ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q61-Q66):

NEW QUESTION # 61

Where do you define 'Roles' requested via resource plans?

- A. No need to define it differently, they are same as system roles.
- B. Roles under system security.
- C. Under skill management modules.
- **D. Resource roles under resource management.**

Answer: D

Explanation:

Explanation

According to the Assigning Resource Roles document, you define 'Roles' requested via resource plans under resource roles in the Resource Management application. Resource roles are the roles that users can request or allocate for resource plans. The other options are not correct, as they are not the places where you define 'Roles' requested via resource plans. The system roles are the roles that grant access to various applications and modules in the system. The roles under system security are the roles that control the security settings and permissions for the system. The skill management modules are the modules that manage the skills and skill levels of users and groups.

NEW QUESTION # 62

As an `it_pps_admin`, what can you use to detect corrupt data in a project, such as tasks with invalid parents or cyclic relations in a project?

- A. System Diagnostics.
- B. Edge Encryption Diagnostics.
- C. Analytics Diagnostics.
- **D. Project Diagnostics.**

Answer: D

NEW QUESTION # 63

Which role can configure the parameters of the demand workbench that is provided with the base system?

- **A. `it_pps_admin`.**
- B. `it_project_manager`.
- C. All roles.
- D. `business_stakeholder`.

Answer: A

Explanation:

Explanation

According to the Demand Workbench document, the role that can configure the parameters of the demand workbench that is provided with the base system is `it_pps_admin`. This role grants access to the Project Portfolio Suite application and allows the user to configure the demand workbench settings, such as the axes, the quadrants, the bubble size, and the color. The other options are not correct, as they are not roles that can configure the parameters of the demand workbench. The all roles option is too broad and does not specify a particular role. The `business_stakeholder` role grants access to the Business Stakeholder Portal and allows the user to view and submit demands. The `it_project_manager` role grants access to the Project Portfolio Management application and allows the user to create and update projects.

NEW QUESTION # 64

Which resource tasks can be completed in Project Workspace?

Choose 2 answers

- A. Allocate a resource creating a named-resource assignment
- B. Create a resource calendar
- C. View available capacity of resources
- D. Request a resource using role, group, or skill
- E. View resource requests

Answer: C,D

NEW QUESTION # 65

What does the project status report allow project managers to do?

Choose 2 answers

- A. Show historical trend of project KPI's
- B. Print as a PDF attachment
- C. View the WBS
- D. View the project Gantt chart

Answer: A,B

Explanation:

The project status report allows project managers to do the following:

Show historical trend of project KPI's: The project status report displays the key performance indicators (KPIs) of the project, such as schedule variance, cost variance, and earned value. It also shows the historical trend of these KPIs over time, which helps project managers monitor the progress and performance of the project. You can find more information about the project status report KPIs in the Product Documentation for ServiceNow.

Print as a PDF attachment: The project status report can be printed as a PDF attachment and sent to the stakeholders or sponsors of the project. This helps project managers communicate the status and health of the project in a clear and concise format. You can find more information about the project status report PDF attachment in the Product Documentation for ServiceNow.

NEW QUESTION # 66

.....
