Cisco 300-710 Valid Test Pattern | New 300-710 Exam Review

Whatever your professional, working towards a Securing Networks with Cisco Firepower 300-710 certification or designation takes a significant amount of effort and time. Once you have put all your effort, and investment and prepared well then you will be in a position to pass the Securing Networks with Cisco Firepower 300-710 Certification Exam. But once you get success in the Securing Networks with Cisco Firepower 300-710 test you'll be eligible to avail all the personal and professional benefits associated with Securing Networks with Cisco Firepower 300-710 certification.

Cisco 300-710 Certification Exam, also known as Securing Networks with Cisco Firepower, is an advanced-level certification exam that focuses on the knowledge and skills required to configure, deploy and manage Cisco Firepower Next-Generation Firewall (NGFW) solutions. Securing Networks with Cisco Firepower certification is designed for network security professionals who want to demonstrate their expertise in securing network infrastructures using Cisco Firepower technology.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q92-Q97):

NEW QUESTION # 92

What is a characteristic of bridge groups on a Cisco FTD?

- A. In routed firewall mode, routing between bridge groups is supported.
- B. In routed firewall mode, routing between bridge groups must pass through a routed interface.
- C. Routing between bridge groups is achieved only with a router-on-a-stick configuration on a connected router
- D. In transparent firewall mode, routing between bridge groups is supported

Answer: A

NEW QUESTION # 93

An engineer is tasked with configuring a custom intrusion rule on Cisco Secure Firewall Management Center to detect and block the malicious traffic pattern with specific payload containing string "|04 68 72 80 87 ff ed cq fg he qm pn|". Which action must the Engineer configure on the IPS policy?

- A. reset
- B. quarantine
- C. disable
- D. drop
- E. alert

Answer: D

NEW QUESTION # 94

Which two packet captures does the FTD LINA engine support? (Choose two.)

- A. application ID
- B. protocol
- C. Layer 7 network ID
- D. dynamic firewall importing
- E. source IP

Answer: B,E

NEW QUESTION # 95

An engineer must create an access control policy on a Cisco Secure Firewall Threat Defense device. The company has a contact center that utilizes VoIP heavily, and it is critical that this traffic is not impacted by performance issues after deploying the access control policy. Which access control action rule must be configured to handle the VoIP traffic?

- A. trust
- B. allow
- C. block
- D. monitor

Answer: A

Explanation:

To ensure that VoIP traffic in a contact center is not impacted by performance issues after deploying an access control policy on a Cisco Secure Firewall Threat Defense (FTD) device, the engineer should configure the access control rule with the "trust" action. The "trust" action allows traffic to bypass inspection and policy enforcement, ensuring that critical VoIP traffic is not delayed or degraded.

Steps:

In FMC, navigate to Policies > Access Control > Access Control Policy.

Create a new rule or edit an existing rule.

Set the source and destination for the VoIP traffic.

Set the action to "trust" to ensure the VoIP traffic is not inspected. By configuring the rule with the "trust" action, the VoIP traffic will be prioritized, maintaining the quality and performance required for the contact center operations.

NEW QUESTION # 96

An engineer configures a network discovery policy on Cisco FMC. Upon configuration, it is noticed that excessive and misleading events are filling the database and overloading the Cisco FMC. A monitored NAT device is executing multiple updates of its operating system in a short period of time. What configuration change must be made to alleviate this issue?

- A. Increase the number of entries on the NAT device.
- B. Change the method to TCP/SYN.
- C. **Exclude load balancers and NAT devices.**
- D. Leave default networks.

Answer: C
