

800-150考試大綱 &最新800-150試題

從Google Drive中免費下載最新的KaoGuTi 800-150 PDF版考試題庫：<https://drive.google.com/open?id=1Qt34-wGWavLS8eHSoRnjCMGeZsFkGHj1>

KaoGuTi的經驗豐富的專家團隊開發出了針對Cisco 800-150 認證考試的有效的培訓計畫，很適合參加Cisco 800-150 認證考試的考生。KaoGuTi為你提供的都是高品質的產品，可以讓你參加Cisco 800-150 認證考試之前做模擬考試，可以為你參加考試做最好的準備。

Cisco 800-150 考試大綱：

主題	簡介
主題 1	• Cisco UCS and Data Center Architecture: This section of the exam measures the skills of a Data Center Engineer and introduces Cisco's UCS and data center solutions. It explains the devices found in a data center, including switches, UCS servers, and director switches, and describes different server deployment models. Students will also learn about virtualization components like virtual machines, hypervisors, cloud computing concepts, and deployment models. The section covers how Cisco UCS devices fit into campus networks, edge locations, and data centers, and explains the key components and connections used in UCS architecture.
主題 2	• Cisco Software: This section of the exam measures the skills of a Network Engineer and discusses Cisco's software systems and licensing. It explains the difference between IOS install and bundle modes and gives an overview of different licensing models. Students learn how to manage Cisco software images, including backing up, transferring, and installing images via FTP, TFTP, or USB. It also covers how to handle configuration files to keep devices running properly and ensure smooth upgrades or replacements.
主題 3	• Common Service Tasks and Tools: This section of the exam measures the skills of a Technical Support Engineer and focuses on tasks commonly needed to manage Cisco devices. It explains how devices boot up, introduces common Cisco IOS commands, and identifies tools for file management. It shows how to confirm physical connections, remotely access devices, and connect to the console port. It also covers how to capture the status of a device, recover passwords, and replace devices by using proper tools. Students are also taught how to find serial numbers on Cisco equipment to assist with support and maintenance activities.

最新Cisco 800-150試題 - 800-150參考資料

KaoGuTi的800-150考古題有两种版本，即PDF版和软件版。這樣可以給你最大的方便。PDF版方便你的使用，你可以下載並且將800-150考古題列印出來以供隨時學習。軟體版類比了真實的考試，可以讓你切身感受到Cisco考試的氣氛。这样在考试时你就可以轻松自如地应对了。

最新的 Cisco Certified Field Technician (CCT) 800-150 免費考試真題 (Q14-Q19):

問題 #14

Drag and drop the actions that must be taken after installing an E-Series server from the left into order on the right.

答案:

解題說明:

問題 #15

Refer to the exhibit. Drag and drop the steps in the TCP/IP encapsulation process from the left onto the corresponding layer on the right.

答案:

解題說明:

問題 #16

Which pod-based deployment model provides the most flexibility and scalability in a modern data center topology?

- A. Fabric Extender model
- B. Top of Rack (ToR)
- **C. Spine-and-Leaf**
- D. End of Row (EoR)

答案: C

解題說明:

The Spine-and-Leaf architecture is the preferred pod-based deployment model in modern data centers because of its high scalability and flexibility. In this topology:

* Leaf switches connect to servers and act as the access layer.

* Spine switches function as the core layer, interconnecting all leaf switches.

This non-blocking, highly redundant model supports predictable latency, easy horizontal scaling, and load balancing, making it ideal for cloud-scale and virtualized environments.

* Top of Rack (ToR) and End of Row (EoR) are physical cabling layouts that do not inherently provide the same level of architectural scalability.

* Fabric Extender models extend switch ports but depend on upstream switches for intelligence, limiting flexibility.

問題 #17

What are two indicators that a network interface card must be replaced? (Choose two.)

- **A. Consistent link down status**
- **B. Connectivity problems**
- C. Inability to save configurations
- D. Frequent system crashes
- E. Boot failures

答案: A,B

A Network Interface Card (NIC) is essential for device connectivity. Two common symptoms indicating that a NIC may be faulty and require replacement are:

Connectivity problems (Option A): Devices may fail to communicate with the network, showing no IP address assignment or inability to ping/connect to other devices.

Consistent link down status (Option D): The link LED may stay off or frequently go down, even when connected to a functioning switch port with a known-good cable.

Other options like configuration issues (Option B) or system crashes (Option E) might be due to software or unrelated hardware components, and boot failures (Option C) typically point to motherboard or storage faults.

問題 #18

Which step must be performed immediately after powering off the device when replacing a Cisco chassis?

- A. Label and remove all I/O cables.
- B. Remove the chassis.
- C. Back up the device configuration.
- D. Remove the chassis ground.

答案: A

解題說明：

After powering off a Cisco device in preparation for chassis replacement, the immediate next step is to label and remove all I/O cables. This step is crucial to ensure that all connections can be accurately restored after the new chassis is installed.

Proper labeling prevents confusion and potential misconfigurations during reassembly. Only after all cables are safely disconnected should you proceed to remove the chassis ground and then the chassis itself.
