

# Salesforce-MuleSoft-Developer-I Premium Exam - Salesforce-MuleSoft-Developer-I Online Training

What's more, part of that DumpsMaterials Salesforce-MuleSoft-Developer-I dumps now are free: [https://drive.google.com/open?id=1OGFCRwF6ugb4MHZoASlfDndhrR44jo\\_y](https://drive.google.com/open?id=1OGFCRwF6ugb4MHZoASlfDndhrR44jo_y)

If you want to improve yourself and make progress, if you are not satisfied with your present job, if you are still staying up for the Salesforce-MuleSoft-Developer-I exam day and night, please use our Salesforce-MuleSoft-Developer-I study materials. For with the high pass rate as 98% to 100%, we are confident to claim that our high quality and high efficiency of our Salesforce-MuleSoft-Developer-I Exam Torrent is unparalleled in the market. We provide the latest and exact Salesforce-MuleSoft-Developer-I exam quiz to our customers and you will be grateful if you choose our exam torrent and gain what you are expecting in the shortest time.

## Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Using Connectors: It focuses on retrieving data from REST services using HTTP Request or REST Connector. Moreover, the topic covers using a Web Service Consumer connector for SOAP web services and the Transform Message component.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.</li> </ul>

## Salesforce-MuleSoft-Developer-I Online Training | Salesforce-MuleSoft-Developer-I Latest Study Notes

With the development of the times, civilization is in progress, as well as DumpsMaterials. In order to help you get the Salesforce-MuleSoft-Developer-I exam certification to own a bright future as soon as possible, and you can get well-paid, DumpsMaterials has always been working hard. With efforts for years, the passing rate of DumpsMaterials Salesforce-MuleSoft-Developer-I Certification Exam has reached as high as 100%. Choose DumpsMaterials is to choose success

### Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q223-Q228):

#### NEW QUESTION # 223

Refer to the exhibits.

The diagram shows a flow named 'logFirst' starting with a 'Scheduler' component, followed by a 'Set Variable' component, and then a 'Logger' component. The 'Set Variable' component is configured with the variable 'customer' and the value '{first: "Max", last: "Mule"}'. The 'Logger' component is configured with the message attribute 'first'. Below the diagram, the XML code for the flow is shown:

```
<flow name="logFirst" >
  <scheduler doc:name="Scheduler" >
    <scheduling-strategy>
      <fixed-frequency frequency="30" timeUnit="SECONDS"/>
    </scheduling-strategy>
  </scheduler>
  <set-variable value="#[{{first: "Max", last: "Mule"}}]"
    doc:name='customer = {first: "Max", last: "Mule"}' variableName="customer"/>
  <logger level="INFO" doc:name="first" message='
    </flow>
```

The Set Variable transformer is set with value #[ [ first "Max" last "Mule" ] ].

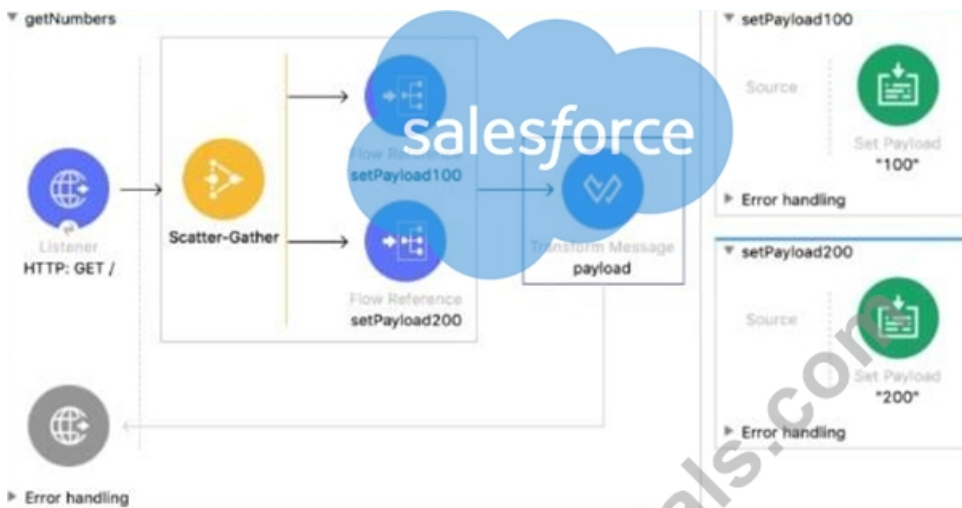

What is a valid DataWeave expression to set as the message attribute of the Logger to access the value "Max" from the Mule event?

