SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q16-Q21):

NEW QUESTION # 16
Why is it recommended to disable the multi-language Manual Toggle when using the multi-language Auto- Toggle?

- A. To ensure that the Manual Toggle is only available for administrators
- B. Because Manual Toggle consumes more resources than Auto-Toggle
- C. To prevent conflicts where the user's Manual Toggle choice overrides the Auto-Toggle settings
- D. Because the Manual Toggle and Auto-Toggle can cause the page to refresh unexpectedly

Answer: C

Explanation:
WalkMe's multi-language feature allows content to be displayed in different languages, with two toggle options: Auto-Toggle, which automatically selects the language based on user settings (e.g., browser or account preferences), and Manual Toggle, which lets users manually choose their language. When both toggles are enabled, a user's manual language selection can override the Auto-Toggle's automatic detection, leading to conflicts and inconsistent user experiences. Disabling the Manual Toggle ensures that the Auto- Toggle functions as intended, delivering content in the user's preferred language without interference.
The other options are incorrect:
* Option A is wrong because the Manual Toggle is not restricted to administrators; it's available to end users.
* Option B is misleading, as there's no evidence that Manual Toggle consumes significantly more resources.
* Option D is incorrect, as neither toggle typically causes unexpected page refreshes.

Extract from Official WalkMe Documentation:
According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.8: Multi-Language Support):
"When using Auto-Toggle for multi-language content, it is recommended to disable the Manual Toggle to avoid conflicts. Manual selections by users can override Auto-Toggle settings, leading to inconsistent language display." The courseAdvancing Your Skills in Building WalkMe Solutionsstates:
"To ensure a seamless multi-language experience, disable the Manual Toggle when Auto-Toggle is active.
This prevents user overrides that could disrupt the automatic language detection process." Option C correctly explains the recommendation to disable the Manual Toggle to prevent conflicts.

- A. Automatically deleting unused software from the tech stack
- B. Tracking user engagement with on-screen guidance
- C. Identifying workflow friction points and adoption gaps
- D. Preventing users from accessing certain applications
- E. Providing real-time insights into software usage and process efficiency

Answer: B,C,E

* Providing real-time insights into software usage and process efficiency(E): Delivers actionable data on how software is used, highlighting inefficiencies.

* Splits(C) are optional for handling alternate paths, not required for all Smart Walk-Thrus.
