The SAP C-ACDET-2506 PDF is also regularly reviewed by our experts so that you never miss important changes from SAP C-ACDET-2506.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q17-Q22):

NEW QUESTION # 17

A French translation of a custom field label needs to be updated.
Where do you update it?

- A. Field Configuration Label
- B. Customization Manager → Views
- C. Layout tab
- **D. AML & Translations Upload**

Answer: D

NEW QUESTION # 18

Who leads Suite Integration activities?

- A. Partner/Customer Functional Lead
- B. SAP Support
- **C. SAP Deployment Lead**
- D. Customer Success Manager

Answer: C

NEW QUESTION # 19

How can you create a field label with Italics?

- A. By selecting the option "Italic label"
- B. Formatting of a field label is not possible
- C. By marking the text in the field and selecting Ctrl-I
- **D. By using standard HTML formatting like `<i>label</i>` can be added to the field label**
- E. Find the correct folder

Answer: D

Explanation:

In SAP Ariba, field labels themselves do not support rich text formatting directly in the UI, meaning you cannot use Ctrl-I or a specific "Italic label" toggle to style the label. However, SAP allows the use of basic HTML tags, including `<i>` for italics, in help tip text or validation/error message text associated with fields. By embedding HTML tags like `<i>...</i>`, administrators can add italicized text in these auxiliary field descriptions, enhancing clarity and user guidance.

This is because SAP Ariba's UI rendering engine processes simple HTML in certain field-related text areas but treats field labels as plain text for consistency and localization reasons.

Therefore, the correct method for italicizing field-related text is using HTML tags in Help Tips or validation messages, not in the label itself.

This behavior is documented in SAP Ariba configuration best practices, emphasizing limited HTML support to maintain UI integrity and accessibility standards.

NEW QUESTION # 20

How can you create a field label with italics?

- A. By selecting the option "Italic label"
- B. By marking the text in the field and select Ctrl-I
- C. By using standard HTML formatting like label can be added to the field label
- D. Formatting of a field label is not possible

Answer: C

NEW QUESTION # 21

Which of the following classes are NOT frequently customized in SAP Ariba Strategic Sourcing solutions?

- A. AbstractDocument
- B. ContractWorkspace
- C. SourcingProject
- D. ExtendedAddressRep

Answer: A

Explanation:

Among the provided options, AbstractDocument is not frequently customized in SAP Ariba Strategic Sourcing projects. Commonly customized classes include ContractWorkspace, ExtendedAddressRep, and SourcingProject, as they relate directly to contracts, addresses, and sourcing projects—key business objects in the suite. AbstractDocument serves as a more generic superclass and typically does not require direct customization.

NEW QUESTION # 22

.....
