Cert007

a local FortiGuard Distribution Server (FDS) in a closed network. An administrator pushes a new firewall policy with an intrusion prevention system (IPS) profile from FortiManager to FortiGate HQ-NGFW-1. However, FortiGate does not recognize the new IPS signature from FortiManager.

What is the most likely reason why FortiGate HQ-NGFW-1 does not recognize the new IPS signature?

- A. FortiGate must enable rating for the FortiManager IP address, 192.168.1.120, in server list 1.
- B. FortiManager and FortiGate have different IPS database versions.
- C. The administrator must enable IPv6 connections for FortiGuard services on FortiManager.
- D. The administrator must enable the fortiguard-anything option to correctly download all signatures from the local FDS.

Answer: B

Explanation:

The most likely reason FortiGate HQ-NGFW-1 does not recognize the new IPS signature is that FortiManager and FortiGate have different IPS database versions. The FortiManager may have pushed a signature update that FortiGate has not yet synchronized or validated locally, causing the signature to be unrecognized.

9. Which is recommended when you are managing a high volume of logs in your network?

- A. Store logs on FortiManager and use FortiView.
- B. Add and manage FortiAnalyzer from FortiManager.
- C. Enable advanced ADOM mode on FortiManager.
- D. Forward logs from FortiAnalyzer to FortiManager daily.

Answer: B

Explanation:

Adding and managing FortiAnalyzer from FortiManager is recommended for handling a high volume of logs, as FortiAnalyzer is designed specifically for centralized log management, analysis, and reporting, which offloads this workload from FortiManager.

在21世紀這個IT行業如此輝煌的時代，競爭是很激烈的。理所當然的，在IT行業中Fortinet FCP_FMG_AD-7.6認證考試成為了一個很熱門的考試。報名參加考試的人越來越多，並且能通過這個認證考試也是那些雄心勃勃的IT專業人士的梦想。

Fortinet FCP_FMG_AD-7.6 考試大綱：

主題	簡介
主題 1	Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
主題 2	Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
主題 3	Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.
主題 4	Troubleshooting

授權的FCP_FMG_AD-7.6試題 |第一次嘗試和最新Fortinet FCP - FortiManager 7.6 Administrator輕鬆學習和通過考試

通過FCP_FMG_AD-7.6考試認證，如同通過其他世界知名認證，得到國際的承認及接受，FCP_FMG_AD-7.6考試認證也有其廣泛的IT認證，世界各地的人們都喜歡選擇FCP_FMG_AD-7.6考試認證，使自己的職業生涯更加強化與成功，在Fast2test，你可以選擇適合你學習能力的產品。

最新的 Fortinet Network Security Expert FCP_FMG_AD-7.6 免費考試真題 (Q16-Q21):

問題 #16

Refer to the exhibits. An administrator needed to recover all the configurations related to the user, Support. The configurations were saved in configuration revision ID 9.

The administrator reverted the configuration using the Configuration Revision History window and received the CLI output shown in the exhibit.

What can you conclude from the CLI output?

- A. The administrator installed only the device-level configuration.
- B. The administrator needs to retrieve the device to correctly detect the FortiGate firmware version.
- C. The administrator reinstalled the policy package.
- D. The administrator set the flag to 0 to prevent configuration overrides.

答案: B

解題說明:

The CLI output shows the status "dev-db: not modified; conf: in sync; cond: OK; dnr installed," but the firmware version for the device is listed as "[unknown]." This indicates that FortiManager has not properly detected the FortiGate firmware version, likely because the device needs to be retrieved to update its information.

問題 #17

Refer to the exhibit. A junior administrator is troubleshooting a FortiManager connectivity issue that is occurring with a managed FortiGate device.

Given the FortiManager device manager settings shown in the exhibit, what can you conclude from this scenario?

- A. The administrator must refresh the device to restore connectivity.
- **B. The administrator recently restored a FortiManager configuration file.**
- C. The administrator can reclaim the FortiGate to FortiManager protocol (FGFM) tunnel to get the device online.
- D. FortiManager lost internet connectivity, therefore, the device appears to be down.

答案： B

解題說明：

FMG is in offline mode, which is activated after restoring a configuration file.

問題 #18

An administrator is copying a system template profile between ADOMs by running the following command:
execute fmpfile export-profile ADOM 3547 /tmp/Backup_File output dump to file: [/tmp/Backup_File] Where does this command export the system template profile from?

- A. FortiManager configuration backup file
- B. FortiManager /tmp/Backup_File folder
- C. ADOM device database
- **D. FortiManager ADOM policy database**

答案： D

解題說明：

The command exports the system template profile from the FortiManager ADOM policy database, which stores the configuration templates for devices within that ADOM.

問題 #19

You want to let multiple administrators work in the same ADOM without creating configuration conflicts.
What is the best and the most effective solution to apply?

- A. Assign administrators with JSON API access to the FortiManager.
- **B. Activate workspace mode in the ADOM settings.**
- C. Enable workflow mode, which is the only way to prevent concurrent configuration conflicts.
- D. Configure RADIUS authentication to assign ADOM roles to each user.

答案：B

解題說明：

Activating workspace mode in the ADOM settings allows multiple administrators to work concurrently in the same ADOM by isolating their configuration changes in separate workspaces, preventing conflicts and enabling effective collaboration.

問題 #20

Refer to the exhibit. Which two results occur if you run the script using the Device Database option? (Choose two.)

FortiManager script

Create New Script

0/225

Type: CLI Script

Run script on: Device Database

Validate on change: ☐

Validation device platform: FortiGate-VM64

Script details

Search...

```
1 config router prefix-list
2 edit public
3 config rule
4 edit 1
5 set prefix 0.0.0.0/0
6 set action permit
7 next
8 edit 2
9 set prefix 8.8.8.8/32
10 set action deny
11 end
```

Format CLI script Revert All Changes

Advanced Device Filters >

- A. The successful execution of a script on the Device Database creates a new revision history.
- B. The script history shows the successful installation of the script on the remote FortiGate.
- C. The device Config Status is tagged as Modified.
- D. The administrator must install these changes on a managed device using the Install Wizard.

答案：C,D

解題說明：

Running a script on the Device Database marks the configuration as modified but does not immediately apply changes to the device. The administrator must use the Install Wizard to push and install these changes from the Device Database onto the managed device.

問題 #21

.....

很多考生都是因為 Fortinet FCP_FMG_AD-7.6 考試失敗了，對任何考試都提不起任何興趣，專業從事最新 Fortinet FCP_FMG_AD-7.6 認證考題編定的 FCP_FMG_AD-7.6 考題幫助很多考生擺脫 FCP_FMG_AD-7.6 考試不能順利過關的挫敗心理。FCP_FMG_AD-7.6 擬真試題已經被很多考生使用，並且得到了眾多的好評。因為該考題具備了覆蓋率很高，能夠消除考生對考試的疑慮；貼心服務，讓考生安心輕鬆通過考試，責任心強，把考生通過考試當作自己的事情來對待！
