156-215.82 Test Vce, Latest 156-215.82 Dumps Ppt

With all 156-215.82 practice materials being brisk in the international market, our 156-215.82 practice materials are quite catches with top-ranking quality. But we do not stop the pace of making advancement by following the questions closely according to exam. So our experts make new update as supplementary updates. During your transitional phrase to the ultimate aim, our 156-215.82

practice materials as well as these updates are referential. Those materials can secede you from tremendous materials with least time and quickest pace based on your own drive and practice to win. Those updates will be sent to you accordingly for one year freely.

CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q176-Q181):

NEW QUESTION # 176

True or False: More than one administrator can log into the Security Management Server with SmartConsole with write permission at the same time.

- A. True, every administrator works in a session that is independent of the other administrators
- B. True, every administrator works on a different database that is independent of the other administrators
- C. False, this feature has to be enabled in the Global Properties.
- D. False, only one administrator can login with write permission

Answer: A

Explanation:

SmartConsole is a unified graphical user interface that allows administrators to manage multiple Check Point security products from a single console. More than one administrator can log into the Security Management Server with SmartConsole with write permission at the same time. Every administrator works in a session that is independent of the other administrators. The changes made by one administrator are not visible to others until they are published². Check Point R81 SmartConsole R81 User Guide

NEW QUESTION # 177

Session unique identifiers are passed to the web api using which http header option?

- A. Proxy-Authorization
- B. Application
- C. Accept-Charset
- D. X-chkp-sid

Answer: D

Explanation:

The correct answer is D because session unique identifiers are passed to the web api using the X-chkp-sid http header option¹. The X-chkp-sid header is used to authenticate and authorize API calls¹. The other options are not related to session unique identifiers. Check Point R81 Security Management Administration Guide

NEW QUESTION # 178

In Unified SmartConsole Gateways and Servers tab you can perform the following functions EXCEPT _____.

- A. Upgrade the software version
- B. Open SSH
- C. Open service request with Check Point Technical Support
- D. Open WebUI

Answer: B

Explanation:

The function that can NOT be performed in the Unified SmartConsole Gateways and Servers tab is Open SSH. SSH is a secure shell protocol that allows remote access to a device via command line interface. The Unified SmartConsole does not provide an option to open SSH from the Gateways and Servers tab, as it is not a graphical user interface. The other functions can be performed in the Unified SmartConsole Gateways and Servers tab, such as upgrading the software version, opening WebUI, or opening service request with Check Point Technical Support.

NEW QUESTION # 179

URL Filtering cannot be used to:

- A. Improve organizational security
- B. Control Data Security
- C. Decrease legal liability
- **D. Control Bandwidth issues**

Answer: D

Explanation:

URL Filtering is a blade that enables administrators to control access to millions of websites by category, users, groups, and machines. URL Filtering can be used to improve organizational security, decrease legal liability, and control data security by preventing users from accessing malicious or inappropriate websites. However, URL Filtering cannot be used to control bandwidth issues, such as limiting the amount of traffic or prioritizing certain applications over others³. For that purpose, other blades such as QoS (Quality of Service) or SecureXL are more suitable. Check Point R81 URL Filtering Administration Guide

NEW QUESTION # 180

Fill in the blank: When tunnel test packets no longer invoke a response, SmartView Monitor displays _____ for the given VPN tunnel.

- A. No Response
- B. Inactive
- **C. Down**
- D. Failed

Answer: C

Explanation:

When tunnel test packets no longer invoke a response, SmartView Monitor displays Down for the given VPN tunnel. This means that the VPN tunnel is not operational and there is no IKE or IPsec traffic passing through it. No Response, Inactive, and Failed are not valid statuses for VPN tunnels in SmartView Monitor. Smart View Monitor displays status for all S2S VPN tunnels - Phase1 UP

NEW QUESTION # 181

.....
