

100% Pass 2026 Vce 3V0-32.23 Format - Cloud Management and Automation Advanced Design Reliable Dumps Pdf

BTW, DOWNLOAD part of DumpExam 3V0-32.23 dumps from Cloud Storage: <https://drive.google.com/open?id=15c8OgRp3KRzMboJGejURpAozLq3TVTuk>

Our 3V0-32.23 prep torrent boosts the highest standards of technical accuracy and only use certificated subject matter and experts. We provide the latest and accurate Cloud Management and Automation Advanced Design exam torrent to the client and the questions and the answers we provide are based on the real exam. But you buy our 3V0-32.23 prep torrent you can mainly spend your time energy and time on your job, the learning or family lives and spare little time every day to learn our Cloud Management and Automation Advanced Design exam torrent. Our answers and questions are compiled elaborately and easy to be mastered. Because our 3V0-32.23 Test Braindumps are highly efficient and the passing rate is very high you can pass the exam fluently and easily with little time and energy needed.

VMware 3V0-32.23 exam is challenging but is an excellent opportunity for IT professionals to showcase their mastery of cloud automation and management principles. Candidates who pass the exam will receive the VMware Certified Advanced Professional - Cloud Management and Automation Design (VCAP-CMA Design) certification, a recognition of their expertise and a testament to their commitment to advancing their career in the IT industry.

VMware 3V0-32.23 certification exam is designed to test the knowledge and skills of IT professionals in cloud management and automation. 3V0-32.23 Exam is targeted towards individuals who are responsible for designing and implementing cloud solutions in their organizations. 3V0-32.23 exam covers a wide range of topics, including cloud architecture, automation, deployment and management of cloud solutions, and the use of various VMware tools and technologies.

Reliable VMware 3V0-32.23 Dumps Pdf | Valid 3V0-32.23 Test Questions

3V0-32.23 real questions in PDF format are vital in enhancing VMware Cloud Management and Automation Advanced Design exam preparation. With Cloud Management and Automation Advanced Design (3V0-32.23) exam dumps PDF, you can easily study via your smartphone, laptop, and tablet. DumpExam has designed the Cloud Management and Automation Advanced Design (3V0-32.23) PDF format for your convenience, so you prepare for the certification exam at any time and anywhere you want. You can also print questions in the Cloud Management and Automation Advanced Design (3V0-32.23) dumps PDF format if you want to avoid eye strain.

VMware Cloud Management and Automation Advanced Design Sample

Questions (Q238-Q243):

NEW QUESTION # 238

An architect is responsible for creating the design for a Cloud Monitoring solution that will be used to monitor a VMware Software-Defined Data Center.

Which two statements below, provided by the Service Owner, would be considered as non-functional requirements? (Choose two.)

- A. The solution must support a monthly availability target of 99.9%.
- B. The solution must be redundant to a minimum of N+1 including during planned maintenance.
- C. The solution must support the monitoring of 1000 virtual machines across two data center locations.
- D. The solution must support the retention of live data for at least 12 months.
- E. The Recovery Time Objective (RTO) of solution is 4 hours.

