Latest NCP-DB-6.10 Learning Material | Latest NCP-DB-6.10 Test Vce

There have many shortcomings of the traditional learning methods. If you choose our NCP-DB-6.10 test training, the intelligent system will automatically monitor your study all the time. Once you study our NCP-DB-6.10 certification materials, the system begins to record your exercises. Also, the windows software will automatically generate a learning report when you finish your practices of the NCP-DB-6.10 Real Exam dumps, which helps you to adjust your learning plan. It is crucial that you have formed a correct review method. The role of our NCP-DB-6.10 test training is optimizing and monitoring your study. Sometimes you have no idea about your problems. So you need our NCP-DB-6.10 real exam dumps to promote your practices.

I wonder if you noticed that there are three versions of our NCP-DB-6.10 test questions—PDF, software on pc, and app online, which can bring you the greatest convenience. Imagine that if you feel tired or simply do not like to use electronic products to learn, the PDF version of NCP-DB-6.10 Test Torrent is best for you. Just like reading, you can print it, annotate it, make your own notes, and read it at any time.

100% Pass Quiz Nutanix - NCP-DB-6.10 - The Best Latest Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Learning Material

To advance your career, take the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 exam. Your Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 demonstrates your commitment to lifelong learning. Passing the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 exam in one sitting is not a walk in the park. The Nutanix NCP-DB-6.10 exam preparation process takes a lot of time and effort. You have to put time and money into passing the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 exam. The best method to reap the rewards of your investment in becoming an Nutanix Horizon & Nutanix is by using Nutanix NCP-DB-6.10 Exam Questions. Additionally, you can confidently study for the NCP-DB-6.10 exam.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q132-Q137):

NEW QUESTION # 132
An administrator would like to leverage the Oracle restore feature within NDB for a RAC database. Prior to the restoration operation, what must the administrator do?

- A. Ensure the database is registered with NDB.
- B. Ensure more than one node of the RAC is reachable.
- C. Ensure the database is in a Down state.
- D. Ensure the database is in an Up state.

Answer: A

Explanation:
To leverage the Oracle restore feature within Nutanix Database Service (NDB) for a Real Application Clusters (RAC) database, the administrator must ensure that the database is registered with NDB prior to initiating the restoration operation. Registration allows NDB to recognize the RAC database, manage its metadata, and perform operations like restore using Time Machine snapshots or backups. Without registration, NDB cannot access the necessary configuration details or protection data, rendering the restore feature unavailable.

NEW QUESTION # 133
In order to configure and begin taking advantage of the Data Access Management feature of Time Machine, which action should an administrator take first?

- A. Enable NDB multi-cluster and register required Nutanix cluster(s).
- B. Enable NDB HA to protect the metadata associated with the configuration.
- C. Take an application consistent snapshot of the source database.
- D. Ensure that the source database has been provisioned on the remote Nutanix cluster.

Answer: A

Explanation:
To configure and begin taking advantage of the Data Access Management feature of Time Machine, the administrator must first enable NDB multi-cluster and register the required Nutanix cluster(s). Data Access Management allows controlled access to data (e.g., snapshots, clones) across multiple clusters, requiring a multi-cluster setup. This involves enabling multi-cluster support in NDB and registering remote clusters to facilitate data replication and access policies.

NEW QUESTION # 134
An administrator needs to register a SQL Server Single Node Database Server VM with NDB.
Which condition must exist prior to the administrator completing this task?

- A. SQL Server instance must be in single-user mode.
- B. Database files must exist in the Windows OS boot drive.
- C. The login account provided must be a member of the sysadmin role.
- D. The SQL service account should not have read privileges on the mount points.

Answer: C

Explanation:
Before registering a SQL Server Single Node Database Server VM with NDB, it is necessary that the login account provided for this task must be a member of the sysadmin role. This ensures the necessary permissions are in place for managing and administering the SQL Server instance.

NEW QUESTION # 135
An administrator must be able to restore databases based on very strict SLAs, but is facing multiple bottlenecks when storing log backups of databases on NDB Agents. What can the administrator do to alleviate these issues?

