問題 #107

What is NOT a good Definition of Done (DoD)?

- A. Code is checked in and merged into main branch.
- **B. The Customer is satisfied with the User Experience.**
- C. All unit tests are passing.
- D. Coding standards have been followed.
- E. No must-fix defects exist.
- F. Nonfunctional Requirements are met.

答案: B

解題說明:

A good Definition of Done (DoD) is a clear, objective, and verifiable set of criteria that must be met for a backlog item to be considered complete. "The Customer is satisfied with the User Experience" is subjective and cannot be objectively or consistently verified during iteration acceptance. All other options are concrete, testable, and objective.

"Definition of Done is a list of criteria that must be met before a product increment is considered complete.

These criteria must be objective, unambiguous, and easily verified."

Which of the following is a Lean Thinking Principle?

- A. Deliver working software frequently
- B. Agile processes promote sustainable development
- C. Simplicity is essential
- D. Identify the Value Stream for each product

答案： D

解題說明：

"Identify the Value Stream for each product" is directly referenced as one of the Lean Thinking Principles in SAFe. This principle comes from Lean and underpins the SAFe emphasis on organizing around value and optimizing the flow from concept to delivery. The other choices are derived from Agile Manifesto principles, not Lean Thinking.

Which SAFe Principle advocates flexible designs to support changing requirements?

- A. Build incrementally with fast, integrated learning cycles
- B. Apply systems thinking
- C. Assume variability; preserve options
- D. Decentralize decision-making

答案： C

解題說明：

SAFe Principle #3 is "Assume variability; preserve options." This principle encourages organizations to maintain multiple requirements and design options for a longer period in the development cycle, enabling them to respond to changing needs with flexible designs. This mitigates risk and increases the chance of finding optimal solutions.
