### SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q69-Q74):

#### NEW QUESTION # 69

Which SAP AI solution helps optimize supply chain operations?

Please choose the correct answer.

Response:

- A. SAP Digital Assistant
- **B. SAP AI for Supply Chain**
- C. SAP Business Workflow
- D. SAP AI Core

**Answer: B**

#### NEW QUESTION # 70

How does SAP AI support sales and marketing automation? Please choose the correct answer.

- A. By managing cloud infrastructure
- **B. By providing AI-driven lead scoring and customer insights**
- C. By generating payroll reports
- D. By automating workforce planning

**Answer: B**

Explanation:

SAP AI enhances sales and marketing automation by leveraging data-driven insights to optimize customer engagement and campaign performance. The correct answer is "By providing AI-driven lead scoring and customer insights," as this directly aligns with SAP's documented capabilities in sales and marketing automation.

SAP documentation explains: "AI in sales and marketing helps automate and enhance tasks such as customer segmentation, lead generation, and personalized advertising. It uses data analysis to predict customer behavior, optimize campaign performance, and improve decision-making, driving increased efficiency and revenue growth." Specifically, SAP AI for Marketing within SAP Customer Experience supports "AI-driven lead scoring" to prioritize high-value prospects and provides "customer insights" through predictive analytics to tailor campaigns. For instance, SAP Sales Cloud uses AI to "turn prospects into customers using instant account insights," enabling sales teams to focus on high-potential leads. Miele Professional's use of AI in SAP Sales Cloud demonstrates streamlined B2B sales through personalized insights, reinforcing this capability.

The incorrect options are unrelated to sales and marketing automation. Automating workforce planning is an HR function, typically handled by SAP SuccessFactors. Generating payroll reports is a financial task, not marketing-related. Managing cloud infrastructure is an IT function, not within the scope of SAP AI's sales and marketing capabilities. SAP's focus on AI-driven customer engagement excludes these options.

#### NEW QUESTION # 71

What are the key use cases of SAP AI in manufacturing?

There are 3 correct answers to this question.

Response:

- A. Automated quality control
- B. Handwritten production reports
- C. AI-powered production scheduling
- D. AI-driven predictive maintenance
- E. Manual equipment failure analysis

**Answer: A,C,D**

#### NEW QUESTION # 72

Which SAP AI-powered tool helps automate invoice processing and financial reconciliation?

Please choose the correct answer.

Response:

- A. SAP AI Business Services
- B. SAP Digital Assistant
- C. SAP BusinessObjects Financial Consolidation
- D. SAP Conversational AI

**Answer: A**

#### NEW QUESTION # 73

A logistics company is looking to reduce delivery delays and improve inventory management. Which SAP AI-powered solutions should they implement? Note: There are 3 correct answers to this question.

- A. SAP AI Business Services
- B. SAP Cloud ERP
- C. SAP Digital Manufacturing Cloud
- D. SAP Predictive Analytics
- E. SAP BusinessObjects Planning

**Answer: A,C,D**

Explanation:

For a logistics company aiming to reduce delivery delays and optimize inventory management, SAP offers AI-powered solutions that enhance supply chain efficiency and forecasting. The correct answers are SAP AI Business Services, SAP Predictive Analytics, and SAP Digital Manufacturing Cloud, as these solutions directly address logistics challenges with AI-driven capabilities.

SAP documentation highlights: "Create a risk-resilient and sustainable supply chain with built-in AI that is connected and contextualized. Enabling you to predict customer demand and adjust to change." SAP AI Business Services provide reusable AI capabilities, such as machine learning for demand forecasting and anomaly detection, which help "optimize supply chain operations by analyzing real-time data and market trends." SAP Predictive Analytics, embedded in solutions like SAP S/4HANA, supports "predicting customer demand and adjusting inventory levels" to minimize delays and overstocking. SAP Digital Manufacturing Cloud leverages AI to "optimize production scheduling and inventory management," ensuring efficient logistics operations by integrating real-time data from manufacturing and supply chain processes.

The incorrect options-SAP BusinessObjects Planning and SAP Cloud ERP-are not primarily AI-driven for logistics. SAP BusinessObjects Planning focuses on financial planning and analytics, not logistics-specific AI applications. SAP Cloud ERP, while encompassing AI capabilities, is too broad and not specifically tailored to logistics compared to the selected solutions. SAP's case study on Henkel illustrates how AI in SAP Business Technology Platform enhances supply chain resilience, supporting the relevance of the chosen solutions.

#### NEW QUESTION # 74

.....

All people dream to become social elite. However, less people can take the initiative. If you spend less time on playing computer games and spend more time on improving yourself, you are bound to escape from poverty. Maybe our C\_BCBAI\_2502 real dump
