

Valid Dumps PL-400 Sheet & Certification Success Guaranteed, Easy Way of Training & Microsoft Microsoft Power Platform Developer

BTW, DOWNLOAD part of Itcertmaster PL-400 dumps from Cloud Storage: <https://drive.google.com/open?id=1rRBTJrhOJwtaMg8kkC4y9sqifEAcWbfo>

We know that it is hard to stay and study for the Microsoft Power Platform Developer (PL-400) exam dumps in one place for a long time. Therefore, you have the option to use Microsoft Power Platform Developer (PL-400) PDF questions anywhere and anytime. Itcertmaster Microsoft Power Platform Developer (PL-400) dumps are designed according to the Microsoft PL-400 Certification Exam standard and have hundreds of questions similar to the actual Microsoft Power Platform Developer (PL-400) exam. Itcertmaster Microsoft Power Platform Developer (PL-400) web-based practice exam software also works without installation.

Microsoft PL-400 Exam Syllabus Topics:

Section	Weight	Objectives
Develop integrations	10–15%	- Implement data integration and transformation • 1. Data conversion and synchronization • 2. Use Azure Logic Apps and Power Automate - Secure and monitor integrations - Integrate with external systems • 1. Connect to REST APIs and web services • 2. Use Microsoft Graph and Azure services

Create a technical design	10–15%	- Design technical architecture • 1. Assess security and DLP policy impact • 2. Analyze requirements and determine solution approach • 3. Design authentication and authorization strategy • 4. Evaluate out-of-the-box vs custom development - Design solution components • 1. Plan application lifecycle management (ALM) • 2. Design custom connectors and APIs • 3. Design business logic and automation • 4. Design data model and table structures
Extend the platform	30–35%	- Implement server-side logic • 1. Use Power Fx and plug-in development • 2. Handle data operations and transactions - Customize connectors and services • 1. Authenticate and secure service connections • 2. Build custom connectors - Develop Dataverse extensions • 1. Create and register plug-ins • 2. Develop custom APIs and virtual entities • 3. Implement Azure Functions and webhooks
Build Power Platform solutions	10–15%	- Configure Microsoft Dataverse • 1. Implement business rules, calculated and rollup fields • 2. Manage solutions and environment variables • 3. Configure security roles, teams, and access • 4. Create and configure tables, relationships, and fields - Implement ALM practices • 1. Manage solution dependencies and versions • 2. Deploy solutions across environments • 3. Create CI/CD pipelines with Build Tools
Extend the user experience	10–15%	- Use Power Apps Component Framework • 1. Integrate custom components into apps • 2. Build and deploy code components - Create custom visualizations - Implement custom client-side logic • 1. Use JavaScript and TypeScript • 2. Work with form events and client APIs

Implement Power Apps improvements	10–15%	- Enhance model-driven apps • 1. Configure command bar and event handlers • 2. Customize forms, views, and navigation • 3. Implement client-side scripting - Enhance canvas apps • 1. Use complex Power Fx formulas and functions • 2. Implement advanced controls and component libraries • 3. Optimize performance and resolve delegation issues

PL-400 Valid Test Vce | PL-400 Downloadable PDF

In order to make you confirm the quality of our PL-400 Dumps and let you know whether the dumps suit you, pdf and software version in Itcertmaster exam dumps can let you download the free part of our PL-400 training materials. We will offer free the part of questions and answers for you and you can visit Itcertmaster.com to search for and download these certification training materials. You cannot buy the dumps until you experience it so that you can avoid buying ignorantly the exam dumps without fully understanding the quality of questions and answers.

Microsoft Power Platform Developer Sample Questions (Q364-Q369):

NEW QUESTION # 364

You need to implement a reusable solution to encapsulate the parameterized Dataverse queries.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

- 1 - Create a real-time workflow that uses a custom workflow activity to perform..
- 2 - Run the real-time workflow by using the Dataverse connector.
- 3 - Run the custom process action by using the Dataverse connector.

NEW QUESTION # 365

You are researching integrations with several external systems.

Each integration has different requirements.

You need to determine which data sources to use to meet each requirement.

