

Buy FreeDumps Cisco 500-220 Exam Dumps With Free Updates

P.S. Free 2026 Cisco 500-220 dumps are available on Google Drive shared by FreeDumps: <https://drive.google.com/open?id=1994AHLPYKkhMnmc-opHi8CjmyVZuTpjp>

Once you start to become diligent and persistent, you will be filled with enthusiasms. Nothing can defeat you as long as you are optimistic. We sincerely hope that our 500-220 study materials can become your new purpose. Our 500-220 Exam Questions can teach you much practical knowledge, which is beneficial to your career development. And with the 500-220 certification, you are bound to have a brighter future.

Cisco 500-220 Exam Overview:

Certification Vendor:	Cisco
Exam Name:	Engineering Cisco Meraki Solutions (ECMS) Exam
Exam Number:	500-220
Available Languages:	English
Exam Duration:	90 minutes
Certificate Validity Period:	3 years
Passing Score:	Not publicly disclosed
Real Exam Qty:	55–65 (approx.)
Exam Format:	Multiple choice, Multiple response
Exam Price:	USD 300 (varies by region)
Related Certifications:	Cisco Meraki Solutions Specialist Cisco Enterprise Networking certifications
Recommended Training:	Cisco Meraki Learning Resources Cisco Meraki Documentation and Training
Exam Registration:	Pearson VUE Cisco Exams Cisco Certification Exam Registration
Sample Questions:	Cisco 500-220 Sample Questions
Exam Way:	Online proctored or Pearson VUE test center
Pre Condition:	No formal prerequisites required, but 3–5 years of networking experience and familiarity with Cisco Meraki solutions is recommended.
Official Syllabus URL:	https://www.cisco.com/site/us/en/learn/training-certifications/exams/500-220.html

Interesting Facts that Help you Crack the Tough Cisco 500-220 Exam

The FreeDumps is committed to making the entire Engineering Cisco Meraki Solutions (500-220) exam preparation journey simple, smart, and successful. To achieve this objective the FreeDumps is offering the top-rated and updated Engineering Cisco Meraki Solutions (500-220) exam practice test questions in three different formats. These formats are Cisco 500-220 web-based practice test software, desktop practice test software, and PDF dumps files.

Cisco 500-220 Certification is a valuable asset for IT professionals who want to specialize in Meraki technology. Engineering Cisco Meraki Solutions certification demonstrates that the candidate has the knowledge and skills to deploy and manage Meraki solutions efficiently. It also helps businesses to identify professionals who can provide reliable and secure networking solutions using the Cisco Meraki platform. Overall, this certification is an excellent way for IT professionals to enhance their career prospects and stay updated with the latest networking technologies.

Cisco Engineering Cisco Meraki Solutions Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which Radio Frequency (RF) Profile setting is typically used to decrease the Service Set Identifier (SSID) overhead, exclude legacy clients, and promote more efficient client roaming?

- A. Transmit power range
- B. Band selection
- **C. Minimum bitrate**
- D. Channel width

Answer: C

Explanation:

A). Minimum bitrate is correct. Cisco Meraki RF Profiles allow administrators to define the minimum data rate that clients must support. Raising this minimum rate provides all three effects described in the question.

First, management and broadcast frames are transmitted using an appropriate basic rate. Eliminating very low legacy rates reduces the amount of airtime consumed by frames such as beacons, thereby decreasing SSID- related RF overhead. Second, Cisco specifically states that selecting a minimum bitrate of 12 Mbps or greater prevents 802.11b clients from associating , effectively removing inefficient legacy clients from the WLAN.

