap-server' MUST be set.
Command fail. Return code 1
Local-FortiGate (local) $ end
Local-FortiGate $ config firewall policy
Local-FortiGate (policy) $ edit 2
Local-FortiGate (2) $ set srcintf port3
Local-FortiGate (2) $ set dstintf port1
Local-FortiGate (2) $ set srcaddr all
Local-FortiGate (2) $ set dstaddr all
Local-FortiGate (2) $ set action accept
Local-FortiGate (2) $ set schedule always
Local-FortiGate (2) $ set service ALL
Local-FortiGate (2) $ set users student
entry not found in datasource

value parse error before 'student'
Command fail. Return code -3
Local-FortiGate (2) $ set nat enable
Local-FortiGate (2) $ next
Local-FortiGate (policy) $ end
Local-FortiGate $

----------------End of Log----------------------------
```

What can you conclude from the failed installation log shown in the exhibit?

- A. Policy ID 2 is installed in the disabled state.
- B. Policy ID 2 will not be installed.
- C. Policy ID 2 is installed without the remote user student.
- D. Policy ID 2 is installed without a source address.

Answer: C

Explanation:

From the log provided in the exhibit, several conclusions can be drawn regarding the installation of Policy ID 2:

* The installation process fails when attempting to set the LDAP user "student". The log shows:

* "Attribute 'ldap-server' MUST be set.": This error indicates that when setting up the LDAP user configuration, a mandatory field (ldap-server) is missing. As a result, the configuration could not be completed for the user.

* "entry not found in datasource" and "value parse error before 'student'": These errors confirm that the user "student" could not be properly added due to a configuration issue (such as the missing LDAP server).

Because of these errors, while other configuration elements (such as source and destination interfaces, actions, and services) are properly set, the user configuration for "student" is not applied.

Evaluation of the answer options:

* A. Policy ID 2 is installed in the disabled state.

* This isfalse. There is no indication in the log that Policy ID 2 is disabled.

* B. Policy ID 2 is installed without the remote user student.

* This istrue. Due to the failure in setting the"student"user (as indicated by the errors), the policy will be installedwithoutthat user being properly configured.

* C. Policy ID 2 will not be installed.

* This isfalse. The policy is installed, but the user configuration failed. The rest of the policy configuration appears to have proceeded without critical errors that would prevent the installation.

* D. Policy ID 2 is installed without a source address.

* This isfalse. The log shows that the source address is properly set to "all" (set srcaddr all), so this is not the cause of the issue.

From the log exhibit, we see errors related to the "ldap-server" attribute not being set and an error with the entry "student" not being found in the datasource. This indicates that Policy ID 2 will not be installed due to missing or incorrect data required for successful installation. The "Command fail. Return code -3" confirms the installation failure, so the correct answer is C.

Options A, B, and D are incorrect because:

* A suggests the policy is installed in a disabled state, which isn't supported by the log.

* B and D suggest partial installation, but the error messages indicate a complete failure to install Policy ID 2.

FortiManager References:

* Refer to FortiManager 7.4 Troubleshooting Guide: Common Errors and Log Interpretation.

NEW QUESTION # 46
Refer to the exhibit.

Given the configuration shown in the exhibit, which two conclusions can you draw from the installation targets in the Install On column? (Choose two.)

- A. Policy seq.S will be installed on all managed devices and VDOMs that are listed under Installation Targets
- B. Policy seq.# 3 will be skipped because no installation targets are specified.
- C. Policy seq.# 1 will be installed on the ISFW device root[NAT] and Student[NAT] VDOMs only.
- D. Policy seq.# 2 will not be installed on the Local-FortiGate root VDOM because there is no root VDOM in the Installation Target

Answer: A,C

Explanation:
* Option A: Policy seq.S will be installed on all managed devices and VDOMs that are listed under Installation Targets.This is correct. The "Install On" column indicates that the policy is targeted for installation on all listed managed devices and VDOMs under Installation Targets.
* Option D: Policy seq.# 1 will be installed on the ISFW device root[NAT] and Student[NAT] VDOMs only.This is correct. Policy sequence #1 specifies that it will be installed only on the ISFW device and the VDOMs 'root[NAT]' and 'Student[NAT]' as indicated by the "Install On" column.
Explanation of Incorrect Options:
* Option B: Policy seq.# 3 will be skipped because no installation targets are specifiedis incorrect because it is clearly listed under "Installation Targets," which means it will be installed according to the specified configuration.

* Option C: Policy seq.# 2 will not be installed on the Local-FortiGate root VDOM because there is no root VDOM in the Installation Targetis incorrect as the exhibit does not show any specific exclusion for seq.# 2 on the Local-FortiGate root VDOM.
FortiManager References:
* Refer to the FortiManager Administration Guide sections on "Policy Packages" and "Policy Installation Targets" for more details.

NEW QUESTION # 47
Which statement about the upgrade of ADOMs on FortiManager is true?

- A. Upgrading the FortiManager version upgrades all existing ADOMs automatically.
- B. To ensure database consistency, you must upgrade an ADOM before you upgrade the devices in it.
- C. You cannot import policies from a device until its FortiOS version matches the ADOM version.
- D. ADOMs using global objects can be upgraded before or after upgrading the global database ADOM.

Answer: B

Explanation:
* Option A: To ensure database consistency, you must upgrade an ADOM before you upgrade the devices in it.This is the correct answer. When upgrading ADOMs on FortiManager, the ADOM must be upgraded first to match the FortiOS version of the devices it manages. This is necessary to ensure compatibility and consistency between the ADOM's database schema and the FortiGate's configuration.
Explanation of Incorrect Options:
* Option B: Upgrading the FortiManager version upgrades all existing ADOMs automaticallyis incorrect because the ADOMs must be upgraded manually or individually after upgrading the FortiManager.
* Option C: You cannot import policies from a device until its FortiOS version matches the ADOM versionis incorrect because while version matching is important, it is not strictly necessary for policy import.
* Option D: ADOMs using global objects can be upgraded before or after upgrading the global database ADOMis incorrect as the order of upgrade matters to maintain compatibility.
FortiManager References:
* Refer to "FortiManager Upgrade Guide" for detailed procedures on upgrading ADOMs and devices.

NEW QUESTION # 48
Which two statements about Security Fabric integration with FortiManager are true? (Choose two.)

- A. The Security Fabric license, group name, and password are required for the FortiManager Security Fabric integration.
- B. The Security Fabric settings are part of the device-level settings.
- C. The Fabric View module enables you to view the Security Fabric ratings for Security Fabric devices.
- D. The Fabric View module enables you to generate the Security Fabric ratings for Security Fabric devices.

Answer: B,C
