If you don't have enough time to study for your certification exam, TopExamCollection provides Certified Pega Lead System Architecture (LSA) Exam 23 PEGACPLSA23V1 PDF Questions. You may quickly download Certified Pega Lead System Architecture (LSA) Exam 23 PEGACPLSA23V1 exam questions in PDF format on your smartphone, tablet, or desktop. You can Print Pegasystems pdf questions and answers on paper and make them portable so you can study on your own time and carry them wherever you go.

Being the most competitive and advantageous company in the market, our PEGACPLSA23V1 practice quiz have help tens of millions of exam candidates realize their dreams all these years. If you are the dream-catcher, we are willing to offer help with our PEGACPLSA23V1 Study Guide like always. And if you buy our PEGACPLSA23V1 exam materials, then you will find that passing the exam is just a piece of cake in front of you.

>> New PEGACPLSA23V1 Test Tutorial <<

100% Pass Quiz Pegasystems - PEGACPLSA23V1 - Accurate New Certified Pega Lead System Architecture (LSA) Exam 23 Test Tutorial

With the Pegasystems PEGACPLSA23V1 certification exam you will get an opportunity to learn new and in-demand skills. In this way, you will stay updated and competitive in the market and advance your career easily. To do this you just need to pass the Certified Pega Lead System Architecture (LSA) Exam 23 PEGACPLSA23V1 Certification Exam.

Pegasystems Certified Pega Lead System Architecture (LSA) Exam 23 Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which one of the following items does the system store and distribute from the Docker registry?

- A. Libraries
- B. Files
- C. Docker images
- D. Codes

Answer: C

NEW QUESTION # 20

Dynamic class references (DCR) are one approach to creating a data model in a Pega implementation. Which one of the following best describes the DCR approach?

- A. Linking different classes together in a data model to establish relationships and associations between various entities.
- B. Associating objects with classes at runtime based on user input or certain conditions, allowing for flexibility in the structure of the data model.
- C. Dynamically adjusting the attributes of a class without modifying its structure, facilitating agile data management.
- D. Referencing classes that are predefined and unchangeable, ensuring consistency and reliability in the data model.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Dynamic Class Referencing (DCR) in Pega allows objects to be associated with different classes at runtime based on specific conditions or user inputs, providing flexibility in data modeling. As outlined in Pega Academy's Data Modeling Mission and the Pega Certified Lead System Architect Study Guide, DCR is particularly useful in scenarios requiring adaptive data structures, such as handling varying case types or data objects dynamically.

* Option A (Correct): DCR enables associating objects with classes at runtime based on user input or conditions, offering flexibility in the data model. For example, a case type might resolve to different classes (e.g., Insurance-Claim-Auto or Insurance-Claim-Home) depending on the claim type selected.

This aligns with Pega's documentation on DCR in the Data Modeling module, which emphasizes runtime adaptability.

* Option B (Incorrect): Linking classes to establish relationships is a function of class inheritance or data relationships (e.g., data references), not DCR. DCR focuses on runtime class assignment, not static relationships, as clarified in the Class Design module.

* Option C (Incorrect): Dynamically adjusting attributes without modifying class structure refers to property-level configurations or dynamic layouts, not DCR. DCR involves changing the class of an object, not its attributes, per Pega's Data Modeling Mission.

* Option D (Incorrect): DCR does not involve predefined, unchangeable classes. Instead, it allows dynamic class selection, contrasting with static class definitions. This is explicitly stated in the Dynamic Class Referencing section of Pega Community documentation.

:

Pega Academy: Data Modeling Mission (covers Dynamic Class Referencing).

Pega Community: Dynamic Class Referencing (details on runtime class assignment).

Pega Certified Lead System Architect Study Guide (v23): Section on Data Modeling (emphasizes flexible data models).

NEW QUESTION # 21

What are three benefits of using dependent role hierarchies? (Choose Three)

- A. Role hierarchies eliminate duplication of Access of Role to Objects (AROs) for application-specific access roles.
- B. Access role layering.
- C. Role hierarchies increase complexity with multiple access roles.
- D. No dependency if more than one access role configured.

- E. Reuse of Pega Platform application authorization.

Answer: A,B,E

NEW QUESTION # 22

Which two of the following routing activities leverage the @pickBalancedOperator() function?
(Choose Two)

- A. ToWorkGroup
- B. ToSkilledWorkbasket
- C. ToSkilledGroup
- D. ToLeveledGroup

Answer: C,D

NEW QUESTION # 23

Which of the following options is considered critical Assignment information that a flow uses to identify an Assignment? (Choose One)

- A. The size of the Assignment shape measured in millimeters.
- B. The run time of the Assignment shape in milliseconds.
- C. The Assignment shape name.
- D. The Assignment shape ID.

Answer: D

NEW QUESTION # 24

.....

We never give up the sustainable development, so we revamp our PEGACPLSA23V1 practice materials' versions constantly. Nowadays, the market softens because of oversupply, but the demand of our PEGACPLSA23V1 learning braindumps are increasing all the time. It is lucky our PEGACPLSA23V1 Guide prep offers tremendous knowledge for you, so look forward to cooperate fervently. And the service will last for a year long after your purchase for we provide free updates for one year long!