- A. Integrate NDB with AWS S3 or Azure Blob storage for storing log backups.
- B. Add additional NDB Agent VMs.
- C. Integrate NDB with Nutanix Objects for storing log backups.
- D. Increase the RAM and CPU on the NDB Agent VMs.

Answer: C

Explanation:
NDB Agents handle log backups for database instances, but storing these backups locally can lead to bottlenecks (e.g., disk I/O, storage capacity). To alleviate this, integrating NDB with Nutanix Objects is the recommended solution. Nutanix Objects is an S3-compatible object storage service within the Nutanix ecosystem, ideal for offloading log backups from NDB Agents to a scalable, centralized storage platform. This reduces local storage pressure, improves performance, and ensures strict SLAs for database

recovery by leveraging efficient backup retrieval.

NEW QUESTION # 136
An administrator needs to add a stretched VLAN across two clusters in NDB Which two prerequisites should be met prior to completing this action? (Choose two.)

- A. Both clusters must be registered in NDB.
- B. VLAN must be IPAM.
- C. Nutanix Cluster Management must be enabled.
- D. VLAN must be static.

Answer: A,D

Explanation:
A stretched VLAN is a virtual network that spans across multiple Nutanix clusters and allows the communication between VMs on different clusters using the same subnet. A stretched VLAN can be used to provide high availability and load balancing for NDB components, such as HAProxy VMs, that require a virtual IP address (VIP) to be accessible from any cluster. To add a stretched VLAN across two clusters in NDB, the administrator needs to meet two prerequisites: the VLAN must be static and both clusters must be registered in NDB. A static VLAN is a VLAN that is manually created and configured by the administrator, as opposed to an IPAM VLAN that is automatically created and managed by NDB. A static VLAN can be added to a stretched VLAN in NDB, while an IPAM VLAN cannot. Both clusters must be registered in NDB before adding a stretched VLAN, as NDB needs to have the information and access to the clusters and their networks. The administrator can register the clusters in NDB using the Prism Element details, agent network configuration, and storage container information. The other option, Nutanix Cluster Management, is not a prerequisite for adding a stretched VLAN in NDB. Nutanix Cluster Management is a feature that allows the administrator to manage multiple Nutanix clusters from a single NDB UI, such as creating or deleting clusters, adding or removing nodes, or performing cluster operations. Nutanix Cluster Management is not required for adding a stretched VLAN, as the VLANs are created and configured in Prism Element, not in NDB.

NEW QUESTION # 137
......

Thus, it will allow you to examine the Nutanix NCP-DB-6.10 Dumps before purchasing it. ValidBraindumps proudly presents the exceptional Nutanix NCP-DB-6.10 material that will meet your expectations. Beware that the sections of the exam change from time to time. Therefore, be alert by checking the updates frequently. It will prevent you from wasting time, material expenses, and inner peace.

Latest NCP-DB-6.10 Test Vce: https://www.validbraindumps.com/NCP-DB-6.10-exam-prep.html

We will update the content of NCP-DB-6.10 test guide from time to time according to recent changes of examination outline and current policies, What's more, the majority of population who has had the pre-trying experience finally choose to buy our NCP-DB-6.10 training materials: Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 as people all deem our exam files as the most befitting study materials, If you want to know discount details about NCP-DB-6.10 dumps PDF please feel free to contact us.

Previously, he was with Computer Associates as a senior NCP-DB-6.10 systems engineer, where he worked on enterprise monitoring presales activities and as a technical specialist.

Thinking on the basis of the essence of existence, which is itself a possibility NCP-DB-6.10 Exam Papers potential) that can provoke an explicit desire only in this way, and this kind of provocation is already an extension of one kind of existence, carry out.

Pass Guaranteed 2026 Nutanix Authoritative Latest NCP-DB-6.10 Learning Material

We will update the content of NCP-DB-6.10 Test Guide from time to time according to recent changes of examination outline and current policies, What's more, the majority of population who has had the pre-trying experience finally choose to buy our NCP-DB-6.10 training materials: Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 as people all deem our exam files as the most befitting study materials.

If you want to know discount details about NCP-DB-6.10 dumps PDF please feel free to contact us, We also have free demo for

you, you can have a look at and decide which version you want to choose.

Of course, the premise is that NCP-DB-6.10 Advanced Testing Engine you have used it once before in a networked environment.
