ServiceNow certification CIS-SPM exam training methods

As the famous saying goes, time is life. Time is so important to everyone because we have to use our limited time to do many things. Especially for candidates to take the CIS-SPM exam, time is very precious. They must grasp every minute and every second to prepare for it. From the point of view of all the candidates, our CIS-SPM Study Materials give full consideration to this problem. We can send you a link within 5 to 10 minutes after your payment.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q19-Q24):

NEW QUESTION # 19

If a project manager is responsible for approving time sheets or submitting time cards on behalf of team members, they should be given what role?

- A. form_admin.
- B. timecard_admin.
- C. approval_admin.
- D. activity_admin.

Answer: B

Explanation:

According to the ServiceNow documentation¹, the timecard_admin role can approve time sheets or submit time cards on behalf of team members. This role also has the ability to create and modify time sheet policies, time sheet groups, and time sheet periods. The other options are incorrect because:

A . activity_admin: The activity_admin role can create and modify activities, activity sets, and activity plans².

C . form_admin: The form_admin role can create and modify forms, form sections, and form layouts³.

D . approval_admin: The approval_admin role can create and modify approval rules, approval groups, and approval stages⁴.

NEW QUESTION # 20

When creating a project from demand, what related records are moved and copied upon Project Creation?

- A. Idea and Demand.
- B. Resource Plan and Change Requests.
- **C. Resource Plan and Cost Plan.**
- D. Cost Plan and Assessment.

Answer: C

Explanation:

Explanation

According to the Create a customer project from a demand document, when creating a project from demand, the resource plan and the cost plan are moved and copied upon project creation. The resource plan defines the resources required for the project, and the cost plan defines the estimated and actual costs for the project. The other options are not correct, as they are not related records that are moved and copied upon project creation.

The change requests, the idea, and the demand are not moved or copied to the project, but they are linked to the project as references. The assessment is not a record that is associated with the project, but with the demand.

NEW QUESTION # 21

If a lens has four entities, which entity within the lens structure would not have a parent reference?

- A. Second-level entity
- B. Bottom entity
- C. Third-level entity
- **D. Top-level entity**

Answer: D

Explanation:

Explanation

According to the ServiceNow documentation¹, a lens is a hierarchical structure that consists of entities and relationships. An entity is a data object that represents a business concept, such as a project, a demand, or a resource. A relationship is a link between two entities that defines how they are connected. A lens can have up to four levels of entities, each with a parent reference to the entity above it, except for the top-level entity, which has no parent reference. The top-level entity is the root of the lens and defines its scope and type. For example, a project lens has a project as the top-level entity, and a demand lens has a demand as the top-level entity.

NEW QUESTION # 22

Where is planned cost calculated from when requesting resources from a group and when resource role is specified?

- A. The task rate cards.
- B. The CI rate cards.
- **C. The hourly rate of the specified role.**
- D. The distribution costs

Answer: C

Explanation:

Explanation

According to the ServiceNow documentation¹, when requesting resources from a group and when resource role is specified, the planned cost is calculated from the hourly rate of the specified role. The system uses the rate card associated with the resource plan to determine the hourly rate for each role. The other options are incorrect because:

A: The distribution costs: The distribution costs are the costs that are distributed across the project tasks based on the resource plan

allocation2.

B: The task rate cards: The task rate cards are the rate cards that are applied to the project tasks, not the resource plan3.

D: The CI rate cards: The CI rate cards are the rate cards that are applied to the configuration items, not the resource plan4.

NEW QUESTION # 23

What is the demand workbench used for?

Choose 2 answers

- A. Comparing and prioritizing demands against other demands
- B. Comparing demands with portfolios
- C. Approving ideas
- D. Approving demands

Answer: A,B

Explanation:

Explanation

The demand workbench is a feature of ServiceNow Demand Management that allows you to view and assess business demands in a single place. You can use the demand workbench to compare demands with portfolios and see how they align with your strategic goals and objectives. You can also use the demand workbench to compare and prioritize demands against other demands based on their scores, risks, and benefits. You can find more information about the demand workbench in the Product Documentation for ServiceNow.
