Use Snowflake ARA-C01 Dumps To Pass Exam Readily [2026]

The scoring system of our ARA-C01 exam torrent absolutely has no problem because it is intelligent and powerful. First of all, our researchers have made lots of efforts to develop the scoring system. So the scoring system of the ARA-C01 test answers can stand the test of practicability. Once you have submitted your practice. The scoring system will begin to count your marks of the ARA-C01 exam guides quickly and correctly. You just need to wait a few seconds before knowing your scores. The scores are calculated by every question of the ARA-C01 Exam guides you have done. So the final results will display how many questions you have answered correctly and mistakenly. You even can directly know the score of every question, which is convenient for you to know the current learning condition.

Snowflake SnowPro Advanced Architect Certification Sample Questions (Q81-Q86):

NEW QUESTION # 81

Which Snowflake data modeling approach is designed for BI queries?

- A. Data Vault
- B. Star schema
- C. 3 NF
- D. **Snowflake schema**

Answer: D

NEW QUESTION # 82

What will the below query return

SELECT TOP 10 GRADES FROM STUDENT;

- A. The 10 lowest grades
- B. **Non-deterministic list of 10 grades**
- C. The top 10 highest grades

Answer: B

NEW QUESTION # 83

There are two databases in an account, named fin_db and hr_db which contain payroll and employee data, respectively. Accountants and Analysts in the company require different permissions on the objects in these databases to perform their jobs. Accountants need read-write access to fin_db but only require read-only access to hr_db because the database is maintained by human resources personnel.

An Architect needs to create a read-only role for certain employees working in the human resources department.

Which permission sets must be granted to this role?

- A. USAGE on database hr_db, SELECT on all schemas in database hr_db, SELECT on all tables in database hr_db
- B. USAGE on database hr_db, USAGE on all schemas in database hr_db, REFERENCES on all tables in database hr_db
- C. MODIFY on database hr_db, USAGE on all schemas in database hr_db, USAGE on all tables in database hr_db
- D. **USAGE on database hr_db, USAGE on all schemas in database hr_db, SELECT on all tables in database hr_db**

Answer: D

Explanation:

To create a read-only role for certain employees working in the human resources department, the role needs to have the following permissions on the hr_db database:

USAGE on the database: This allows the role to access the database and see its schemas and objects.

USAGE on all schemas in the database: This allows the role to access the schemas and see their objects.

SELECT on all tables in the database: This allows the role to query the data in the tables.

Option A is the correct answer because it grants the minimum permissions required for a read-only role on the hr_db database.

Option B is incorrect because SELECT on schemas is not a valid permission. Schemas only support USAGE and CREATE permissions.

Option C is incorrect because MODIFY on the database is not a valid permission. Databases only support USAGE, CREATE, MONITOR, and OWNERSHIP permissions. Moreover, USAGE on tables is not sufficient for querying the data. Tables support SELECT, INSERT, UPDATE, DELETE, TRUNCATE, REFERENCES, and OWNERSHIP permissions.

Option D is incorrect because REFERENCES on tables is not relevant for querying the data. REFERENCES permission allows the role to create foreign key constraints on the tables.

NEW QUESTION # 84

A global company needs to securely share its sales and Inventory data with a vendor using a Snowflake account.

The company has its Snowflake account in the AWS eu-west 2 Europe (London) region. The vendor's Snowflake account is on the Azure platform in the West Europe region. How should the company's Architect configure the data share?

- A. 1. Create a share.
2. Create a reader account for the vendor to use.
3. Add the reader account to the share.
- B. 1. Create a share.
2. Add objects to the share.
3. Add a consumer account to the share for the vendor to access.
- C. 1. Promote an existing database in the company's local account to primary.
2. Replicate the database to Snowflake on Azure in the West-Europe region.
3. Create a share and add objects to the share.
4. Add a consumer account to the share for the vendor to access.
- D. 1. Create a new role called db_share.
2. Grant the db_share role privileges to read data from the company database and schema.
3. Create a user for the vendor.
4. Grant the ds_share role to the vendor's users.

Answer: B

Explanation:

The correct way to securely share data with a vendor using a Snowflake account on a different cloud platform and region is to create a share, add objects to the share, and add a consumer account to the share for the vendor to access. This way, the company can control what data is shared, who can access it, and how long the share is valid. The vendor can then query the shared data without copying or moving it to their own account. The other options are either incorrect or inefficient, as they involve creating unnecessary reader accounts, users, roles, or database replication.

NEW QUESTION # 85

A company is using Snowflake in Azure in the Netherlands. The company analyst team also has data in JSON format that is stored in an Amazon S3 bucket in the AWS Singapore region that the team wants to analyze.

The Architect has been given the following requirements:

1. Provide access to frequently changing data
2. Keep egress costs to a minimum
3. Maintain low latency

How can these requirements be met with the LEAST amount of operational overhead?

- A. Use an external table against the S3 bucket in AWS Singapore and copy the data into transient tables.
- B. Use AWS Transfer Family to replicate data between the S3 bucket in AWS Singapore and an Azure Netherlands Blob storage, then use an external table against the Blob storage.
- C. Copy the data between providers from S3 to Azure Blob storage to collocate, then use Snowpipe for data ingestion.
- D. Use a materialized view on top of an external table against the S3 bucket in AWS Singapore.

Answer: A

NEW QUESTION # 86

.....

Managing time during the Snowflake ARA-C01 exam is a challenging task. Most candidates cannot manage their time during the Snowflake ARA-C01 exam, leave the questions, and fail. Time management skills can help students gain excellent marks in the ARA-C01 Exam. Snowflake ARA-C01 practice exam on the software help you identify which kind of ARA-C01 questions are more time-consuming, and they would be able to assess their efficiency in answering questions.

Accurate ARA-C01 Test: <https://www.it-tests.com/ARA-C01.html>

It just takes one or two days to prepare the ARA-C01 dump torrent and ARA-C01 real pdf dumps, and you will pass the exam without any loss, In order to service the candidates better, we have issued the ARA-C01 test prep for you, Snowflake Accurate

ARA-C01 Test experts carefully design the dumps to help you pass the exam, More importantly, you can pass the ARA-C01 exam and get the dreaming ARA-C01 certification.

Make plans faster by adding participants to ARA-C01 calls in progress, Uber is not going to build this prototype, It just takes one or two days to prepare the ARA-C01 Dump Torrent and ARA-C01 real pdf dumps, and you will pass the exam without any loss.

Unparalleled Reliable ARA-C01 Test Price Covers the Entire Syllabus of ARA-C01

In order to service the candidates better, we have issued the ARA-C01 test prep for you, Snowflake experts carefully design the dumps to help you pass the exam.

More importantly, you can pass the ARA-C01 exam and get the dreaming ARA-C01 certification, Firstly, we have chat windows to wipe out your doubts about our ARA-C01 exam materials.
