Realistic Valid 300-745 Exam Labs Covers the Entire Syllabus of 300-745

The Cisco 300-745 PDF questions file of Prep4cram has real Cisco 300-745 exam questions with accurate answers. You can download Cisco PDF Questions file and revise Designing Cisco Security Infrastructure 300-745 exam questions from any place at any time. We also offer desktop 300-745 practice exam software which works after installation on Windows computers. The 300-745 web-based practice test on the other hand needs no software installation or additional plugins. Chrome, Opera, Microsoft Edge, Internet Explorer, Firefox, and Safari support the web-based 300-745 Practice Exam. You can access the Cisco 300-745 web-based practice test via Mac, Linux, iOS, Android, and Windows. Prep4cram Designing Cisco Security Infrastructure 300-745 practice test (desktop & web-based) allows you to design your mock test sessions. These Cisco 300-745 exam practice tests identify your mistakes and generate your result report on the spot.

The Designing Cisco Security Infrastructure prep torrent that we provide is compiled elaborately and highly efficient. You only need 20-30 hours to practice our 300-745 exam torrent and then you can attend the exam. Among the people who prepare for the exam, many are office workers or the students. For the office worker, they are both busy in the job or their family; for the students, they possibly have to learn or do other things. But if they use our 300-745 Test Prep, they won't need so much time to prepare the exam and master exam content in a short time. What they need to do is just to spare 1-2 hours to learn and practice every day and then pass the exam with 300-745 test prep easily. It costs them little time and energy.

New 300-745 Test Pdf, 300-745 Torrent

The industry experts hired by 300-745 study materials explain all the difficult-to-understand professional vocabularies easily. All the languages used in 300-745 real exam were very simple and easy to understand. With our 300-745 study guide, you don't have to worry about that you don't understand the content of professional books. You also don't need to spend expensive tuition to go to tutoring class. 300-745 Practice Engine can help you solve all the problems in your study.

Cisco Designing Cisco Security Infrastructure Sample Questions (Q58-Q63):

NEW QUESTION # 58
After a recent security breach, a financial company is reassessing their overall security posture and strategy to better protect sensitive

data and resources. The company already\ deployed on- premises next-generation firewalls at the network edge for each branch location. Security measures must be enhanced at the endpoint level. The goal is to implement a solution that provides additional traffic filtering directly on endpoint devices, thereby offering another layer of defense against potential threats. Which technology must be implemented to meet the requirement?

- A. traditional firewall
- B. distributed firewall
- C. web application firewall
- D. host-based firewall

Answer: D

Explanation:
A host-based firewall runs directly on endpoint devices, providing traffic filtering and protection at the endpoint level. This adds another layer of defense beyond the network edge firewalls, ensuring threats are mitigated closer to where sensitive data resides.

NEW QUESTION # 59
An oil and gas company recently faced a security breach when an employee's notepad, which contained critical login credentials, was stolen. The incident led to unauthorized access to a user account, which posed a significant risk to sensitive company data and operations. The company wants to adopt a security measure that enhances user account protection. Which action must be taken to prevent breaches like this from happening in the future?

- A. Configure a password expiration policy.
- B. Implement single sign-on.
- C. Update the RADIUS server.
- D. Implement MFA

Answer: D

Explanation:
Multi-Factor Authentication (MFA) strengthens user account security by requiring additional verification factors beyond passwords, such as tokens or biometrics. Even if credentials are stolen, MFA prevents unauthorized access, directly addressing the breach scenario.

NEW QUESTION # 60
A company has been facing recurring issues with SQL injection vulnerabilities affecting the products, leading to significant disruptions for customers. To address the security concerns proactively, the company wants to integrate a tool into the CI/CD pipeline. The tool must be capable of identifying vulnerabilities such as SQL injection early in the development process, which allows developers to rectify issues before the code is deployed. Which solution must be implemented to meet the requirement?

- A. Dynamic Application Security Testing tools, such as OWASP ZAP, Veracode, Burp Suite
- B. Static Application Security Testing tools, such as Checkmarx, Fortify, SonarQube
- C. workflow automation tools, such as GitHub Actions, Azure
- D. build log observability tools, such as Splunk, Datadog

Answer: B

Explanation:
Static Application Security Testing (SAST) tools analyze source code during the development and build phases of the CI/CD pipeline. They can identify coding flaws such as SQL injection vulnerabilities early, allowing developers to fix issues before deployment.

NEW QUESTION # 61
A restaurant distribution center recently suffered a password spray attack targeting the Cisco Secure Firepower Threat Defense VPN headend. The attack attempts to gain unauthorized access by trying common passwords across many accounts. The attack poses a significant security threat to the organization's remote access infrastructure. To enhance the security of VPN setup and minimize the risk of similar attacks in the future, the IT security team must implement effective mitigation measures. Which technique effectively reduces the risk of this type of attack?

- A. Enable AAA authentication for the DefaultWEBVPN and DefaultRAGroup Connection Profiles.
- B. Implement an access list to block addresses from the previous password spray attack.
- C. Disable group aliases in the connection profiles.
- D. Change the AAA authentication method from RADIUS to TACACS+.

Answer: A

Explanation:
Enabling AAA authentication on the default connection profiles ensures that all VPN access attempts must go through strong authentication. This directly mitigates password spray attacks by enforcing centralized authentication controls, enabling account lockout, and supporting additional protections such as multifactor authentication.

NEW QUESTION # 62
Which two controls help detect drift in IaC-managed infrastructure? (Choose two.)

- A. DHCP snooping
- B. Immutable infrastructure patterns
- C. Manual change log entries
- D. Continuous configuration monitoring

Answer: B,D

Explanation:
Continuous configuration monitoring detects deviations from IaC definitions, while immutable infrastructure minimizes drift by replacing resources instead of modifying them in place.

NEW QUESTION # 63
.....

Although the 300-745 exam prep is of great importance, you do not need to be over concerned about it. With scientific review and arrangement from professional experts as your backup, and the most accurate and high quality content of our 300-745 Study Materials, you will cope with it like a piece of cake. So our 300-745 learning questions will be your indispensable practice materials during your way to success.