- A. vars "customer first"
- B. customer first
- C. vars "customer" "first"
- D. "customer first"

Answer: C

#### NEW QUESTION # 224

Refer to the exhibits.

```
<flow name="getNumbers" >
  <http:listener doc:name="HTTP: GET /" config-ref="HTTP_Listener_config" path="/" />
  <scatter-gather doc:name="Scatter-Gather" >
    <route >
      <flow-ref doc:name='setPayload100' name='setPayload100' />
    </route>
    <route >
      <flow-ref doc:name="setPayload200" name="setPayload200" />
    </route>
  </scatter-gather>
  <ee:transform doc:name="payload">
    <ee:message >
      <ee:set-payload ><![CDATA[%dw 2.0
        output application/json
        ---
        payload]]></ee:set-payload>
    </ee:message>
  </ee:transform>
</flow>
```

Each route in the Scatter-Gather sets the payload to the number shown in the label. What response is returned to a web client request to the HTTP Listener?

**["100", "200"]**

• A.

```
{
  "attributes": ...,
  "payload": "100"
},
{
  "attributes": ...,
  "payload": "200"
}
]
```

• B.

```
{
  "0": "100",
  "1": "200"
}
```

• C.

```

{
  "0": {
    "attributes": ...,
    "payload": "100"
  },
  "1": {
    "attributes": ...,
    "payload": "200"
  }
}

```

- D.

**Answer: D**

Explanation:

Correct answer is as below.

After all processing routes have finished execution, the Scatter-Gather component creates a new Mule event that combines all resulting Mule events from each route, and then passes the new Mule event to the next component in the flow.

```

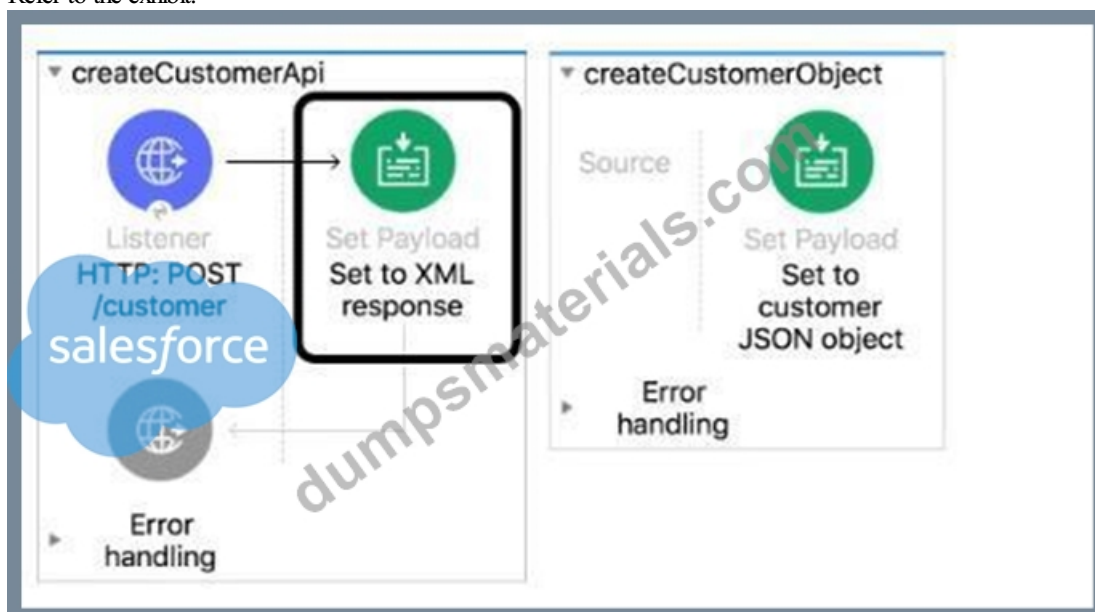

{
  "0": {
    "attributes": ...,
    "payload": "100"
  },
  "1": {
    "attributes": ...,
    "payload": "200"
  }
}

```

Bottom of Form

## NEW QUESTION # 225

Refer to the exhibit.

What is the correct DataWeave expression for the Set Payload transformer to call the createCustomerObject flow with values for the first and last names of a new customer?

- A. createCustomerObject( { first: "Alice", last: "Green" } > )

- B. createCustomerObject( "Alice", "Green")
- C. lookup("createCustomerObject", { first: "Alice", last: "Green" } > )
- D. lookupC createCustomerObJect( "Alice", "Green- ) )

**Answer: C**

Explanation:

lookup(String,Any, Number)

This function enables you to execute a flow within a Mule app and retrieve the resulting payload.

It works in Mule apps that are running on Mule Runtime version 4.1.4 and later.

Similar to the Flow Reference component (recommended), the lookup function enables you to execute another flow within your app and to retrieve the resulting payload. It takes the flow's name and an input payload as parameters. For example, lookup("anotherFlow", payload) executes a flow named anotherFlow.

Correct answer is

lookup( "createCustomerObject", {first: "Aice, last: "Green"} )

MuleSoft Documentation Reference : <https://docs.mulesoft.com/mule-runtime/4.3/dw-mule-functions-lookup>

## NEW QUESTION # 226

Refer to the exhibit.

The main flow contains a Flow Reference for the child flow.

What values are accessible in the child flow after a web client submits a request to <http://localhost:8081/order?color=red>?

- A. payload  
quantity var color query param
- B. payload  
quantity var
- C. payload  
color query param
- D. payload

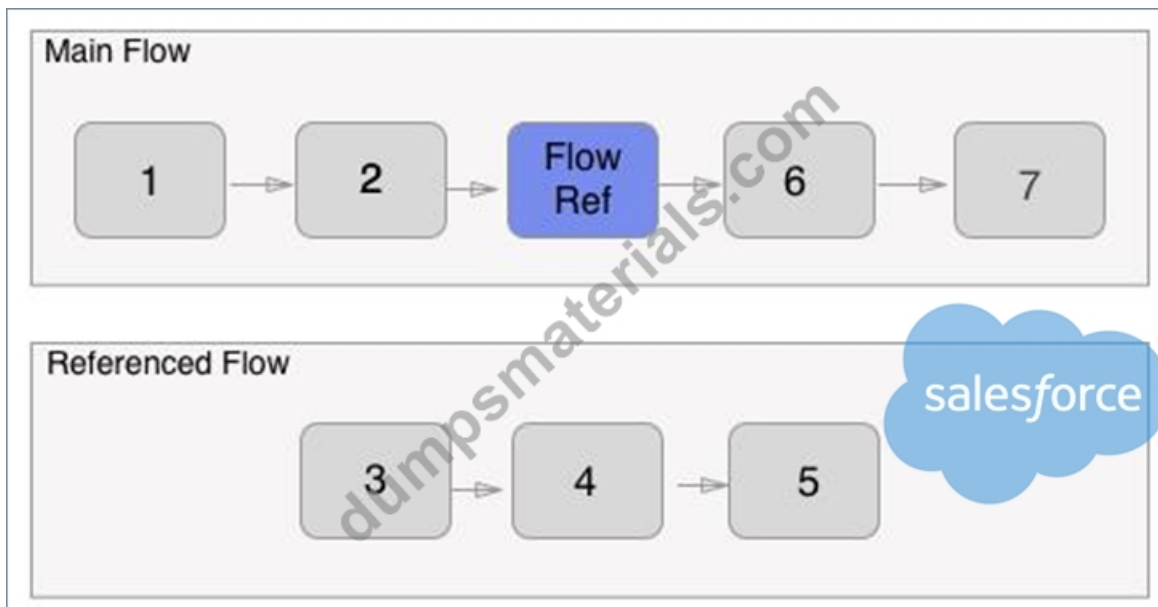

**Answer: A**

Explanation:

Flow Reference Component

Flow Reference routes the Mule event to another flow or subflow, executes all processors in the referenced flow, and then routes the event back within the same Mule application. The following diagram shows the order of processing when one flow references another:

When the main flow is triggered, the Mule event travels through and executes the flow until the event reaches the Flow Reference. The event then travels through and executes the referenced flow from beginning to end, and then returns to the main flow.

This process enables you to treat the entire referenced flow like a single component in your current flow.

Mule Ref Doc : <https://docs.mulesoft.com/mule-runtime/4.3/flowref-about> Correct answer is payload quantity var color query param

#### NEW QUESTION # 227

Refer to the exhibits. A web client submits a request to `http://localhost:8081/flights?destination=SFO` and the Web Service Consumer throws a `WSC:BAD_REQUEST` error.

What is the next step to fix this error?

```

Message parameters.      : Cannot build default body request for operation [findFlight], the operation requires input
Error type                : WSC:BAD_REQUEST
Element                   : 10.02.06-soaperrorFlow/processors/0 @ 10.02.06-soaperror:10.02.06-soaperror.xml:21 (Consume)
Element XML               : <wsc:consume doc:name="Consume" doc:id="10.02.06-soaperror:10.02.06-soaperror.xml:21" config-
ref="Web_Service_Consumer_Config" operation="findFlight"></wsc:consume>

(set debug level logging or '-Dmule.verbose.exceptions=true' for everything)

```

- A. set a SOAP payload before the Consume operation that contains the destination query parameter
- B. set a JSON payload before the Consume operation that contains the destination query parameter
- C. set a property in the Consume operation equal to the destination query parameter
- D. Set a header in the Consume operation equal to the destination query parameter

**Answer: A**

**Explanation:**

As can be seen in error message, SOAP service findFlights expects the SOAP payload. This can be set using transform message processor which forms SOAP payload before the Consume operation that contains the destination query parameter

## NEW QUESTION # 228

.....

Research indicates that the success of our highly-praised Salesforce-MuleSoft-Developer-I test questions owes to our endless efforts for the easily operated practice system. With the latest Salesforce-MuleSoft-Developer-I test questions, you can have a good experience in practicing the test. Moreover, you have no need to worry about the price, we provide free updating for one year and half price for further partnerships, which is really a big sale in this field. After your payment, we will send the updated Salesforce-MuleSoft-Developer-I Exam to you immediately and if you have any question about updating, please leave us a message.
