

Updated UiPath-ADAv1 Practice Exams for Self-Assessment (Web-Based)

P.S. Free 2025 UiPath UiPath-ADAv1 dumps are available on Google Drive shared by ActualTorrent:
<https://drive.google.com/open?id=1mSbwfndHRUOGJHI2T1vkYNop552OhlQW>

Our UiPath-ADAv1 guide question dumps are suitable for all age groups. Even if you have no basic knowledge about the relevant knowledge, you still can pass the UiPath-ADAv1 exam. We sincerely encourage you to challenge yourself as long as you have the determination to study new knowledge. Our UiPath-ADAv1 test prep will not occupy too much time. You might think that it is impossible to memorize well all knowledge. We can tell you that our UiPath-ADAv1 Test Prep concentrate on systematic study, which means all your study is logic. Why not give us a chance to prove? Our UiPath-ADAv1 guide question dumps will never let you down.

ActualTorrent provides you with free demos of its UiPath Automation Developer Associate v1 Exam UiPath-ADAv1 exam product. You can try a free demo to eliminate any confusion regarding the authenticity of our UiPath Automation Developer Associate v1 Exam UiPath-ADAv1 PDF and practice tests (web-based & desktop software). It is also our policy to facilitate you with UiPath-ADAv1 free actual dumps updates in case of new UiPath Automation Developer Associate v1 Exam UiPath-ADAv1 test changes within three months of your shopping. Contact us any time, if you need any guidance about our UiPath UiPath-ADAv1 exam product. There is only one way to get all these amazing UiPath-ADAv1 exam dumps offers and that is purchasing our product today.

Unparalleled UiPath-ADAv1 Practice Questions for Real Exam

Wrong topic tend to be complex and no regularity, and the UiPath-ADAv1 torrent prep can help the users to form a good logical structure of the wrong question, this database to each user in the simulation in the practice of all kinds of wrong topic all induction and collation, and the UiPath-ADAv1 study question then to the next step in-depth analysis of the wrong topic, allowing users in which exist in the knowledge module, tell users of our UiPath-ADAv1 Exam Question how to make up for their own knowledge loophole, summarizes the method to deal with such questions for, to prevent such mistakes from happening again.

UiPath UiPath-ADAv1 Exam Syllabus Topics:

Topic	Details
Topic 1	Version Control Integration: The section highlights the benefits of version control by demonstrating the use of Studio's Git integration for adding projects, cloning repositories, committing changes, and managing branches.
Topic 2	Business Knowledge: This topic covers the fundamental concepts of business process automation, highlighting its value proposition. It also explores key ideas related to business processes, offering a comprehensive understanding of this domain.
Topic 3	Platform Knowledge: The section provides an overview of UiPath's product suite, including Studio and Robot variants, Orchestrator, and Integration Service, showcasing their unique contributions. It also emphasizes the benefits of Academy, Forum, and Marketplace in the UiPath ecosystem.

Topic 4	• PDF Automation: The section focuses on data extraction from native and scanned PDFs, including single and multiple document scenarios.
Topic 5	• Data Manipulation: This topic covers a range of data manipulation techniques, including string manipulation using VB.Net methods and the RegEx Builder. It also guides users through working with arrays, lists, and dictionaries, as well as building and iterating through DataTables.
Topic 6	• UI Automation: Here, the topic explains how UI Automation works and offer guidance on using the Modern Recorder and associated activities. It also covers UI synchronization and the configuration of static and dynamic descriptors.
Topic 7	• Working with Files and Folders: Here, you explore creating, managing, and navigating local files and folders, providing a foundation for file system automation.
Topic 8	• Workflow Analyzer: Here, the topic introduces the Workflow Analyzer tool, explaining its use for project analysis and validation, and providing guidance on configuring its settings.
Topic 9	• Implementation Methodology: The section offers an overview of project implementation stages, interpretation of PDDs and SDDs, and the conduct of automation project peer reviews, ensuring a structured approach to development.
Topic 10	• Libraries and Templates: This topic covers the creation, publication, and consumption of process libraries, along with the sharing and access of templates, promoting efficient project development and standardization.
Topic 11	• Control Flow: The section explains the functionality of control flow activities and their impact on workflow types. It covers the use of sequence and flowchart layouts. Lastly, it focuses on implementing IF, For Each, and While activities, among others.

