NEW QUESTION # 41

You have assigned a budget to WBS elements within your project. What function can be used to check assigned values against the current budget

- A. Cost forecast
- B. Easy Cost Planning
- C. Results analysis
- D. Availability control

Answer: D

Explanation:

Availability control is a function that can be used to check assigned values against the current budget for WBS elements within your project. Availability control is a process that monitors whether budget overruns occur in your project and issues warnings or error messages if predefined tolerance limits are exceeded. You can activate availability control for individual WBS elements or for entire projects and define different tolerance limits for different types of costs or revenues. Reference:
