### WGU Information Technology Management QGC1 Sample Questions (Q192-Q197):

#### NEW QUESTION # 192

Which information system facilitates the sharing of data between the human resources and purchasing department in the same corporation?

- A. Customer relationship management (CRM)
- B. Executive support (ES)
- C. Enterprise resource planning (ERP)
- D. Geographic information system (GIS)

**Answer: C**

Explanation:

\* Definition of ERP Systems:

\* ERP systems facilitatedata sharing and process integrationacross multiple departments within an organization, such as HR and purchasing.

\* These systems improve coordination and decision-making by maintaining a single source of truth.

\* Example of ERP Usage:

\* If the HR department needs to coordinate with the purchasing team for new employee resources, ERP ensures both have access to relevant information like budgets and procurement requirements.

\* Incorrect Options Analysis:

\* A. Executive Support (ES):Caters to strategic decision-making, not operational collaboration.

\* B. Geographic Information System (GIS):Deals with spatial and geographical data, not departmental coordination.

\* D. Customer Relationship Management (CRM):Manages customer interactions, not internal department processes.

References and Documents of Information Technology Management:

\* "ERP for Organizational Efficiency" (Forrester Research).

\* ITIL 4 Foundation: Enterprise Systems Overview (Axelos).

#### NEW QUESTION # 193

Which organizational policy states that an employee should never send unsolicited emails outside the organization?

- A. Social media policy
- B. Employee monitoring policy
- C. Information use policy
- D. Anti-spam policy

**Answer: D**

Explanation:

Understanding Anti-Spam Policies:

Anti-spam policies prohibit the sending of unsolicited emails, particularly outside the organization.

Such policies protect an organization's reputation and comply with legal frameworks like the CAN-SPAM Act.

Focus on External Communications:

The policy ensures employees refrain from sending emails that may be perceived as spam, safeguarding the organization from legal and reputational risks.

Why Other Options Are Incorrect:

Option A: Information use policies focus on managing and protecting data, not email practices.

Option B: Monitoring policies are about observing employee activity but do not prevent spam.

Option D: Social media policies govern employee behavior on social platforms, not email usage.

IT Policy Frameworks and Guidelines (ISO 27002)

#### NEW QUESTION # 194

What should an IT leader consider when creating a presentation that will be delivered to the board of directors?

- A. Focus on problems rather than solutions
- **B. Know the audience and speak to their level of knowledge**
- C. Brevity is key because of time constraints
- D. Be thorough and provide all the technical details

**Answer: B**

Explanation:

Importance of Audience Awareness for IT Leaders:

When presenting to the board of directors, it is critical to tailor the content to their level of technical understanding and focus on strategic implications rather than technical details.

The board typically focuses on business outcomes, risks, and opportunities, not technical minutiae.

Key Considerations:

Highlight how IT initiatives align with business goals and deliver value.

Use concise, clear, and non-technical language while ensuring key points are well-supported with data.

Incorrect Options Analysis:

A . Provide all technical details: The board is more interested in business-level insights.

B . Focus on problems: Solutions and strategic outcomes are more relevant to the board.

C . Brevity: While being concise is important, it should not come at the cost of clarity or relevance.

and Documents of Information Technology Management:

"Effective Communication Strategies for IT Leaders" (Harvard Business Review).

ITIL Leadership and Communication Practices (Axelos).

#### NEW QUESTION # 195

Which system provides a foundation for collaboration between departments, enabling people in different business areas to communicate?

- A. Supply chain management (SCM)
- B. Customer relationship management (CRM)
- **C. Enterprise resource planning (ERP)**
- D. Electronic data interchange (EDI)

**Answer: C**

Explanation:

\* Definition of ERP Systems:

\* ERP integrates core business processes across various departments, such as finance, HR, procurement, and production.

\* It creates a centralized communication platform for cross-departmental collaboration and seamless data sharing.

\* Purpose of ERP:

\* Ensures real-time data visibility across the organization.

\* Promotes collaboration by eliminating data silos and enabling efficient workflows.

\* Incorrect Options Analysis:

\* B. Supply Chain Management (SCM): Focuses on logistics and supply chain optimization, not general collaboration.

\* C. Customer Relationship Management (CRM): Concentrates on customer interactions.

\* D. Electronic Data Interchange (EDI): Facilitates data sharing with external partners, not internal collaboration.

References and Documents of Information Technology Management:

\* "ERP Integration Best Practices" (Gartner).

\* ITIL Service Design: ERP Modules Overview (Axelos).

### NEW QUESTION # 196

A team tests a prototype prior to meeting with a company's client and discovers the "My Account" menu is not working. The team revises the code and presents a functioning prototype to the client.

Which advantage of prototyping does this describe?

- A. Static example of the finished product
- B. Blueprint of the entire project
- C. Early detection of coding errors
- D. Detailed instructions for development

**Answer: C**

Explanation:

\* Advantage of Prototyping:

\* Prototyping allows teams to identify and resolve issues, such as coding errors, early in the development process.

\* This minimizes the risk of errors propagating into later stages.

\* Scenario Application:

\* The team detected a menu functionality issue in the prototype, revised the code, and presented an updated version.

\* This demonstrates the value of early error detection through prototyping.

\* Why Other Options Are Incorrect:

\* Option A: Prototypes are not static examples.

\* Option B: Prototypes are not project blueprints.

\* Option D: Prototyping is not about creating development instructions.
