NEW QUESTION # 63

Which one of the following is an advantage of Air Cooled Self-Contained System?

- A. It doesn't require ductwork and/or dropped ceiling
- B. All components contain more than one unit
- C. Lowest installation cost
- D. It has more heat removal capacity per unit

Answer: A

Explanation:

Explanation

Air cooled self-contained systems are highly efficient and do not require ductwork and/or dropped ceiling for installation. This makes them a great choice for locations where installation costs are a major factor, such as in residential applications, or in places with limited space. Additionally, air cooled self-contained systems have more heat removal capacity per unit compared to water cooled systems, making them more cost-effective in the long run.

NEW QUESTION # 64

_____ protects electrical equipment from damage caused by overload or short circuit.

- A. Volt switch
- B. Circuit breaker
- C. IEC cable
- D. Server

Answer: B

Explanation:

A circuit breaker is a device that protects electrical equipment from damage caused by overload or short circuit. It does this by automatically disconnecting the power supply when it detects a surge or drop in voltage, preventing the equipment from being damaged.

NEW QUESTION # 65

Which type of outlet is used for non-computing devices?

- A. Harmonic
- B. Grounding
- C. Static
- D. Convenience

Answer: D

Explanation:

Explanation

Convenience outlets, also known as duplex receptacles or wall outlets, are used to provide power to non-computing devices, such as lamps, televisions, and other household appliances. They are typically found in residential and commercial buildings and are connected to a circuit breaker or fuse for protection against overloading and electrical fires

NEW QUESTION # 66

Which one of the following is an overall consideration for physical security?

- A. Define the problem
- B. Identify the problem
- C. Apply the technology
- D. Apply the solution

Answer: A

Explanation:

Defining the problem is an important overall consideration for physical security. This process involves identifying and analyzing the threats and vulnerabilities that could potentially affect the security of the system, as well as determining what steps need to be taken to mitigate these risks. This process should be done before any other steps are taken to ensure physical security, as it helps to ensure that the security measures are tailored to the specific needs of the system.
