Cisco 300-710 Test Online: Securing Networks with Cisco Firepower - VCETorrent Precise Guaranteed Success for your free downloading

Using our products does not take you too much time but you can get a very high rate of return. Our 300-710 quiz guide is of high quality, which mainly reflected in the passing rate. We can promise higher qualification rates for our 300-710 exam question than materials of other institutions. Because our products are compiled by experts from various industries and they are based on the true problems of the past years and the development trend of the industry. What's more, according to the development of the time, we will send the updated materials of 300-710 Test Prep to the customers soon if we update the products. Under the guidance of our study materials, you can gain unexpected knowledge. Finally, you will pass the exam and get a Cisco certification.

After you purchase our 300-710 study materials, we will provide one-year free update for you. Within one year, we will send the latest version to your mailbox with no charge if we have a new version of 300-710 learning materials. We will also provide some discount for your updating after a year if you are satisfied with our 300-710 Exam Questions. And if you find that your version of the 300-710 practice guide is over one year, you can enjoy 50% discount if you buy it again.

Guaranteed 300-710 Success, 300-710 Test Questions Answers

Our product is revised and updated according to the change of the syllabus and the latest development situation in the theory and the practice. The 300-710 Exam Torrent is compiled elaborately by the experienced professionals and of high quality. The contents of 300-710 guide questions are easy to master and simplify the important information. It conveys more important information with less answers and questions, thus the learning is easy and efficient. The language is easy to be understood makes any learners have no obstacles.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q288-Q293):

NEW QUESTION # 288

When deploying a Cisco ASA Firepower module, an organization wants to evaluate the contents of the traffic without affecting the network. It is currently configured to have more than one instance of the same device on the physical appliance.

Which deployment mode meets the needs of the organization?

- A. passive tap monitor-only mode
- B. passive monitor-only mode
- C. inline mode
- D. inline tap monitor-only mode

Answer: D

Explanation:

For passive monitor-only mode we need extra switch with span port.

https://www.cisco.com/c/en/us/td/docs/security/asa/asa910/configuration/firewall/asa-910-firewall- config/access-sfr.html

NEW QUESTION # 289

A network engineer is deploying a pair of Cisco Secure Firewall Threat Defense devices managed by Cisco Secure Firewall Management Center for High Availability. Internet access is a high priority for the business and therefore they have invested in internet circuits from two different ISPs. The requirement from the customer is that internet access must be available to their users even if one of the ISPs is down. Which two features must be deployed to achieve this requirement? (Choose two.)

- A. SLA Monitor
- B. Redundant interfaces
- C. Route Tracking
- D. EtherChannel interfaces
- E. BGP

Answer: A,C

Explanation:

To ensure high availability of internet access when deploying a pair of Cisco Secure Firewall Threat Defense (FTD) devices managed by Cisco Secure Firewall Management Center (FMC), the following features must be deployed:

Route Tracking: This feature monitors the reachability of a specified target (such as an external IP address) through the configured routes. If the route to the target is lost, the FTD can dynamically adjust the routing to use an alternate path, ensuring continuous internet access. SLA Monitor: Service Level Agreement (SLA) monitoring works alongside route tracking to continuously verify the status and performance of the internet links. If the SLA for one of the ISP links fails (indicating the link is down or underperforming), the FTD can switch traffic to the secondary ISP link.

Steps to configure:

In FMC, navigate to Devices > Device Management.

Select the FTD device and configure route tracking to monitor the ISP links. Configure SLA monitors to continuously check the health and performance of the internet circuits. These configurations ensure that internet access remains available to users even if one of the ISPs goes down.

NEW QUESTION # 290

A Cisco FTD device is running in transparent firewall mode with a VTEP bridge group member ingress interface What must be considered by an engineer tasked with specifying a destination MAC address for a packet trace?

- A. The output format option for the packet logs unavailable
- B. The destination MAC address is optional if a VLAN ID value is entered
- C. Only the UDP packet type is supported
- D. The VLAN ID and destination MAC address are optional

Answer: B

Explanation:

NEW QUESTION # 291

Which policy rule is included in the deployment of a local DMZ during the initial deployment of a Cisco NGFW through the Cisco FMC GUI?

- **A. no policy rule is included**
- B. deny ip any
- C. permit ip any
- D. a default DMZ policy for which only a user can change the IP addresses.

Answer: A

Explanation:
Section: Deployment

NEW QUESTION # 292

A network engineer wants to add a third-party threat feed into the Cisco FMC for enhanced threat detection Which action should be taken to accomplish this goal?

- A. Enable Rapid Threat Containment using STIX and TAXII
- B. Enable Threat Intelligence Director using REST APIs
- C. Enable Threat Intelligence Director using STIX and TAXII
- D. Enable Rapid Threat Containment using REST APIs

Answer: C

Explanation:
