Hot Valid EMEA-Advanced-Support Study Plan | Valid Fortinet EMEA-Advanced-Support Training Pdf: Fortinet EMEA Advanced Support Exam

Our Fortinet EMEA Advanced Support Exam (EMEA-Advanced-Support) practice exam simulator mirrors the EMEA-Advanced-

Support exam experience, so you know what to anticipate on EMEA-Advanced-Support certification exam day. Our Fortinet EMEA Advanced Support Exam (EMEA-Advanced-Support) practice test software features various question styles and levels, so you can customize your Fortinet EMEA-Advanced-Support exam questions preparation to meet your needs.

Fortinet EMEA Advanced Support Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24
Which protocol does FortiGate use for secure management access by default?

- A. SSH
- B. Telnet
- C. SNMP
- D. HTTP

Answer: A

Explanation:
FortiGate uses SSH (Secure Shell) by default for secure management access, providing encrypted command- line access. Telnet (A) and HTTP (C) are insecure, and SNMP (D) is for monitoring, not management. Exact extract: "FortiGate enables SSH by default for secure management access, providing encrypted CLI access to administrators."

NEW QUESTION # 25
Which command would you use to verify the status of an IPsec VPN tunnel on a FortiGate?

- A. show crypto ipsec sa
- B. diagnose vpn tunnel list
- C. get vpn ipsec status
- D. diagnose ipsec status

Answer: B

Explanation:
The 'diagnose vpn tunnel list' command on FortiGate displays detailed status information about IPsec VPN tunnels, including phase 1 and phase 2 states, uptime, and traffic statistics. Options B, C, and D are not valid FortiGate commands for this purpose. Exact extract: "Use diagnose vpn tunnel list to view the status of IPsec VPN tunnels, including phase 1 and phase 2 details, such as SA status, uptime, and traffic counters."

NEW QUESTION # 26
In Active FTP who sends the PORT command?

- A. The FTP Client
- B. The FTP Server
- C. There is no PORT command in Active FTP
- D. Both

Answer: A

Explanation:
In Active FTP, the client sends the PORT command to the server, specifying an ephemeral port for the server to initiate the data connection back to the client. This distinguishes Active FTP from Passive FTP, where the server provides the port. The server does not send PORT, and the command is a key part of Active FTP. Exact extract: "In Active FTP, the client sends a PORT command to the server, specifying the IP address and port number for the data connection... The server then initiates the data connection to the client's specified port."

NEW QUESTION # 27
Which FortiGate feature allows for dynamic routing protocol updates to be propagated through an IPsec VPN tunnel?

- A. Auto Discovery VPN (ADVPN)

- B. Dynamic Routing Gateway
- C. Virtual Routing and Forwarding (VRF)
- D. Route-based VPN

Answer: A

Explanation:
Auto Discovery VPN (ADVPN) in FortiGate enables dynamic routing protocols (e.g., OSPF, BGP) to propagate updates through IPsec VPN tunnels by automatically creating shortcut paths between spokes. This simplifies configuration and enhances scalability in hub-and-spoke topologies. Route-based VPN (D) supports routing but not dynamic discovery, VRF (C) is for segmentation, and Dynamic Routing Gateway (B) is not a standard Fortinet feature. Exact extract: "ADVPN allows dynamic routing protocols to be used over IPsec VPN tunnels, enabling spokes to discover and communicate directly via shortcuts, improving efficiency in hub-and-spoke setups."

NEW QUESTION # 28
Firewall is performing stateful inspection for TCP traffic between Client 10.0.0.21 and Server 172.16.1.200.

- A. Traffic should be allowed
- B. Traffic is Asymmetric and not allowed by the Firewall
- C. The ACK was not supposed to be sent to client 10.0.0.21
- D. Three way handshake was not completed

Answer: D

Explanation:
Stateful inspection requires a complete TCP three-way handshake (SYN, SYN-ACK, ACK) to establish a session in the firewall's state table. If the handshake is incomplete (e.g., missing ACK), the session is not established, and traffic is dropped. The question implies a stateful firewall scenario where traffic is blocked, likely due to an incomplete handshake. Asymmetric traffic (B) or incorrect ACK (A) are not indicated without further context, and C is incorrect if the handshake fails. Exact extract: "Stateful inspection ensures that a TCP three-way handshake is completed before allowing traffic... If the handshake is not completed, FortiGate drops the packets as invalid."

NEW QUESTION # 29
......

Free update for one year after purchasing is available for EMEA-Advanced-Support study guide, therefore there is no need for you to spend extra money on update version. And the update version for EMEA-Advanced-Support exam dumps will be sent to your email automatically, you just need to check your email for the update version. Besides, EMEA-Advanced-Support Exam Materials are compiled by experienced experts and, so the quality can be guaranteed.