UiPath Automation Developer Associate v1 Exam Sample Questions (Q217-Q222):

NEW QUESTION # 217

A developer loaded an existing workflow that uses UI Automation in Google Chrome. The Google Chrome extension has not been installed on the developer's machine. How should the developer load the Google Chrome extension from UiPath Studio?

Instructions: Drag the Description found on the left and drop on the correct Step found on the right.

Description	Step Sequence
Click, "Tools" to see "UiPath Extensions"	Step 1
Navigate to "Home"	Step 2
Click, "Enable extension" in the Google Chrome confirmation pop-up.	Step 3
Select "Chrome" and then click, "Install"	Step 4

Answer:

Explanation:

Description

- Click, "Tools" to see "UiPath Extensions"
- Navigate to "Home"
- Click, "Enable extension" in the Google Chrome confirmation pop-up.
- Select "Chrome" and then click, "Install"

Step Sequence

Step 1

Navigate to "Home"

Step 2

Click, "Tools" to see "UiPath Extensions"

Step 3

Select "Chrome" and then click, "Install"

Step 4

Click, "Enable extension" in the Google Chrome confirmation pop-up.

Explanation:

The developer can load the Google Chrome extension from UiPath Studio by following these steps:

Step 1 = Navigate to Home in UiPath Studio. This is the section where you can create, open, or manage your projects.

Step 2 = Click Tools to see UiPath Extensions. This is the section where you can install or update various extensions for different applications or browsers.

Step 3 = Select Chrome and then click Install. This will launch the Chrome browser and redirect you to the Chrome Web Store page for the UiPath extension.

Step 4 = Click Enable extension in the Google Chrome confirmation pop-up. This will add the UiPath extension to your browser and allow you to use UI automation activities in Chrome.

NEW QUESTION # 218

A developer created three variables used in the workflow shown below:

Instructions: Based on best practices, select the correct Scope for each Variable type from the drop-down lists shown in the following exhibit.

Name	Variable type	Scope	Default
Age	Double	Sequence – Yes, Can Vote Sequence – No, Cannot Vote Body of For Each Row Determine Age and Eligibility to Vote Voter Registration	Enter a VB expression
TimeOnThePlanet	TimeSpan	Sequence – Yes, Can Vote Sequence – No, Cannot Vote Body of For Each Row Determine Age and Eligibility to Vote Voter Registration	Enter a VB expression
dt_NamesBirthdays	DataTable	Sequence – Yes, Can Vote Sequence – No, Cannot Vote Body of For Each Row Determine Age and Eligibility to Vote Voter Registration	New System.Data.DataTable

Answer:

Explanation:

Name	Variable type	Scope	Default
Age	Double	Sequence – Yes, Can Vote Sequence – No, Cannot Vote Body of For Each Row Determine Age and Eligibility to Vote Voter Registration	Enter a VB expression
TimeOnThePlanet	TimeSpan	Sequence – Yes, Can Vote Sequence – No, Cannot Vote Body of For Each Row Determine Age and Eligibility to Vote Voter Registration	Enter a VB expression
dt_NamesBirthdays	DataTable	Sequence – Yes, Can Vote Sequence – No, Cannot Vote Body of For Each Row Determine Age and Eligibility to Vote Voter Registration	New System.Data.DataTable

Explanation

Name = Age Variable type = Double Scope = Body of For Each Row

Name = TimeonThePlanet Variable type = Time Span Scope = Sequence - Yes, Can Vote Name = dt_NamesBirthdays Variable type = DataTable Scope = Voter Registration The reason for choosing these scopes is to keep the variables in the innermost scope where they are used and to avoid unnecessary clutter and duplication in the Variables panel. You can learn more about variable scope in UiPath from the following sources:

Variable scope - Studio - UiPath Community Forum

How Variable Scope Works in UiPath - Video Tutorials - UiPath Community Forum How to pass variables as UiPath arguments

example - TheServerSide Best Practices: Select Variables scope - UiPath Community Forum

NEW QUESTION # 219

A developer has extracted the date "08-22-2022" from an invoice and stored it in a variable of type String called ExtractedDate. As part of the process, the developer needs to perform a comparison with a different date.

