

# Updated Huawei H35-211\_V2.5 CBT & Latest H35-211\_V2.5 Exam Notes

**Free PDF 2023 Reliable Huawei Valid H35-211\_V2.5-ENU Guide Files**

If you buy H35-211\_V2.5-ENU study materials, you will get more than just a question bank. You will also get our professional after-sales services. The purpose of the H35-211\_V2.5-ENU study materials is not to fail the candidate, but to allow all our customers who have purchased H35-211\_V2.5-ENU study materials to pass the exam smoothly. The level and price of the documents is relatively most value. We will accompany you throughout the review process from the amount you buy H35-211\_V2.5-ENU study materials. We will provide you with 24 hours of free online services. All our team of experts and services staff are waiting for your mail at all times.

The Huawei H35-211\_V2.5-ENU HCIP-Access V2.5 is a certification exam that serves as a stepping stone for IT professionals who want to validate their skills and knowledge in network access technologies. This exam is designed to test the candidate's understanding of the latest network access technologies and their ability to implement network access solutions.

The Huawei H35-211\_V2.5-ENU exam is intended for IT professionals who have experience in network access technologies and want to validate their knowledge and skills. The exam is also suitable for those who want to improve their career prospects by obtaining a professional certification.

PrepPDF is a website that provide the counseling courses for IT professionals to participate in Huawei certification H35-211\_V2.5 exam and help them get the Huawei H35-211\_V2.5 certification. The courses of PrepPDF is developed by experienced experts' extensive experience and expertise and the quality is very good and have a very fast update rate. Besides, exercises we provide are very close to the real exam questions, almost the same. When you select PrepPDF, you are sure to 100% pass your first time to participate in the difficult and critical Huawei Certification H35-211\_V2.5 Exam.

The HCIP-Access V2.5 exam is ideal for IT professionals who are looking to enhance their expertise in access network technologies. H35-211\_V2.5 Exam is designed to help candidates develop a deep understanding of access network technologies, including the latest industry trends and best practices. Additionally, the exam helps IT professionals develop the skills and knowledge required to design, deploy, and manage access networks that meet the needs of modern businesses.

## Huawei - H35-211\_V2.5 –Reliable Updated CBT

In today's society, the number of college students has grown rapidly. Everyone has their own characteristics. How do you stand out?

Obtaining H35-211\_V2.5 certification is a very good choice. Our H35-211\_V2.5 study materials can help you pass test faster. You can take advantage of the certification. Many people improve their ability to perform more efficiently in their daily work with the help of our H35-211\_V2.5 Exam Questions and you can be as good as they are.

Huawei H35-211\_V2.5 (HCIP-Access V2.5) Certification Exam is a professional certification program designed for individuals who want to validate their knowledge and skills in access network technologies. H35-211\_V2.5 exam is offered by Huawei, a global leader in information and communications technology (ICT) solutions. HCIP-Access V2.5 certification is recognized worldwide and is highly valued by employers in the ICT industry.

## Huawei HCIP-Access V2.5 Sample Questions (Q78-Q83):

### NEW QUESTION # 78

The OLT is configured to use IGMP Version 2. When the OLT receives an IGMPv3 Join (Report) message forwarded from an ONT, what action will it take?

- A. Send a general (universal) group query message
- **B. Discard directly**
- C. Normal forwarding
- D. Send a specific-group query message

**Answer: B**

Explanation:

Huawei multicast guidance stresses IGMP version compatibility: devices running an earlier version must interoperate only with hosts using the same or earlier version, otherwise v3 messages may not be processed.

In Huawei's multicast feature guidance for access devices (OLT side vs. user side), the behavior documented is that when the device is operating in IGMPv2, IGMPv3 Report messages from terminals are not processed- interoperation is restored only after the terminal/device side is downgraded to v2 (often driven by periodic queries that induce hosts to respond in v2). This maps operationally to dropping unsolicited IGMPv3 Reports when the OLT is fixed to v2. Huawei also recommends ensuring the device runs an IGMP version the same as or later than member hosts to avoid such loss. Therefore, with OLT fixed at v2, an incoming v3 Join is discarded.

### NEW QUESTION # 79

The maximum spectroscopic (split) ratio supported by 10G GPON is (Ratio)?

- A. 1:64
- **B. 1:128**
- C. 1:32
- D. 1:256

**Answer: B**

Explanation:

In Huawei's 10G GPON (XG-PON) system, the split ratio defines how many Optical Network Units (ONUs) can be connected to a single Optical Line Terminal (OLT) port through passive optical splitters.

According to ITU-T G.987.x standards and Huawei's 10G GPON technical specifications, the maximum theoretical optical split ratio for 10G GPON is 1:128.

This means that a single OLT PON port can serve up to 128 ONUs through the passive optical distribution network (ODN).

While the physical capability supports 1:128, practical deployments often use lower ratios (e.g., 1:64) to maintain optical power budgets and ensure stable service quality, especially over longer fiber distances or when optical losses are high.

Huawei's MA5800/EA5800 series OLTs, which support 10G GPON, comply fully with this standard, enabling 1:128 maximum splitting with appropriate ODN design.

Therefore, the correct answer is C. 1:128.

### NEW QUESTION # 80

(Single) When deploying home and guest services in a PON system, which of the following services has the highest priority?

- A. VOIP
- B. INTERNET
- C. IPTV
- D. GAME

Answer: A

### NEW QUESTION # 81

(Radio) The following options, regarding the description of the H.248 connection model, are correct?

- A. The connection model cannot be modified during a user session
- B. When the user call is successful, the empty connection starts to be created
- C. When the session between the two users ends, the corresponding association is used
- D. A media gateway that supports only point-to-point connections can allow three or more endpoints to exist in the -- association at the same time

Answer: C

### NEW QUESTION # 82

In the evolution of EPON to 10g EPON, a smooth transition is achieved at the local end by adding AWDM WDM module, and Odn coexists.

- A. True
- B. False

Answer: B

### NEW QUESTION # 83
