

# 2026 Oracle - 1Z0-1072-25 - Oracle Cloud Infrastructure 2025 Architect Associate Valid Braindumps Book

BONUS!!! Download part of TestKingFree 1Z0-1072-25 dumps for free: [https://drive.google.com/open?id=1tbYsJyP8B8ikAvOB-Hl8NOz39y\\_kfgt](https://drive.google.com/open?id=1tbYsJyP8B8ikAvOB-Hl8NOz39y_kfgt)

So our high efficiency 1Z0-1072-25 torrent question can be your best study partner. Only 20 to 30 hours study can help you acquire proficiency in the exam. And during preparing for 1Z0-1072-25 exam you can demonstrate your skills flexibly with your learning experiences. The rigorous world force us to develop ourselves, thus we can't let the opportunities slip away. Being more suitable for our customers the 1Z0-1072-25 Torrent question complied by our company can help you improve your competitiveness in job seeking, and 1Z0-1072-25 exam training can help you update with times simultaneously.

## Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN</li><li>FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block</li> <li>File</li> <li>Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.</li> </ul>

## Pass Guaranteed Oracle Marvelous **1Z0-1072-25 Valid Braindumps Book**

Our Oracle Cloud Infrastructure 2025 Architect Associate study questions have a high quality, that mainly reflected in the passing rate. More than 99% students who use our 1Z0-1072-25 exam material passed the exam and successfully obtained the relating certificate. This undoubtedly means that if you purchased 1Z0-1072-25 exam guide and followed the information we provided you, you will have a 99% chance of successfully passing the exam. So our 1Z0-1072-25 study materials are a good choice for you. In order to gain your trust, we will provide you with a full refund commitment. If you failed to pass the exam after you purchase 1Z0-1072-25 Exam Material, whatever the reason, you just need to submit your transcript to us and we will give you a full refund. We dare to make assurances because we have absolute confidence in the quality of Oracle Cloud Infrastructure 2025 Architect Associate study questions. We also hope you can believe that 1Z0-1072-25 exam guide is definitely the most powerful weapon to help you pass the exam.

## Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q40-Q45):

### NEW QUESTION # 40

Which OCI Object Storage tier is suitable for storing the backup to minimize cost while meeting the requirements of immediate accessibility and retention of 31 days?

- A. Infrequent Access tier
- B. Auto-Tiering tier
- C. Archive tier
- D. Standard tier

**Answer: A**

Explanation:

The Infrequent Access tier in OCI Object Storage is suitable for storing backups that need to be immediately accessible and retained for a specific period, such as 31 days, while also minimizing costs. This tier offers a balance between cost and accessibility, charging lower storage costs compared to the Standard tier but still allowing quick access to the data.

Use Case: The Infrequent Access tier is designed for data that is not frequently accessed but must remain readily available when needed, making it ideal for backup storage.

Oracle Cloud Infrastructure Documentation: Object Storage Tiers

### NEW QUESTION # 41

Which statement is true about instance configurations and instance pools in OCI?

- A. You can only delete an instance configuration if it is not associated with any instance pool.
- B. An instance pool can have multiple instance configurations associated with it.
- C. You cannot reuse the same instance configuration for multiple instance pools.
- D. You can delete an instance configuration if it is associated with an instance pool.

## Answer: A

Explanation:

Instance configurations and instance pools are used in OCI to manage groups of instances collectively:

Deleting Instance Configurations: An instance configuration cannot be deleted if it is currently associated with an instance pool. You must first disassociate or delete the instance pool before you can delete the instance configuration.

Reusing Instance Configurations: You can reuse the same instance configuration for multiple instance pools, which allows you to deploy identical groups of instances in different contexts.

Instance Pools: A single instance pool can only be associated with one instance configuration, ensuring uniformity across the instances in the pool.

Relevant OCI Documentation:

[Instance Pools Overview](#)

These references explain how to manage instance configurations and pools, including the rules for deletion.

## NEW QUESTION # 42

Which policy would you write to provide admin access to all three of your existing admin groups for a shared Test compartment?

- A. Allow all-group to manage all-resources in compartment Test where  
`request.principal.group.tag.EmployeeGroup.Role='Admin'`
- B. Allow any-user to manage all-resources in compartment Test where  
`request.principal.group.tag.EmployeeGroup.Role='Admin'`
- C. Allow dynamic-group to manage all-resources in compartment Test where  
`request.principal.group.tag.EmployeeGroup.Role='Admin'`
- D. Allow group any-group to manage all-resources in compartment Test where  
`request.principal.group.tag.EmployeeGroup.Role='Admin'`

## Answer: A

Explanation:

In Oracle Cloud Infrastructure (OCI), policies are written to define permissions for user groups. The correct policy to provide admin access to all three existing admin groups in a shared compartment (in this case, the "Test" compartment) would be:

"Allow all-group to manage all-resources in compartment Test where `request.principal.group.tag.EmployeeGroup.Role='Admin'`".

