Living in such a world where competitiveness is a necessity that can distinguish you from others, every one of us is trying our best to improve ourselves in every way. It has been widely recognized that the 1Z0-1072-25 exam can better equip us with a newly gained personal skill, which is crucial to individual self-improvement in today's computer era. With the certified advantage admitted by the test Oracle certification, you will have the competitive edge to get a favorable job in the global market. Here our 1Z0-1072-25 Study Materials are tailor-designed for you.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying BlockFileObject Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.
Topic 2	<ul style="list-style-type: none">Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPNFastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.
Topic 3	<ul style="list-style-type: none">Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.

Topic 4	<ul style="list-style-type: none"> • Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources

The immediate downloading feature of our 1Z0-1072-25 Certification guide is an eminent advantage of our products. Once the pay is done, our customers will receive an e-mail from our company. There is a linkage given by our e-mail, and people can begin their study right away after they have registered in. Our 1Z0-1072-25 exam braindumps are available for downloading without any other disturbing requirements as long as you have paid successfully, which is increasingly important to an examinee as he or she has limited time for personal study. Therefore, our Oracle Cloud Infrastructure 2025 Architect Associate guide torrent is attributive to high-efficient learning.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q45-Q50):

NEW QUESTION # 45

Why is the OCI Inter-Region Latency dashboard useful for optimizing data transfer and backup strategies?

- A. It's designed for troubleshooting latency issues within your specific applications.
- **B. It offers a current and historical view of latency snapshots.**
- C. It focuses solely on latency within your own tenancy.
- D. It provides real-time data specific to your tenancy's workloads.

Answer: B

Explanation:

The OCI Inter-Region Latency dashboard is useful for optimizing data transfer and backup strategies because it provides both current and historical views of latency snapshots between OCI regions. This information helps you understand the network performance between regions over time, allowing you to optimize the placement of resources and data transfer operations. Optimization Use: By analyzing latency data, you can make informed decisions on where to store backups and how to efficiently transfer data across regions, potentially reducing costs and improving performance.

Oracle Cloud Infrastructure Documentation: Inter-Region Latency Dashboard

NEW QUESTION # 46

Which Traffic Management Steering Policy facilitates the distribution of DNS traffic based on the geographical location of end users?

- A. IP Prefix Steering
- **B. Geolocation Steering**
- C. Proximity Steering
- D. ASN Steering

Answer: B

Explanation:

Geolocation Steering in OCI's Traffic Management Steering Policy allows you to distribute DNS traffic based on the geographical location of the end users. This method helps direct users to the nearest regional endpoint, optimizing latency and improving user experience.

Use Cases: Geolocation Steering is commonly used to deliver region-specific content, comply with data residency laws, or optimize service performance by directing traffic to the closest available servers.

Oracle Cloud Infrastructure Documentation: Traffic Management Steering Policies

NEW QUESTION # 47

What are the two types of capture filters that can be created for network monitoring?

- A. Flow log capture filters and packet capture filters
- B. VTAP capture filters and network capture filters
- C. Flow control capture filters and traffic capture filters
- **D. Flow log capture filters and VTAP capture filters**

Answer: D

Explanation:

In Oracle Cloud Infrastructure (OCI), there are two primary types of capture filters used for network monitoring:

Flow Log Capture Filters: These filters are used to capture and log network flow information (e.g., source and destination IP addresses, ports, protocols). Flow logs provide insights into the traffic patterns within your VCN.

VTAP Capture Filters: Virtual Test Access Point (VTAP) capture filters allow you to capture and inspect traffic from specific network interfaces or subnets without affecting the flow of traffic. This is particularly useful for deep packet inspection and monitoring purposes.

Oracle Cloud Infrastructure Documentation: VTAP

NEW QUESTION # 48

Which TWO are key benefits of setting up Site-to-Site VPN on Oracle Cloud Infrastructure (OCI)?

- **A. When setting up Site-to-Site VPN, OCI provisions redundant VPN tunnels.**
- B. When setting up Site-to-Site VPN, customers can expect bandwidth above 2 Gbps.
- **C. When setting up Site-to-Site VPN, customers can configure it to use static or dynamic routing (BGP).**
- D. When setting up Site-to-Site VPN, it creates a private connection that provides consistent network experience.

Answer: A,C

Explanation:

Setting up a Site-to-Site VPN on Oracle Cloud Infrastructure offers several key benefits related to connectivity and reliability:

Static or Dynamic Routing (BGP): OCI allows customers to configure Site-to-Site VPN with either static routing or dynamic routing using Border Gateway Protocol (BGP). This flexibility enables customers to choose the routing method that best suits their network configuration and requirements.

Redundant VPN Tunnels: OCI automatically provisions redundant VPN tunnels when you set up a Site-to-Site VPN. These redundant tunnels ensure high availability and fault tolerance, so if one tunnel fails, traffic can continue to flow through the other tunnel without interruption.

Bandwidth Considerations: While the VPN provides a reliable connection, it typically does not exceed 2 Gbps in bandwidth. Higher bandwidth connections usually require FastConnect.

Private Connection: The VPN does create a secure and private connection between on-premises data centers and OCI, but it does not inherently provide a consistent network experience in the way that a dedicated connection like FastConnect does.

Relevant OCI Documentation:

Site-to-Site VPN Overview

Configuring Routing for VPNs

These references detail the benefits and technical specifications of setting up Site-to-Site VPNs on OCI.

NEW QUESTION # 49

What would be the total meteredBytes shown by the File Storage service after the hourly update cycle is complete when you overwrite 0.5 GB of a 1 GB file?

- A. 0.5 GB
- B. 2.5 GB
- **C. 1.5 GB**
- D. 1 GB

Answer: C

Explanation:

In Oracle Cloud Infrastructure (OCI) File Storage, when you overwrite a portion of a file, the service does not immediately reclaim the space occupied by the previous version of the file. The total meteredBytes reflects both the original data and the new data written.

Scenario Explanation: You start with a 1 GB file. When you overwrite 0.5 GB of this file, the file system retains both the 0.5 GB of the original file and the new 0.5 GB you wrote.

Calculation: The original 1 GB file contributes 1 GB to meteredBytes. When 0.5 GB is overwritten, the total usage becomes 1.5 GB (1 GB original + 0.5 GB new).

Thus, after the hourly update cycle, the total meteredBytes shown by the File Storage service will be 1.5 GB.

Our 1Z0-1072-25 training materials make it easier to prepare exam with a variety of high quality functions. We are committed to your achievements, so make sure you try preparation exam at a time to win. Our 1Z0-1072-25 exam prep is of reasonably great position from highly proficient helpers who have been devoted to their quality over ten years to figure your problems out. Their quality function of our 1Z0-1072-25 learning quiz is observably clear once you download them.