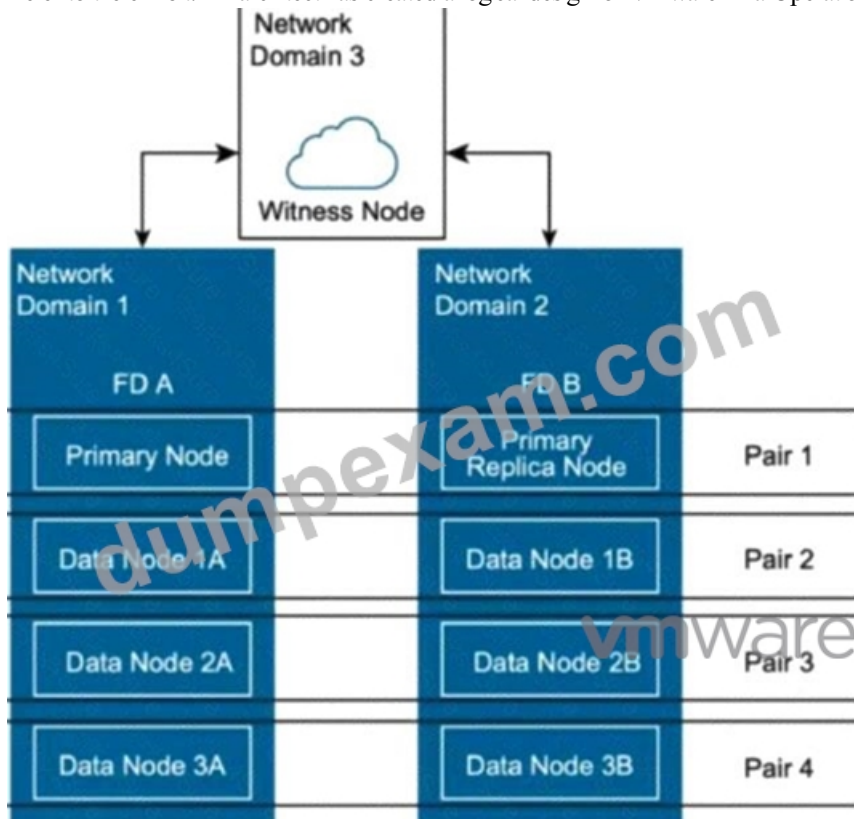

Answer: A,E

Explanation:

Non-functional requirements specify how a system should operate, such as availability and recovery targets, rather than its specific functions or features.

NEW QUESTION # 239

Refer to the exhibit. An architect has created a logical design for VMware Aria Operations.

Realize Operations Manager Cluster with Continuous Availability enabled

The architect has included Continuous Availability as part of the design.

Which scenarios does this design protect against. (Choose three.)

- A. The loss of two Data Node 2A and Data Node 2B
- B. The loss of the Primary Node and the Primary Replica Node
- C. The loss of two Data Node 1A and Data Node 2B
- D. The loss of two Data Node 1A and Data Node 1B
- E. The loss of a single network domain
- F. The loss of Data Node 1A and Data Node 3A

Answer: A,E,F

Explanation:

Continuous Availability (CA) in VMware Aria Operations (vRealize Operations Manager) protects against failures by distributing nodes across fault domains (FDs) and pairing nodes across domains. This design protects against losing any two nodes from different pairs (e.g., 1A and 3A, or 2A and 2B), and it can tolerate the complete loss of a single network domain (all nodes in either FD A or FD B), ensuring continuous service availability. It does not protect against the simultaneous loss of both the Primary Node and Primary Replica Node or both nodes of a pair (1A and 1B).

NEW QUESTION # 240

The Service Owner of a vRealize Automation solution has requested that public cloud use is restricted to hosting workloads only. The configured cloud zones for all projects will be stated as follows:

- vSphere
- AWS
- Azure

Which FaaS provider should the architect recommend for generic extensibility actions to meet the Service Owner's requirement?

- **A. On-Prem**
- B. Amazon Web Services
- C. Auto Select
- D. Microsoft Azure

Answer: A

NEW QUESTION # 241

Which aspect of a Cloud Management logical design would VMware Identity Manager contribute to?

- A. Intrusion detection and prevention
- B. Load balancing of network traffic
- **C. Authentication and access management**
- D. Firewall configuration

Answer: C

NEW QUESTION # 242

An architect is completing the physical design for a vRealize Operation (vROps) solution for a customer. The customer has only provided the following information for their existing environment:

- 500 Virtual Machines
- 2 VMware vCenter Servers
- 10 VMware vSphere Hosts
- 20 Datastores
- Live data should be stored within the vROps solution for 6 months
- The RTO for all existing management components is 4 hours
- The RTO for all existing management components is 1 hour

Which two assumptions could the architect make when sizing the vROps cluster? (Choose two.)

- A. The minimum data retention within vRealize Operations Cluster will be 12 months.
- B. The resource profile of a virtual machine will be, on average, 1 vCPU and 2 GB RAM.
- C. The RPO of the vROps solution will be 1 hour.
- **D. The vROps cluster will be configured as High Availability.**
- **E. The RTO of the vROps solution will be 4 hours.**

Answer: D,E

NEW QUESTION # 243

.....

The point of every question in our 3V0-32.23 exam braindumps is set separately. Once you submit your exercises of the 3V0-32.23

learning questions, the calculation system will soon start to work. The whole process only lasts no more than one minute. Then you will clearly know how many points you have got for your exercises of the 3V0-32.23 study engine. And at the same time, our system will auto remember the wrong questions that you answered and give you more practice on them until you can master.
