Salesforce Certified Experience Cloud Consultant Sample Questions (Q126-Q131):

NEW QUESTION # 126

Dreamscape Flowers (DF) is evaluating Salesforce Partner Relationship Management (RPM) to help improve its current channel sales performance.

In what two ways can Salesforce PRM help DF accelerate channel sales?

Choose 2 answers

- A. BY automating partner tiering in Channel sales hierarchy
- B. By automating partner lead routing
- C. By automating quoting with Salesforce CPQ
- D. By automating partner entitlement assignment in Channel sales teams

Answer: B,C

NEW QUESTION # 127

What are three valid topic types? Choose 3 answers

- A. Trending Topic
- B. Featured Topic
- C. Content Topic
- D. Standard Topic
- E. Navigational Topic

Answer: A,B,D

Explanation:

Three valid topic types are Featured Topic, Trending Topic, and Standard Topic. Topics are keywords or phrases that help users find and organize content in Experience Cloud sites. A Featured Topic is a topic that is manually selected by an administrator or moderator to be displayed prominently on the site. A Trending Topic is a topic that is automatically generated by an algorithm based on the popularity and recency of the content.

A Standard Topic is a topic that is created by users or administrators and can be assigned to any content.

NEW QUESTION # 128

Ursa Major Solar would like its Experience Cloud site's guest users to benefit from the suggestions that come from autocomplete on search terms.

How should the administrator configure this?

- A. In the Hero component property editor, open the Search Results section and click desired objects to appear in autocomplete. Select "publicly available".
- B. In the Search component property editor, open the Autocomplete section and click desired objects to appear in autocomplete. Select "publicly available".
- C. In Salesforce Setup, type "support settings" in the quickfind box. Under the Autocomplete header, select the objects to appear in autocomplete for guest users.
- D. Use the Developer Console to add code to allow for autocomplete functionality.

Answer: B

Explanation:

To enable autocomplete for guest users, the administrator should use the Search component property editor, open the Autocomplete section, and click desired objects to appear in autocomplete. Select "publicly available". Autocomplete is a feature that suggests search terms based on what users type in the search box.

The Search component property editor is a tool that allows you to customize the settings and behavior of the Search component on your Experience Cloud site. By selecting "publicly available", you can make autocomplete suggestions visible to guest users who are not logged in.

NEW QUESTION # 129

Universal Containers is planning to build a community where customers will be able to view Knowledge articles and chat live with a support agent.

What should the administrator use to configure the chat functionality?

- A. Experience Builder and Chatter
- B. Service Console and Service Channel
- C. Chat Agent Guided Setup Flow and Service Console
- D. Service Channel and Chatter

Answer: C

Explanation:

To configure the chat functionality, the administrator should use the Chat Agent Guided Setup Flow and Service Console. Chat is a feature that allows customers to chat live with support agents from an Experience Cloud site. The Chat Agent Guided Setup Flow is

a tool that walks you through the steps of setting up chat, such as creating chat buttons, chat deployments, chat queues, and chat skills. The Service Console is a workspace that allows agents to manage multiple chat sessions, view customer information, and access other tools and resources.

NEW QUESTION # 130

Ursa Major Solar would like its authenticated external users to be able to search for Quote and Contract objects but not Opportunity or Asset objects.

Which two standard features allow an administrator to accomplish that?

Choose 2 answers

- A. Remove Opportunity and Asset from the Title Menu component in the property editor.
- B. Remove Opportunity and Asset from the navigation Menu component in the property editor.
- C. Remove Opportunity and Asset from the Autocomplete object list in the Search component property editor.
- D. Remove Opportunity and Asset from the object list in the Global Search Result component property editor.

Answer: C,D

Explanation:

To prevent authenticated external users from searching for Quote and Contract objects but not Opportunity or Asset objects, you need to remove Opportunity and Asset from the object list in the Global Search Result component property editor and the Autocomplete object list in the Search component property editor. The Global Search Result component displays the search results for all objects that match the search term. The Autocomplete object list displays the suggested objects that match the search term as you type. You can customize these components by selecting or deselecting the objects that you want to include or exclude from the search.

NEW QUESTION # 131

.....

As the most important element that almost all the candidates will take into consider, the pass rate of our Experience-Cloud-Consultant exam questions is high as 98% to 100%, which is unique in the market and no one has made it.
