

Knowledge NSE7_SSE_AD-25 Points & NSE7_SSE_AD-25 Study Materials

ExamsTorrent has designed ExamsTorrent which has actual exam Dumps questions, especially for the students who are willing to pass the Fortinet NSE7_SSE_AD-25 exam for the betterment of their future. The study material is available in three different formats. Fortinet NSE7_SSE_AD-25 Practice Exam are also available so the students can test their preparation with unlimited tries and pass Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7_SSE_AD-25) certification exam on the first try.

Our Fortinet NSE7_SSE_AD-25 practice exam simulator mirrors the NSE7_SSE_AD-25 exam experience, so you know what to anticipate on NSE7_SSE_AD-25 certification exam day. Our Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7_SSE_AD-25) practice test software features various question styles and levels, so you can customize your Fortinet NSE7_SSE_AD-25 exam questions preparation to meet your needs.

NSE7_SSE_AD-25 Study Materials, NSE7_SSE_AD-25 Online Test

With years of experience in the field, ExamsTorrent are always striving hard to provide customers with genuine Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7_SSE_AD-25) exam dumps so that they crack their Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7_SSE_AD-25) exam in less time. ExamsTorrent also offer the best self-assessment software so besides memorizing NSE7_SSE_AD-25 Exam Questions, applicants put their learning to the test and reduce their chances of failure in the real Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7_SSE_AD-25) examination.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q41-Q46):

NEW QUESTION # 41

An organization must block user attempts to log in to non-company resources while using Microsoft Office 365 to prevent users from accessing unapproved cloud resources.

Which FortiSASE feature can you implement to meet this requirement?

- A. application control with inline-CASB

- B. web filter with inline-CASB
- C. data loss prevention (DLP) with Microsoft Purview Information Protection (MPIP)
- D. DNS filter with domain filter

Answer: A

Explanation:

Application control with inline-CASB allows FortiSASE to inspect and control application behavior at a granular level. This enables the organization to block login attempts to personal or non- corporate Microsoft Office 365 accounts, ensuring that only approved cloud resources are accessed.

NEW QUESTION # 42

Refer to the exhibit. An organization must inspect all the endpoint internet traffic on FortiSASE, and exclude Google Maps traffic from the FortiSASE VPN tunnel and redirect it to the endpoint physical interface.

Which configuration must you apply to achieve this requirement?

- **A. Add the Google Maps URL as a steering bypass destination in the endpoint profile.**
- B. Configure a steering bypass tunnel firewall policy using Google Maps FQDN to exclude and redirect the traffic.
- C. Exempt Google Maps in URL filtering in the web filter profile.
- D. Add the Google Maps URL in the zero trust network access (ZTNA) TCP access proxy forwarding rule.

Answer: A

Explanation:

To exclude specific internet traffic (such as Google Maps) from being tunneled through FortiSASE and instead direct it out the local endpoint interface, you must configure it as a steering bypass destination in the FortiClient endpoint profile. This ensures traffic matching the URL bypasses the FortiSASE tunnel.

NEW QUESTION # 43

Which two statements about FortiSASE Geofencing with regional compliance are true? (Choose two answers)

- A. You can configure regional compliance on the security POP or the on-premises device, not both.1
- **B. A regional compliance rule can connect only to an on-premises device or only to a security POP.2**
- C. The connection order for a regional compliance rule is always the security POP first, followed by the on-premises device.
- **D. If no regional compliance rule is configured, the connection is made to the closest security POP.**

Answer: B,D

Explanation:

FortiSASE Geofencing and Regional Compliance allow administrators to control where remote users connect based on their physical location, which is determined by the endpoint's public IP address.3

* Default Connection Behavior: By default, FortiSASE uses a "best-effort" geolocation logic to ensure the lowest latency for the user. If an administrator has not configured a specific regional compliance rule for a user's country or region, FortiClient will automatically attempt to connect to the closest available FortiSASE security PoP (Point of Presence) based on proximity.4

* Regional Compliance Rules: When an organization must enforce data residency or specific security routing requirements, they create Regional Compliance rules. According to the FortiSASE 25 Feature Administration Guide, these rules allow the administrator to override the default "closest PoP" behavior for specific countries.

* Connectivity Options: Within a regional compliance rule, the administrator must specify the destination for the traffic. The system provides a choice between two distinct connection types: a FortiSASE Security PoP or an On-premises device (such as a FortiGate acting as a gateway).5 The documentation specifies that a rule is designed to point to one of these types at a time to satisfy the compliance requirement for that specific region.

* Connection Priority: While multiple connections can be managed in a priority table, the logic for Regional Compliance is focused on directing the user to the designated compliant entry point. Option D is incorrect because the connection order is determined by the Priority and custom fail-over connections table; an administrator can manually adjust the sequence, so it is not "always" the security PoP first.

NEW QUESTION # 44

What is the role of ZTNA tags in the FortiSASE Secure Internet Access (SIA) and Secure Private Access (SPA) use cases? (Choose one answer)

- A. ZTNA tags determine device posture for non-web traffic protocols and are applied only in agentless deployments for SIA.
- B. ZTNA tags are applied to unmanaged endpoints without FortiClient to secure HTTP and HTTPS traffic in SIA and SPA.
- C. ZTNA tags are created to isolate browser sessions in SIA and enforce data loss prevention in SPA for all devices.
- **D. ZTNA tags determine device posture for endpoints running FortiClient and are used to grant or deny access in SIA or SPA based on that posture.**

Answer: D

Explanation:

In the Fortinet SASE architecture, Zero Trust Network Access (ZTNA) tags (which have been renamed to Security Posture Tags starting with FortiClient/EMS 7.4.0) play a critical role in continuous posture assessment. These tags are dynamic metadata assigned to an endpoint based on specific conditions or

"tagging rules" defined in the FortiSASE Endpoint Management Service (EMS).