"Allow all-group": Grants access to all groups.

"to manage all-resources": Specifies full access permissions (manage includes all CRUD operations).

"in compartment Test": Limits the scope of the policy to the "Test" compartment.

"where `request.principal.group.tag.EmployeeGroup.Role='Admin'`": Adds a condition to restrict this admin-level access to only groups tagged with the role 'Admin'.

This policy ensures that only users in the groups tagged as Admin will be allowed to manage resources in the Test compartment, making it the most suitable choice for providing admin access.

## NEW QUESTION # 43

Which statement is true about pre-authenticated requests?

- A. You cannot edit a pre-authenticated request.
- B. Pre-authenticated requests can be used to delete buckets.
- C. Deleting a pre-authenticated request does not revoke access.
- D. You need to provide your OCI credentials to the partner company.

## Answer: A

Explanation:

In Oracle Cloud Infrastructure (OCI), pre-authenticated requests (PARs) allow users to grant access to specific objects in Object Storage without requiring the recipient to have an OCI account or credentials. This feature is useful for sharing objects securely without exposing broader access.

Cannot Edit a PAR: Once a pre-authenticated request is created, you cannot edit it. If you need to change the settings, such as the expiration date or the object being shared, you must delete the existing PAR and create a new one.

#### Other Statements:

Deleting a PAR does indeed revoke access immediately, contradicting option B.

Providing OCI credentials (C) is not required for using PARs. The purpose of PARs is to avoid sharing credentials.

Deleting Buckets (D): PARs are designed for accessing objects, not for administrative actions like deleting buckets.

#### Relevant OCI Documentation:

##### Managing Pre-Authenticated Requests

This reference outlines the features and limitations of pre-authenticated requests, including the inability to edit them once created.

## NEW QUESTION # 44

Which TWO options will accomplish a fully redundant connection from an on-premises data center to a Virtual Cloud Network (VCN) in the us-ashburn-1 region?

- A. Configure two FastConnect virtual circuits to the us-ashburn-1 region and terminate them in diverse hardware on-premises.
- B. Configure one FastConnect virtual circuit to the us-ashburn-1 region and the second FastConnect virtual circuit to the us-phoenix-1 region.
- C. Configure a Site-to-Site VPN from a single on-premises CPE.
- D. Configure one FastConnect virtual circuit to the us-ashburn-1 region and a Site-to-Site VPN to the us-ashburn-1 region.

**Answer: A,D**

#### Explanation:

For a fully redundant connection from an on-premises data center to a VCN in the OCI us-ashburn-1 region, it is important to ensure high availability and fault tolerance. Here's how each option contributes to redundancy:

##### Option B: Two FastConnect Virtual Circuits:

FastConnect provides a dedicated, private connection with higher bandwidth and more consistent performance compared to a VPN. To achieve redundancy, you can configure two FastConnect circuits in the same region (us-ashburn-1), each terminated on diverse hardware on-premises. This setup ensures that even if one circuit or its associated hardware fails, the other circuit can maintain the connection. This ensures no single point of failure in the connectivity to OCI. Thus, option B is correct.

##### Option D: FastConnect and Site-to-Site VPN:

Another approach to redundancy is to have a mix of connection types. By setting up one FastConnect circuit and one Site-to-Site VPN, both terminating in the same region (us-ashburn-1), you create a diverse connection path. If the FastConnect connection fails, traffic can automatically route through the VPN connection, maintaining connectivity. This setup adds an extra layer of redundancy, making option D correct as well.

#### Incorrect Options:

Option A: Only configuring a Site-to-Site VPN from a single on-premises CPE does not provide redundancy because it involves just one connection path. If that connection or the CPE fails, there would be no fallback.

Option C: Configuring FastConnect circuits to different regions (us-ashburn-1 and us-phoenix-1) does not provide redundancy within a single region but rather across regions, which is not required for regional redundancy.

#### Relevant OCI Documentation:

##### OCI FastConnect Overview

##### Using Site-to-Site VPN and FastConnect for Redundancy

These references offer more detailed information on setting up redundant connections and the benefits of each connection type within OCI.

## NEW QUESTION # 45

.....

Our TestKingFree provides 1Z0-1072-25 braindumps and training materials in PDF and software, which contains 1Z0-1072-25 exam dumps and answers. Moreover, the content of 1Z0-1072-25 braindumps and training materials covers largely and more reliably, and it will help you most to prepare 1Z0-1072-25 test. If you fail the 1Z0-1072-25 certification exam with our 1Z0-1072-25 dumps, please don't worry. We will refund fully.