Which expression should be used to convert ExtractedDate to a DateTime type?

- A. DateTime.Compare(ExtractedDate:"08-22-2022")
- B. ExtractedDate.GetType
- C. DateTime.Parse(ExtractedDate)
- D. ExtractedDate.Equals("08-22-2022")

Answer: C

Explanation:

Explanation

To convert ExtractedDate to a DateTime type, the expression that should be used is:

DateTime.Parse(ExtractedDate)

This expression uses the DateTime.Parse method, which converts a string representation of a date and time to its DateTime equivalent. The DateTime.Parse method can accept different formats of date and time strings, as long as they are supported by the current culture or a specified culture. The DateTime.Parse method returns a DateTime object that represents the date and time value of the string1. For example, if the ExtractedDate variable has the value:

ExtractedDate = "08-22-2022"

Then the expression DateTime.Parse(ExtractedDate) will return a DateTime object with the value:

[08/22/2022 12:00:00 AM]

This DateTime object can then be used to perform a comparison with a different date, such as using the DateTime.Compare method or the comparison operators2.

References: DateTime.Parse Method and How to compare dates in UiPath? from UiPath documentation and forum.

NEW QUESTION # 220

What are the three main components of UiPath Integration Service?

- A. Connectors, API Tokens, Triggers.

- B. Connectors, Connections, Triggers.
- C. Activities, Connections, Triggers.
- D. Connectors, Connections, Orchestrator.

Answer: B

Explanation:

UiPath Integration Service is a feature that enables you to integrate UI and API automation in a unified way.

The three main components of UiPath Integration Service are:

* Connectors: These are pre-built or custom components that provide access to various applications or systems through their APIs. You can use connectors to perform actions or retrieve data from different sources, such as Salesforce, Slack, Google Sheets, etc. (UiPath Integration Service documentation1)

* Connections: These are configurations that store the authentication and connection details for each connector. You can create and manage connections in the UiPath Automation Cloud and share them across different folders and processes. (UiPath Integration Service documentation2)

* Triggers: These are rules that define when and how to start a process in Orchestrator based on events from connectors. You can configure triggers to react to data changes, insertions, deletions, or custom events in the connected applications or systems. (UiPath Integration Service documentation3) References:

- * 1: Integration Service - Connectors - UiPath Documentation Portal.
- * 2: Integration Service - Connections - UiPath Documentation Portal.
- * 3: Integration Service - Triggers - UiPath Documentation Portal.

NEW QUESTION # 221

The "Main.xaml" file has an "In" argument of type String with a default value of "String.Empty". What is the runtime value of the argument when executing the process from the Start Job window in UiPath Orchestrator?

- A. @ If any input arguments are provided in Orchestrator, those values will be used; otherwise, the default value of "String.Empty" will be used.
- B. Only the default value of "String.Empty" will be used, overriding any values provided in Orchestrator.
- C. An Input Dialog box will prompt the user to input a value and that value will be used.
- D. A runtime error will occur as arguments are not allowed in the "Main.xaml" file.

Answer: A

Explanation:

When a process is executed from the Start Job window in UiPath Orchestrator, the runtime value of an "In" argument in the "Main.xaml" file will be the value provided in Orchestrator if specified. If no value is provided in Orchestrator for this argument, then the default value specified in the "Main.xaml" file will be used, in this case, "String.Empty". Therefore, option C is correct. Arguments can be passed to the "Main.

xaml" file from Orchestrator, and there is a mechanism to handle default values for arguments in case they are not provided at runtime. References:

- * UiPath Orchestrator Guide: Starting a Job
- * UiPath Studio Guide: Managing Arguments

NEW QUESTION # 222

.....

With the rapid development of computer, network, and semiconductor techniques, the market for people is becoming more and more hotly contested. Passing a UiPath-ADAv1 exam to get a certificate will help you to look for a better job and get a higher salary. If you are tired of finding a high quality study material, we suggest that you should try our UiPath-ADAv1 Exam Prep. Because our UiPath-ADAv1 exam materials not only has better quality than any other same learn products, but also can guarantee that you can pass the UiPath-ADAv1 exam with ease.