What should you use? To answer, drag the appropriate data sources to the correct requirements. Each data source may be used once, more than one, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects	Requirement	Object
Virtual entity	Support records that use an integer as a primary key.	
Custom connector	Ensure that data can be read and updated.	
	Ensure that data is available to all Common Data Service clients.	

Answer:

Explanation:

Objects	Requirement	Object
Virtual entity	Support records that use an integer as a primary key.	Virtual entity
Custom connector	Ensure that data can be read and updated.	Custom connector
	Ensure that data is available to all Common Data Service clients.	Virtual entity

Explanation

A. Answer is: Virtual Entity

You cannot change the Entity primaryid field to some other field. CRM using GUID as the Primary key for each record.

If you definitely want to make some other field as Primary key, you could consider using Alternate Keys.

Source:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/developer/define-alternate-key> The caveat being that Alternate Keys can be created for Virtual Entity

B. Answer is: Custom Connector

All virtual entities are read-only.

Source:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/create-edit-virtual-e>

C. Answer is: Virtual Entity

Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

Source: <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-virtual-entities>

NEW QUESTION # 366

A company is creating a Power Apps portal to collaborate with vendors.

You need to implement custom functionality in the portal by using JavaScript code.

Which two portal entities can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Web resources
- B. Web pages
- C. Webforms
- D. Entity lists

Answer: C,D

Explanation:

Explanation

C: The Web Form Step record contains a field named Custom.Javascript that can be used to store JavaScript code to allow you to extend or modify the form's visual display or function.

D: You can add custom Javascripts to Entity lists.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/add-custom-javascript>

<https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/entity-lists#add-custom-javascript>

NEW QUESTION # 367

You are developing a Power Platform solution. You plan to add three buttons to a form. The buttons have the following requirements:

Button	Requirement
Button1	Add the current date and time to the form when the button is selected.
Button2	Apply conditional logic to change the form color based on the option selected in the Title field.
Button3	Ensure that the word Emergency is entered as "Emergency".

You need to complete each button's action.

Which commands should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Button	Command
Button1	Today() only Now() only Today() or Now()
Button2	Switch () only IF () only Switch() or IF()
Button3	IsMatch(TextInput1.Text, "emergency", Contains) IsMatch(TextInput1.Text, "emergency", Contains & IgnoreCase) IsMatch(TextInput1.Text, "emergency", Contains) or IsMatch(TextInput1.Text, "emergency", Contains & IgnoreCase)

Answer:

Explanation:

Button	Command
Button1	Today() only Now() only Today() or Now()
Button2	Switch () only IF () only Switch() or IF()
Button3	IsMatch(TextInput1.Text, "emergency", Contains) IsMatch(TextInput1.Text, "emergency", Contains & IgnoreCase) IsMatch(TextInput1.Text, "emergency", Contains) or IsMatch(TextInput1.Text, "emergency", Contains & IgnoreCase)

NEW QUESTION # 368

You are creating an input control to format telephone numbers for a canvas app.

The control must be reusable in other canvas apps inside your company. Any updates must be able to be applied without editing the control in each canvas app.

You need to create the control.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Control creation steps	Answer Area
⋮ Publish the canvas app. ⋮ Create the control on a canvas app screen. ⋮ Create a blank canvas app. ⋮ Create the control as a canvas app component. ⋮ Publish all customizations.	

Answer:

Explanation:

Control creation steps	Answer Area
⋮ Publish the canvas app. ⋮ Create the control on a canvas app screen. ⋮ Create a blank canvas app. ⋮ Create the control as a canvas app component. ⋮ Publish all customizations.	⋮ Create a blank canvas app. ⋮ Create the control as a canvas app component. ⋮ Publish all customizations.

Explanation:

Control creation steps	Answer Area
⋮ Publish the canvas app. ⋮ Create the control on a canvas app screen.	1 ⋮ Create a blank canvas app. 2 ⋮ Create the control as a canvas app component. 3 ⋮ Publish all customizations.

NEW QUESTION # 369

.....

Our PL-400 study materials are willing to stand by your side and provide attentive service, and to meet the majority of customers, we sincerely recommend our study materials to all customers, for our rich experience and excellent service are more than you can imagine. There are a lot of advantages of PL-400 training guide for your reference. And there are three versions of different PL-400 exam questions for you to choose: the PDF, Soft and APP online. You can free download the demos to decide which one to choose.
