Most effective these exam dumps are routinely updated with usually precise and most current material by profoundly talented authorities, that have obtained authentication in their absolute very first attempt. Whenever you get your hands around the most current exam dumps preparation supply, then, at that point, you don't need to pressure over alluding to distinctive sources. These correct exam dumps pdf cover just about every single prospectus of this exam. You must merely concentrate on these exam questions cautiously and comprehend them well.

Using the assistance with the exam dumps you can quickly release your stress more than your exam readiness due to the deficiency. Prepare on time and get genuine exam dumps for efficient preparation. Get the additional weight due to the fact of it, you can get the itemized this exam questions connected along with your affirmation. These precise exams supply you using a belief of how to plan for the exam successfully. The genuine exams intended for operating on the expert abilities of the contender for the exam certification dumps who want to be able to cope with just about every one of the concerns impeccably.

Get prepared by means of the updated exam, you find out using the most current innovations, and any time you program by the most recent exam dumps 2022, you comprehend its significance and also the advantages in the executions. The part of the veritable exam dumps is coordinated appropriately by the endeavors of our topic matter experts. Carve out opportunities to perform it appropriately and afterward, you receive the greatest outcomes in your exam conclusion. Make your preparation in advance by taking the exam dumps.

Choose the major excellent exam dumps for the preparation of the exam which are checked by the exam dumps. The greatest exam questions and answers are finished by the precise exam dumps that happen to be in your schedule. Get ready with a compelling exam dumps pdf then you definitely will truly like to answer 90% from the exam certification dumps ideal. The fundamentals of the certified exam are investigated by professionals, so our refreshed exam questions will construct your capacity of inventiveness.

Esri Enterprise Administration Professional 2201 認定 EAEP2201 試験問題 (Q25-Q30):

質問 # 25

A new user is added to the organization and can see roads, building footprints, parcels, and traffic data shared with them in Portal for ArcGIS. However, the user cannot use analysis tools in the portal, even though the SpatialAnalysisTools service is verified to be running.

What is causing this issue?

- A. The service needs to be published as a hosted layer
- B. SpatialAnalysisTools needs to be restarted
- **C. The hosting server has not been configured**
- D. The new user is a Creator user type

正解: C

解説:

Even if the SpatialAnalysisTools geoprocessing service is running, analysis tools in Portal for ArcGIS will not be available unless a hosting server is configured. The hosting server provides the portal with required processing capabilities, including the ability to create hosted feature layers and perform spatial analysis.

From ArcGIS documentation:

"Portal for ArcGIS requires a hosting server to run analysis tools and publish hosted feature layers. Without a hosting server, the analysis tools will be unavailable, even if the geoprocessing services are running."

* Option A is incorrect: the Creator user type does support spatial analysis, assuming privileges are assigned.

* Option C is a distraction; the service is already confirmed running.

質問 # 26

An organization must publish hosted feature layers and hosted scene layers to its ArcGIS Enterprise portal.

The GIS administrator takes the following steps to enable this functionality:

* Federates a GIS Server with the portal

* Registers an ArcGIS Data Store relational data store with the GIS Server Which action should the administrator perform next?

- A. Publish a hosted feature layer to test the deployment's functionality
- B. Register an ArcGIS Data Store tile cache data store with the GIS Server
- **C. Set the GIS Server as the hosting server in the ArcGIS Enterprise portal**

正解: C

解説:

After federating a GIS Server with the portal and registering a relational data store, the next step is to designate the GIS Server as the hosting server in the ArcGIS Enterprise portal. This configuration enables the portal to support the publishing of hosted feature layers and hosted scene layers. The hosting server must have both a relational data store and a tile cache data store configured to support these functionalities.

質問 # 27

An organization is considering deploying ArcGIS Enterprise. A needs assessment shows that all users need access to the following applications and capabilities:

* ArcGIS Pro

* ArcGIS StoryMaps

* View, edit and create portal content items

Which user type should be assigned for these users?

- A. Editor
- **B. GIS Professional**

- C. Creator

正解: B

解説:

To meet the listed requirements, the appropriate user type is GIS Professional. This user type includes:

- * Access to ArcGIS Pro (essential for desktop GIS work and analysis)
- * Full content management and sharing privileges in the portal
- * Use of premium apps like ArcGIS StoryMaps, Experience Builder, and others. The Creator user type provides access to web-based apps and content but does not include ArcGIS Pro without an additional add-on license. The Editor user type is limited to viewing and editing existing data and does not support app creation or use of ArcGIS Pro.

質問 # 28

A GIS administrator is publishing a feature service. All 2,400 features in the dataset must be able to be returned from a single request to the service.

Which action should the administrator perform?

- A. Enable cached drawing mode
- B. Adjust pooling to handle the request
- C. Use service defaults for publishing
- D. Increase the max record count

正解: D

解説:

By default, feature services limit the number of records returned in a single request (usually set to 1,000). To allow all 2,400 features to be returned in one call, the administrator needs to increase the "Maximum number of records returned by the server" (maxRecordCount) setting during or after publishing.

From the ArcGIS Server documentation:

"The maxRecordCount property defines the number of records returned by the server in a single request. To return all features, this value must be increased accordingly."

- * Option A (adjust pooling) relates to concurrency and scalability, not data retrieval limits.
- * Option C would keep the default setting of 1,000, which would not meet the requirement.
- * Option D relates to visual performance, not record retrieval.

質問 # 29

An organization expects a large influx of users who use the standard analysis tools in the portal Map Viewer. The organization is concerned with the hosting server's available resources.

Which system resource should be closely monitored?

- A. Network utilization
- B. CPU utilization
- C. Disk activity

正解: B

解説:

When users perform standard analysis tasks in the portal Map Viewer, the hosting server executes geoprocessing operations that are computationally intensive. These operations require significant CPU resources. Monitoring CPU utilization helps ensure that the server can handle the increased load without performance degradation.

While disk activity and network utilization are important, they are less directly impacted by standard analysis tasks compared to CPU usage. Therefore, CPU utilization is the primary resource to monitor in this scenario.
