compliance management, which is increasingly important in today's business environment.

Microsoft Information Protection Administrator Sample Questions (Q334-Q339):

NEW QUESTION # 334

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You implement Microsoft 365 Endpoint data loss prevention (Endpoint DLP).

You have computers that run Windows 10 and have Microsoft 365 Apps installed. The computers are joined to Azure Active Directory (Azure AD).

You need to ensure that Endpoint DLP policies can protect content on the computers.

Solution: You onboard the computers to Microsoft Defender for Endpoint.

Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:

Explanation/Reference:

NEW QUESTION # 335

You have a Microsoft 365 subscription that contains a user named User1.

You need to assign User1 permissions to search Microsoft Office 365 audit logs.

What should you use?

- A. the Microsoft 365 Defender portal
- B. the Azure Active Directory admin center
- C. the Microsoft Purview compliance portal
- D. the Exchange admin center

Answer: D

NEW QUESTION # 336

Your company manufactures parts that are each assigned a unique 12-character alphanumeric serial number.

Emails between the company and its customers refer in the serial number.

You need to ensure that all Microsoft Exchange Online emails containing the serial numbers are retained for five years.

Which three objects should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a sensitivity label
- B. a trainable classifier
- C. a retention policy
- D. a retention label
- E. a sensitive info type
- F. a data loss prevention (DLP) policy
- G. an auto-labeling policy

Answer: D,E,G

NEW QUESTION # 337

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant and 500 computers that run Windows 10. The computers are onboarded to the Microsoft 365 compliance center.

You discover that a third-party application named Tailspin_scanner.exe accessed protected sensitive information on multiple computers. Tailspin_scanner.exe is installed locally on the computers.

You need to block Tailspin_scanner.exe from accessing sensitive documents without preventing the application from accessing other documents.

Solution: From the Cloud App Security portal, you mark the application as Unsanctioned.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

You can unsanction a specific risky app by clicking the three dots at the end of the row. Then select Unsanction. Unsanctioning an app doesn't block use, but enables you to more easily monitor its use with the Cloud Discovery filters. You can then notify users of the unsanctioned app and suggest an alternative safe app for their use.

NEW QUESTION # 338

You need to implement a solution that meets the compliance requirements for the Windows 10 computers.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each coned selection is worth one point.

- A. Enroll the computers in Microsoft Defender for Endpoint protection.
- B. Configure hybrid Azure AD join for all the computers.
- C. Configure a compliance policy in Microsoft Intune.
- D. Configure the Microsoft Intune device enrollment settings.
- E. Deploy a Microsoft 365 Endpoint data loss prevention (Endpoint DLP) configuration package to the computers.

Answer: A,C