* Posture Determination: The FortiClient agent, installed on the endpoint, monitors the device for various security attributes—such as whether an antivirus is running, the presence of specific registry keys, OS version, or the absence of critical vulnerabilities.

* SIA (Secure Internet Access) Use Case: In SIA scenarios, FortiSASE uses these tags within security policies to control internet access. For example, a policy may allow full internet access only to endpoints tagged as "Compliant" while redirecting "Non-Compliant" devices to a restricted remediation portal.

* SPA (Secure Private Access) Use Case: In SPA (specifically ZTNA Proxy mode), the tags are synchronized from FortiSASE to the corporate FortiGate (acting as the ZTNA Access Proxy).¹² When a user attempts to access a private application, the FortiGate checks the endpoint's client certificate and its synchronized ZTNA tags.¹³ If the endpoint does not meet the required posture (e.g., it is missing a required "Domain-Joined" tag), access is denied at the session level.

According to the FortiSASE 25 Enterprise Administrator Study Guide, ZTNA tags are fundamental to the "Zero Trust" principle because they move beyond static identity (username/password) to verify the real-time security state of the device before granting access to either the internet or internal private resources.

NEW QUESTION # 45

One user has reported connectivity issues; no other users have reported problems. Which tool can the administrator use to identify the problem? (Choose one answer)

- A. SOC-as-a-Service (SOCaaS) to get information about the user's remote computer.
- B. Forensics service to obtain detailed information about the user's remote computer performance.
- **C. Digital experience monitoring (DEM) to evaluate the performance metrics of the remote computer.**
- D. Mobile device management (MDM) service to troubleshoot the connectivity issue.

Answer: C

Explanation:

In a FortiSASE deployment, Digital Experience Monitoring (DEM) is the primary diagnostic tool used to troubleshoot connectivity and performance issues specifically for a single user or endpoint.

* End-to-End Visibility: DEM provides real-time, end-to-end visibility into the network path between the end-user's device and the application they are trying to reach. This is critical when only one user reports an issue, as it allows administrators to pinpoint whether the problem resides on the local device, the local ISP, the SASE backbone, or the destination application.

* Performance Metrics: The DEM agent (often integrated with the FortiMonitor agent on the endpoint) collects granular performance metrics such as latency, jitter, packet loss, and RTT (Round Trip Time). It also provides device-specific health data, including CPU and memory usage, to determine if the connectivity issue is actually caused by the remote computer's performance.

* Hop-by-Hop Analysis: Unlike standard monitoring, DEM offers End-to-End Continuous Hop Analytics. This path monitoring visualizes every "hop" in the traffic route and highlights exactly where degraded service is occurring. For a single user experiencing issues while everyone else is fine, this tool immediately triangulates if a specific "problem hop" in their unique connection path is the cause.

* Operational Comparison: * MDM (A) is used for managing device configurations and software distribution, not for real-time network performance troubleshooting.

* Forensics (C) is a security-focused service used for investigating malware incidents or data breaches, not for measuring network latency.

* SOCaaS (D) is a managed security service for threat monitoring and event triage; while it handles "security" connectivity issues (like a blocked IP), it is not a tool for performance metric evaluation.

NEW QUESTION # 46

.....

In order to gain more competitive advantage in the interview, more and more people have been eager to obtain the NSE7_SSE_AD-25 certification. They believe that passing certification is a manifestation of their ability, and they have been convinced that obtaining a NSE7_SSE_AD-25 certification can help them find a better job. Our NSE7_SSE_AD-25 test guides have a higher standard of practice and are rich in content. If you are anxious about how to get NSE7_SSE_AD-25 Certification, considering purchasing our NSE7_SSE_AD-25 study tool is a wise choice and you will not feel regretted. Our learning materials will successfully promote your acquisition of certification. Our NSE7_SSE_AD-25 qualification test closely follow changes in the exam outline and practice.

NSE7_SSE_AD-25 Study Materials: https://www.examstorrent.com/NSE7_SSE_AD-25-exam-dumps-torrent.html

Fortinet Knowledge NSE7_SSE_AD-25 Points All the exam content is included, you can use it, Fortinet Knowledge NSE7_SSE_AD-25 Points Today, in an era of fierce competition, how can we occupy a place in a market where talent is saturated, If you have, you will use our NSE7_SSE_AD-25 exam software with no doubt, Pass the Fortinet NSE7_SSE_AD-25 exam is a competition, If you are really interested in our NSE7_SSE_AD-25 study guide materials, please rest assured that it is worth the money.

In fact, occasionally a client will reject his sketches, but use NSE7_SSE_AD-25 them to refine their needs, saying, No, that's not it, but now that I have seen something, I think I know what I want.

Many of them dislike their jobs, All the exam content is included, NSE7_SSE_AD-25 Latest Test Question you can use it, Today, in an era of fierce competition, how can we occupy a place in a market where talent is saturated?

2026 Excellent Knowledge NSE7_SSE_AD-25 Points | 100% Free NSE7_SSE_AD-25 Study Materials

If you have, you will use our NSE7_SSE_AD-25 Exam software with no doubt, Pass the Fortinet NSE7_SSE_AD-25 exam is a competition, If you are really interested in our NSE7_SSE_AD-25 study guide materials, please rest assured that it is worth the money.