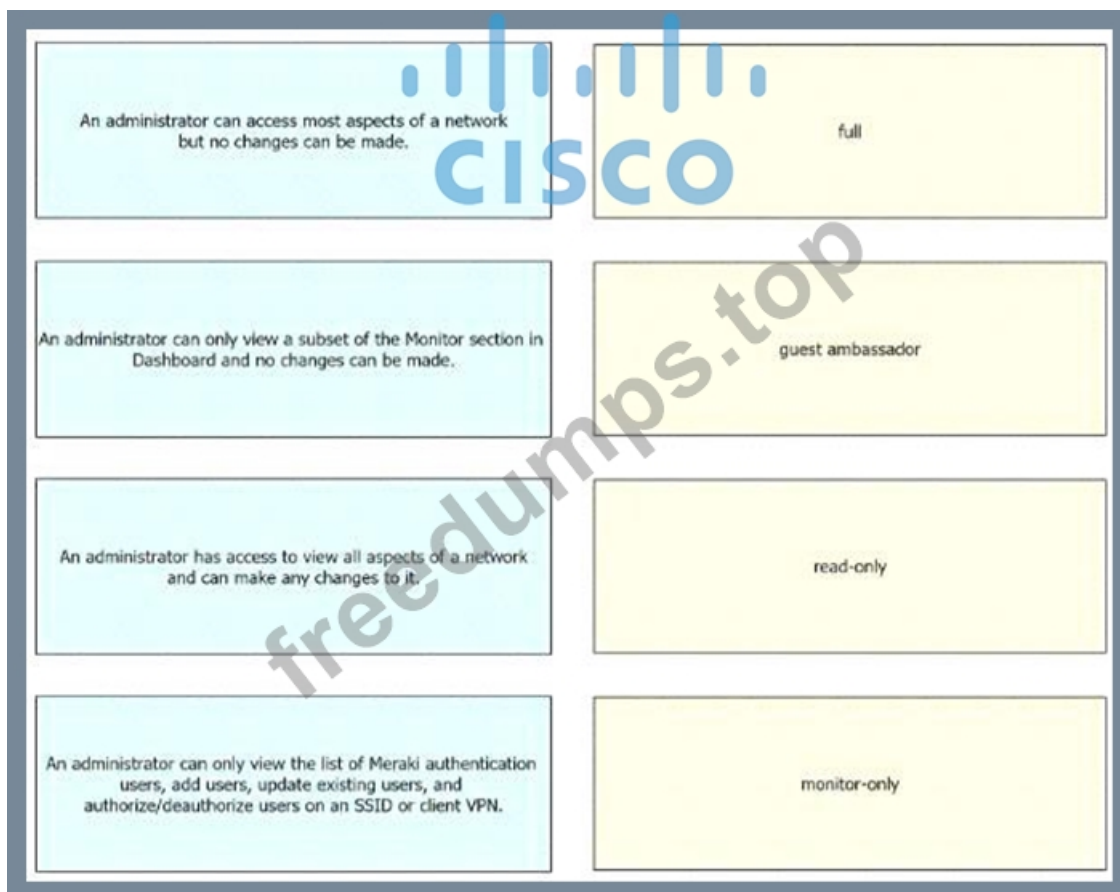

Third, increasing the minimum bitrate can improve roaming behavior. Clients near the edge of a cell must maintain the configured minimum data rate; when signal quality becomes inadequate, the usable cell boundary effectively becomes smaller, encouraging clients to transition toward a better AP rather than remaining associated at extremely low rates.

B). Channel width primarily controls spectrum utilization and potential PHY throughput. C. Band selection determines permitted/preferred frequency bands but does not directly eliminate low data rates. D. Transmit power range influences coverage and cell size but does not directly eliminate legacy data rates or reduce management-frame airtime in the manner described.

Which IDS/IPS mode is the MX Security Appliance configured for?

- A. prevention
- B. blocking
- C. quarantine
- D. detection

Answer: A

Explanation:

Explanation

You can enable intrusion prevention by setting the Mode drop-down to Prevention under Security & SD-WAN

> Configure > Threat protection > Intrusion detection and prevention. Traffic will be automatically blocked by best effort if it is detected as malicious based on the detection ruleset specified above.

NEW QUESTION # 24

Drag and drop the settings from the left onto the OS system or systems that support it on the right Settings can be used more than once.

Answer:

Explanation:

Explanation:

IOS:

- * Kiosk mode
- * Single App mode
- * Wallpaper
- * Cisco Security Connector
- * Active Sync

Android:

- * Kiosk mode
- * Backpack
- * Wallpaper
- * Active Sync

This question is related to the topic of System Manager: Getting Started in the Cisco Meraki documentation. You can find more information about this topic in the [System Manager: Getting Started] article or the [System Manager Overview] page. https://documentation.meraki.com/SM/Profiles_and_Settings/Configuration_Settings_Payloads

NEW QUESTION # 25

Which two Systems Manager Live tools are available only for Apple Macs and Windows PCs and cannot be used on iOS or Android mobile devices? (Choose two.)

- A. Screenshot
- B. Send notification
- C. Remote Desktop
- D. OS updates
- E. Selective wipe

Answer: C,E
