問題 #55

How can a Product Owner use time-boxed Sprints to obtain feedback from users and the market? (Choose the best answer)

- A. Through frequent delivery of Increments of the product into the market.
- B. A business analyst represents the Product Owner to make decisions on his behalf during the Sprint. This way the Product Owner can accept the work at the Sprint Review without further involvement.
- C. By making sure a Sprint does not stop until all testing is done, and the work is verified by the Product Owner.
- D. Through the assurance that a Developers finishes all work on the Sprint Backlog.
- E. At the end of each Sprint, a detailed report with all test cases and test results is available.

答案：A

解題說明：

Time-boxed Sprints in Scrum enable rapid feedback loops by delivering usable Increments regularly. The Scrum Guide emphasizes: "Sprints are the heartbeat of Scrum, where ideas are turned into value." Option B aligns with this-frequent releases to the market allow the Product Owner to gather real user and market feedback, validating assumptions and adjusting the Product Backlog.

* A: Finishing Sprint Backlog work is internal; it doesn't guarantee market feedback.

* C: Delaying Sprint end for testing contradicts the fixed time-box and "Done" requirement within the Sprint.

* D: Reports are informational, not direct market feedback.

問題 #56

Which three purposes does the Definition of "Done" serve? (Choose the best three answers)

- A. Describe the work that must be done before the Sprint is allowed to end.
- B. Describe the purpose, objective, and time-box of each Scrum event.
- C. Guide the Developers on how many Product Backlog items to select for the Sprint.
- D. Create a shared understanding of when work is complete.
- E. Increase transparency.

答案：C,D,E

解題說明：

The Scrum Guide explains the Definition of "Done" as "a formal description of the state of the Increment when it meets the quality measures required for the product".

* A: It increases transparency by making quality expectations visible to all.

* B: It creates a shared understanding of "complete" across the Scrum Team.

問題 #57

Which statement is least accurate when providing a definition of "Done"? (Choose the best answer)

- A. It becomes more complete over time
- B. It may vary depending on the project
- C. It is defined by the Scrum Master

- D. It is the exit criteria to determine whether a Product Backlog item is complete

答案： C

解題說明：

The Definition of "Done" is a team or organizational standard, not the Scrum Master's sole responsibility. The Scrum Guide states: "If it is not an organizational standard, the Scrum Team must create a Definition of Done appropriate for the product."

- * A: Accurate-it defines completion.
- * B: True-it can differ by context or product.
- * C: Least accurate-the Scrum Team or organization defines it, not just the Scrum Master.

問題 #58

When can the Product Backlog be updated? (Choose the best answer)

- A. At any time when done by the Product Owner or at the Product Owner's discretion
- B. Only during Product Backlog refinement sessions if the Product Owner is present
- C. Only after a Sprint Review if agreed to by the stakeholders
- D. Never, unless agreed to by the change request

答案： A

解題說明：

The Product Backlog is under the Product Owner's control and can be updated anytime. The Scrum Guide states: "The Product Owner is accountable for effective Product Backlog management," implying ongoing adjustments as needed.

- * A: Limiting updates to Sprint Review contradicts its emergent nature.
- * B: Refinement is a key activity, but updates aren't restricted to it.
- * C: A "change request" process isn't in Scrum.

問題 #59

True or False: Management does not have a role within Scrum.

- A. True
- B. False

答案： B

解題說明：

Management has a role in supporting Scrum, though not within the Scrum Team. The Scrum Guide notes:

"Scrum Teams are cross-functional, meaning the members have all the skills necessary to create value each Sprint. They are also self-managing... Various practices exist to forecast progress, like burn-downs, burn-ups, or cumulative flows." Management provides resources, removes impediments, and sets organizational context, but doesn't manage the team directly.

- * A: False-management supports externally.
