NEW QUESTION # 138

Regarding career planning and placement services and counseling for young adults, career counselors have given the least attention to helping students be able to evaluate

- A. workplace structure.
- B. life goals.
- C. personal values.

Answer: A

Explanation:

Research has shown that career planning and placement services have focused more on individual career decision-making and less on helping students evaluate workplace structure (e.g., organizational culture, hierarchies, management styles). As a result, students may be less prepared to assess or adapt to different work environments after graduation.

NEW QUESTION # 139

Lucy, a preschooler, learns through play. She likes to build puzzles and cook with her mother. According to the psychosocial stages of development, Lucy is in which stage?

- A. initiative vs. guilt
- B. identity vs. role confusion
- C. trust vs. mistrust

Answer: A

Explanation:

According to Erik Erikson's psychosocial stages of development, the initiative vs. guilt stage occurs during the preschool years (ages 3-6). During this stage, children assert themselves more frequently through directing play and other social interaction. Learning through play, exploration, and engaging in activities such as building puzzles or cooking fits this stage. Children develop initiative when encouraged and supported in their efforts; if not, they may develop guilt over their needs and desires.
