Different from other similar education platforms, the AI-900 study materials will allocate materials for multi-plate distribution, rather than random accumulation without classification. How users improve their learning efficiency is greatly influenced by the scientific and rational design and layout of the learning platform. The AI-900 study materials are absorbed in the advantages of the traditional learning platform and realize their shortcomings, so as to develop the AI-900 Study Materials more suitable for users of various cultural levels. If just only one or two plates, the user will inevitably be tired in the process of learning on the memory and visual fatigue, and the AI-900 study materials provided many study parts of the plates is good enough to arouse the enthusiasm of the user, allow the user to keep attention of highly concentrated.

### Microsoft Azure AI Fundamentals Sample Questions (Q308-Q313):

#### NEW QUESTION # 308

You have the Predicted vs. True chart shown in the following exhibit.

Which type of model is the chart used to evaluate?

- A. clustering
- **B. regression**
- C. classification

**Answer: B**

Explanation:

What is a Predicted vs. True chart?

Predicted vs. True shows the relationship between a predicted value and its correlating true value for a regression problem. This graph can be used to measure performance of a model as the closer to the  $y=x$  line the predicted values are, the better the accuracy of a predictive model.

Creating a language understanding application with Language Understanding consists of two main tasks. First you must define entities, intents, and utterances with which to train the language model - referred to as authoring the model. Then you must publish the model so that client applications can use it for intent and entity prediction based on user input.
