Reviewing the debug command, what is the current status of the traffic flowing through the tunnel?

- A. Traffic is flowing with an asymmetric selector.
- B. The outbound IPsec SA was copied to the NPU.
- C. There is an unsupported cipher or HMAC
- D. The inbound IPsec SA was copied to the NPU.

**Answer: D**

Explanation:

The debug shows `npu_flag=02` and `dec_npu=1/1`, meaning only the inbound (decrypt) IPsec SA has been offloaded to the NPU. Value 02 corresponds to inbound/offload, so the inbound SA was copied to hardware.
