With the training materials we provide, you can take a better preparation for the exam. And we will also provide you a year free update service.

## CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q67-Q72):

### NEW QUESTION # 67

Fill in the blank: An LDAP server holds one or more \_\_\_\_\_.

- A. Administrator Units
- B. Account Servers
- C. Server Units
- **D. Account Units**

**Answer: D**

Explanation:

An LDAP server holds one or more Account Units. An Account Unit is a logical representation of an LDAP server in the Check Point database. It defines the connection parameters, authentication methods, and user and group information that are retrieved from the LDAP server. An Account Unit allows the Security Gateway to use the LDAP server for user authentication and identity awareness. The other options are incorrect. A Server Unit is a logical representation of a Check Point server in the Check Point database. An Administrator Unit is a logical representation of an administrator or an administrator group in the Check Point database. An Account Server is not a valid term in Check Point terminology. [Check Point R81 Identity Awareness Administration Guide], [Check Point R81 Security Management Administration Guide], [Check Point R81 SmartConsole R81 Resolved Issues]

### NEW QUESTION # 68

When installing a dedicated R80 SmartEvent server, what is the recommended size of the root partition?

- A. Any size
- B. Less than 20GB
- C. More than 10GB and less than 20 GB
- **D. At least 20GB**

**Answer: D**

Explanation:

The correct answer is D because the recommended size of the root partition for a dedicated R80 SmartEvent server is at least 20GB. Any size, less than 20GB, or more than 10GB and less than 20GB are not sufficient for the SmartEvent server. Check Point R80.40 Installation and Upgrade Guide

### NEW QUESTION # 69

What is the purpose of the CPCA process?

- A. Monitoring the status of processes
- B. Communication between GUI clients and the SmartCenter server
- C. Sending and receiving logs
- **D. Generating and modifying certificates**

**Answer: D**

Explanation:

The purpose of the CPCA process is generating and modifying certificates. CPCA stands for Check Point Certificate Authority and it is a process that runs on the Security Management Server or Log Server. It is responsible for creating and managing certificates for internal communication between Check Point components, such as SIC. [Check Point R81 Quantum Security Management Administration Guide], [Check Point R81 Quantum Security Gateway Guide]

### NEW QUESTION # 70

Which firewall daemon is responsible for the FW CLI commands?

- A. cpd

- B. cpm
- C. fwm
- D. fwd

**Answer: D**

Explanation:

The correct answer is A because the fwd daemon is responsible for the FW CLI commands. The fwm daemon handles the communication between the Security Management server and the GUI clients. The cpm daemon handles the communication between the Security Management server and SmartConsole. The cpd daemon monitors the status of critical processes on the Security Gateway. Check Point Firewall Processes and Daemons

#### NEW QUESTION # 71

What object type would you use to grant network access to an LDAP user group?

- A. User Group
- B. SmartDirectory Group
- C. Access Role
- D. Group Template

**Answer: A**

Explanation:

The Access Role object type is used to grant network access to an LDAP user group. It defines a set of users and machines that can access a specific network resource. Access Role, LDAP User Group

#### NEW QUESTION # 72

.....

Considering that different customers have various needs, we provide three versions of 156-215.82 test torrent available--- PDF version, PC Test Engine and Online Test Engine versions. One of the most favorable demo--- PDF version, in the form of Q&A, can be downloaded for free.
